Hi friends,

Welcome to March! 🍀 As we step into this vibrant month, whether you're in the classroom or at home, get ready for a whirlwind of exciting science adventures! 🚀

March is bursting with fantastic science themes just waiting to be explored, and I've curated a list of activities that are fun and super easy to set up! 🎉

So, let's dive in and embark on some thrilling scientific journeys together!

St. Patrick's Day/Rainbows:

- 🔍 Treasure Hunt with Non-Newtonian Fluids
- 🌈 Fizzy Pots (reader favorite, watch the video!)
- 🧑 Explore a Walking Water Rainbow
- 🌈 Grow a Crystal Rainbow

-  Engineer a Leprechaun Trap!

For Women in Science:

-  Try Pockels' Magic Pepper
-  Make an Ocean Map with Marie
-  Take Flight with Amelia
-  Check out more Women in Science!

For Spring Themes:

-  Explore the weather!
-  Dig around with geology!
-  Build a life cycle or two!
-  Must try: Seed Germination Jar Project

Seuss Theme:

-  Make butter
-  Try fizzy green eggs
-  Build a cat's hat STEM challenge

✓ Don't forget, with our [All Access Pass](#), you unlock unlimited access to all our resources, ensuring you never run out of science-fueled excitement!

Let's make this March a month filled with wonder, discovery, and plenty of science fun! 

Happy experimenting!

Have fun!

Sarah
