Dear Science Enthusiasts,

We're thrilled to share our love for erupting volcanoes with you and your budding scientists! 🧪

Whether you're a seasoned volcano enthusiast or just dipping your toes into the world of geology, we have an array of exciting activities that will make learning about volcanoes a blast! 💥

Here's what we've got simmering for you:

Classic Volcano: 🌋 The timeless favorite! Create a volcanic eruption with baking soda and vinegar for a fizzy, foamy explosion.

Sandbox Volcano: 🏖️ Take your volcano-building skills outdoors! Construct a mini mountain in the sandbox and watch it erupt with baking soda lava.

Lemon Volcano: 🍋 Who knew lemons could erupt? Use lemon juice and

baking soda to experience a tangy twist on the classic volcano experiment.

Paper Volcano Diorama:  Get crafty with this 3D printable paper volcano model with labels.

Volcano Facts Activity Pack to enhance your volcanic adventures!  

 Can't get enough rocks and minerals? Check out our **Geology Project Pack**. If you're an All Access Pass holder, use your code! If you are not a pass holder, [find out more here!](#)

 *And don't forget, these volcano experiments make fantastic science fair projects!* 

Let's make learning... erupt with excitement!  

Have fun!

Sarah
