Technology Report

STS Recycle picked up all of our old and outdated electronic equipment to recycle. They then sent a detailed report of the items with make, serial numbers, and asset id if they had one.

We did receive e-rate funding approval for internet use from Spectrum for the 2026-2027 School Year. For our 10 GB connection to the internet costing \$25,634.52 per year and at the 80% discount rate, we will receive \$20,507.62. We will also hold off for our secondary backup line for the next e-rate schedule to get the 80% discount as well.

We are assisting with various end-of-year programs including banquets, band, and graduation.

Mitchell
