

Consider approval to purchase the Frontline Education Business Solutions subscription

1. Background:

Southwest ISD currently uses the Frontline Education Enterprise Resource Planning (ERP) program from Frontline Technologies Group for business operations. The District has purchased the yearly Business Solution subscription since the Frontline Education ERP was adopted and implemented in September 2019.

2. Process:

The renewal subscription for Business Solutions is procured through Buyboard contract 729-25 for Technology Equipment, Products, Services, and Software. Additional quotes were not obtained since Frontline Education already provides Southwest ISD with industry-leading solutions and technology, and it would not be cost-effective to transition to a different ERP.

3. Fiscal Impact:

The total cost is \$321,516.11 for renewal of the 12-month subscription. Locally budgeted funds will be utilized to purchase the subscriptions.

4. Recommendation:

The board approves the purchase of the 12-month renewal subscription for the Frontline Education Business Solutions program.

5. Required:

Board action.
