

Secondary Mathematics Instructional Material Selection

TEA High Quality Instructional Materials

Under state law, school systems in Texas have the flexibility and final authority to choose the instructional materials for classroom instruction, as long as those instructional materials, in total, cover 100% of the Texas Essential Knowledge and Skills (TEKS), and do not:

- violate provisions of Texas Education Code (TEC), §28.0022 covering “Certain Instructional Materials and Prohibitions;”
- violate TEC, §28.0062.(a-1), covering the exclusion of three-cueing in phonics instruction; or
- violate any other law or regulation that protects students from harmful content.

CISD HQIM Selection Process

When adopting new instructional materials, the Teaching and Learning Department will lead the adoption process through the instructional materials review and adoption process outlined in the steps below:

- establish criteria and review all available materials
- present materials to teacher committees
- collect feedback from stakeholders
- make a recommendation(s) based on feedback and established criteria
- collaborate with vendors regarding purchase negotiations and logistical planning of implementation
- recommend materials to the Board of Trustees for approval
