

Proposal for Replacement Astronomical Time Clocks

- Replace 20 outdated time clocks across our buildings to enhance school safety, improve energy efficiency, and automate scheduling.
- The existing clocks require labor-intensive manual seasonal adjustments.
- These will follow changing sunrise/sunset times, adjust for leap years, and daylight saving time automatically.
- Features built-in backup power so batteries never need replacing. Prevents wasteful daytime or summer operation, lowers maintenance.

Tri-M Electric	\$13,710	lowest bid
Arc 1 Electric Inc	\$15,387	additional \$1,677
Volt Electric, Inc	\$35,575	additional \$21,865

We are requesting approval of the **Tri M Electric** proposal for \$13,710. The company's owner, Mike, has a history of reliable service within our district and is familiar with our facilities.
