ACTION

BACKGROUND INFORMATION

Texas law requires all school districts to adopt an integrated pest management program (IPM) and to designate an IPM Coordinator to manage the implementation of the IPM program. Integrated Pest Management is an ecologically based strategy that focuses on pest prevention by combining techniques such as biological control, habitat manipulation, cultural practices, and the use of pesticides. Pesticide controls should only be used after monitoring indicates established pest thresholds have been met. Pesticide products should be selected and applied in a manner that minimizes risks to human health, non-target organisms, and the environment.
