Assistant Superintendent's Board Report

September 14, 2026

- **District Walkthrough Form** - A district walkthrough form has been developed and shared with all campus administrators. The form will be used during classroom check-ins as a coaching and feedback tool to document observations, recognize strengths, and provide meaningful instructional and classroom feedback to teachers.
- **Principal Meetings** - Biweekly principal meetings have been scheduled and are underway. These meetings provide an opportunity for collaboration and communication while promoting consistency in expectations and practices across campuses. Discussions focus on upcoming events and priorities, instruction and curriculum, school safety, and student and staff support.
- **Weekly Campus Walks** - Weekly campus walks are being conducted across the District to maintain visibility and stay connected to what is happening on each campus. These visits include informal classroom walkthroughs to observe instruction, student engagement, and the overall learning environment firsthand.
- **District Organizational Chart** - The District organizational chart has been updated to reflect current positions, reporting structures, and areas of responsibility. The updated chart provides greater clarity and consistency regarding supervision and support across District departments and campuses.
- **District School Safety Audit Survey** - The District School Safety Audit Survey has been completed and submitted. Based on the District's self-audit, we are currently in compliance in all areas reviewed.
