

# JUSTICE PROTECTION PROGRAM (JPP)

Proactive Disaster Protection for Texas School Districts

## The Problem:

When disaster strikes, school districts are forced to make high-stakes financial decisions, outside their expertise, under extreme pressure. Insurance policy gaps are discovered too late. Insurance claims are often complex and multi-faceted. FEMA documentation requirements often slow recovery and create more responsibilities for school personnel. FEMA procurement guidelines are ever-changing and missteps can jeopardize reimbursement. Districts are often reactive without structured pre-loss protection in place.

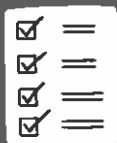

## The Solution:

# JUSTICE PROTECTION PROGRAM (JPP)

**The Justice Protection Program (JPP) establishes a proactive partnership before disaster occurs.** It positions your district to maximize insurance recovery, protect FEMA eligibility, and accelerate financial restoration after a loss.

Districts work with the professionals at The Justice Claims Group to prepare for a disaster/claim through the Justice Protection Program. At the appropriate time, the District may enter into a separate claim agreement with The Justice Claims Group to carry out the Post-Loss Services that are offered through the Justice Protection Program.

## Pre-Loss Services Provided:

### Annual Insurance Policy Review (Complimentary)

Structured review of limits, endorsements, exclusions, schedules of values, deductibles, and sub-limits. You receive a clear coverage overview and risk exposure discussion points.

### Baseline Facility Inspections

On-site walkthroughs to document existing conditions and capture digital photo records. This establishes defensible pre-loss documentation that strengthens future claims. Enhanced inspections providing a written inspection report, documentation and recommendations available for nominal fee.

### Disaster Plan Gap Analysis

Review of existing disaster preparedness plans with recommendations for improvement. If no formal disaster plan exists, templates and guidance are provided to assist development.

### FEMA-Compliant Procurement Support

Guidance on pre-positioned contracts and procurement standards that FEMA expects before disaster declaration.

## Post-Loss Services Provided:

Should your district experience a loss, The Justice Claims Group can provide:

- Full FEMA Public Assistance claim lifecycle management.
- Complete insurance claim documentation and negotiation.
- Coordination between carrier, FEMA, contractors, and district leadership.
- Strategic recovery oversight focused on maximizing eligible funding.

## Why Districts Engage Early

The most successful recoveries begin before disaster strikes. Districts that engage in structured pre-loss planning consistently reduce delays, improve reimbursement outcomes, and maintain stronger financial control.

The Justice Protection Program allows your district to prepare without financial commitment, while securing experienced disaster recovery support if it is ever needed.
