

New ConstructionFacilities - Objectives

It is the board philosophy that children are the heart of a school. A facility expansion program must be conceived in such a framework if it is to implement rather than impede the functioning of a good school program. The board's goal is to provide an optimum educational setting for the children and adults of the Arlington Public School District consistent with the taxpayer's ability to support such a program.

Date of Adoption: February 10, 2014 and March 10, 2014
