

Document Status: Draft Update

SECTION 6 - INSTRUCTION

6:180 Extended Instructional Programs

CCSD 89 may conduct extended instructional programs each year for grades kindergarten through eight or choose to participate in an extended instructional program coordinated by another entity in the community. Its purpose is to provide additional opportunities for pupils to receive instruction and participate in enrichment activities.

Approval by the Board of the program and calendar shall be required annually. If CCSD 89 is directly coordinating the program, the Board shall also need to approve a budget that shall serve as a guideline for committing teachers to contracts and enrolling students. Regardless of the options of the calendar, there will be no summer school on legal holidays.

A teacher of any extended instructional program will be placed on a special payroll rather than receive payment directly from students/parents.
