**Background Information:**

Board Policy CV requires the Board to approve the delivery method for construction projects. Usually, the District uses the same delivery method for similar construction project types. As a result, the District recommends that the Board pre-approve construction methods for certain project types to expedite the process.

If the District recommends a construction method other than the one pre-approved for a project type, the recommendation will be brought to the Board for approval.

Administration makes this recommendation annually. This pre-approval will remain applicable through September 2027.
