RE: MMK FOREST MANAGEMENT (DANGER TREE MARKING)

Dear Mr. Mallery,

Per your direction, on Monday, September 9, 2026, I re-marked the danger trees originally identified on January 20, 2025, along with additional trees that, in my opinion, now meet danger tree criteria. In total, 71 trees on MMK School property were marked with red paint on two sides (see attached location map).

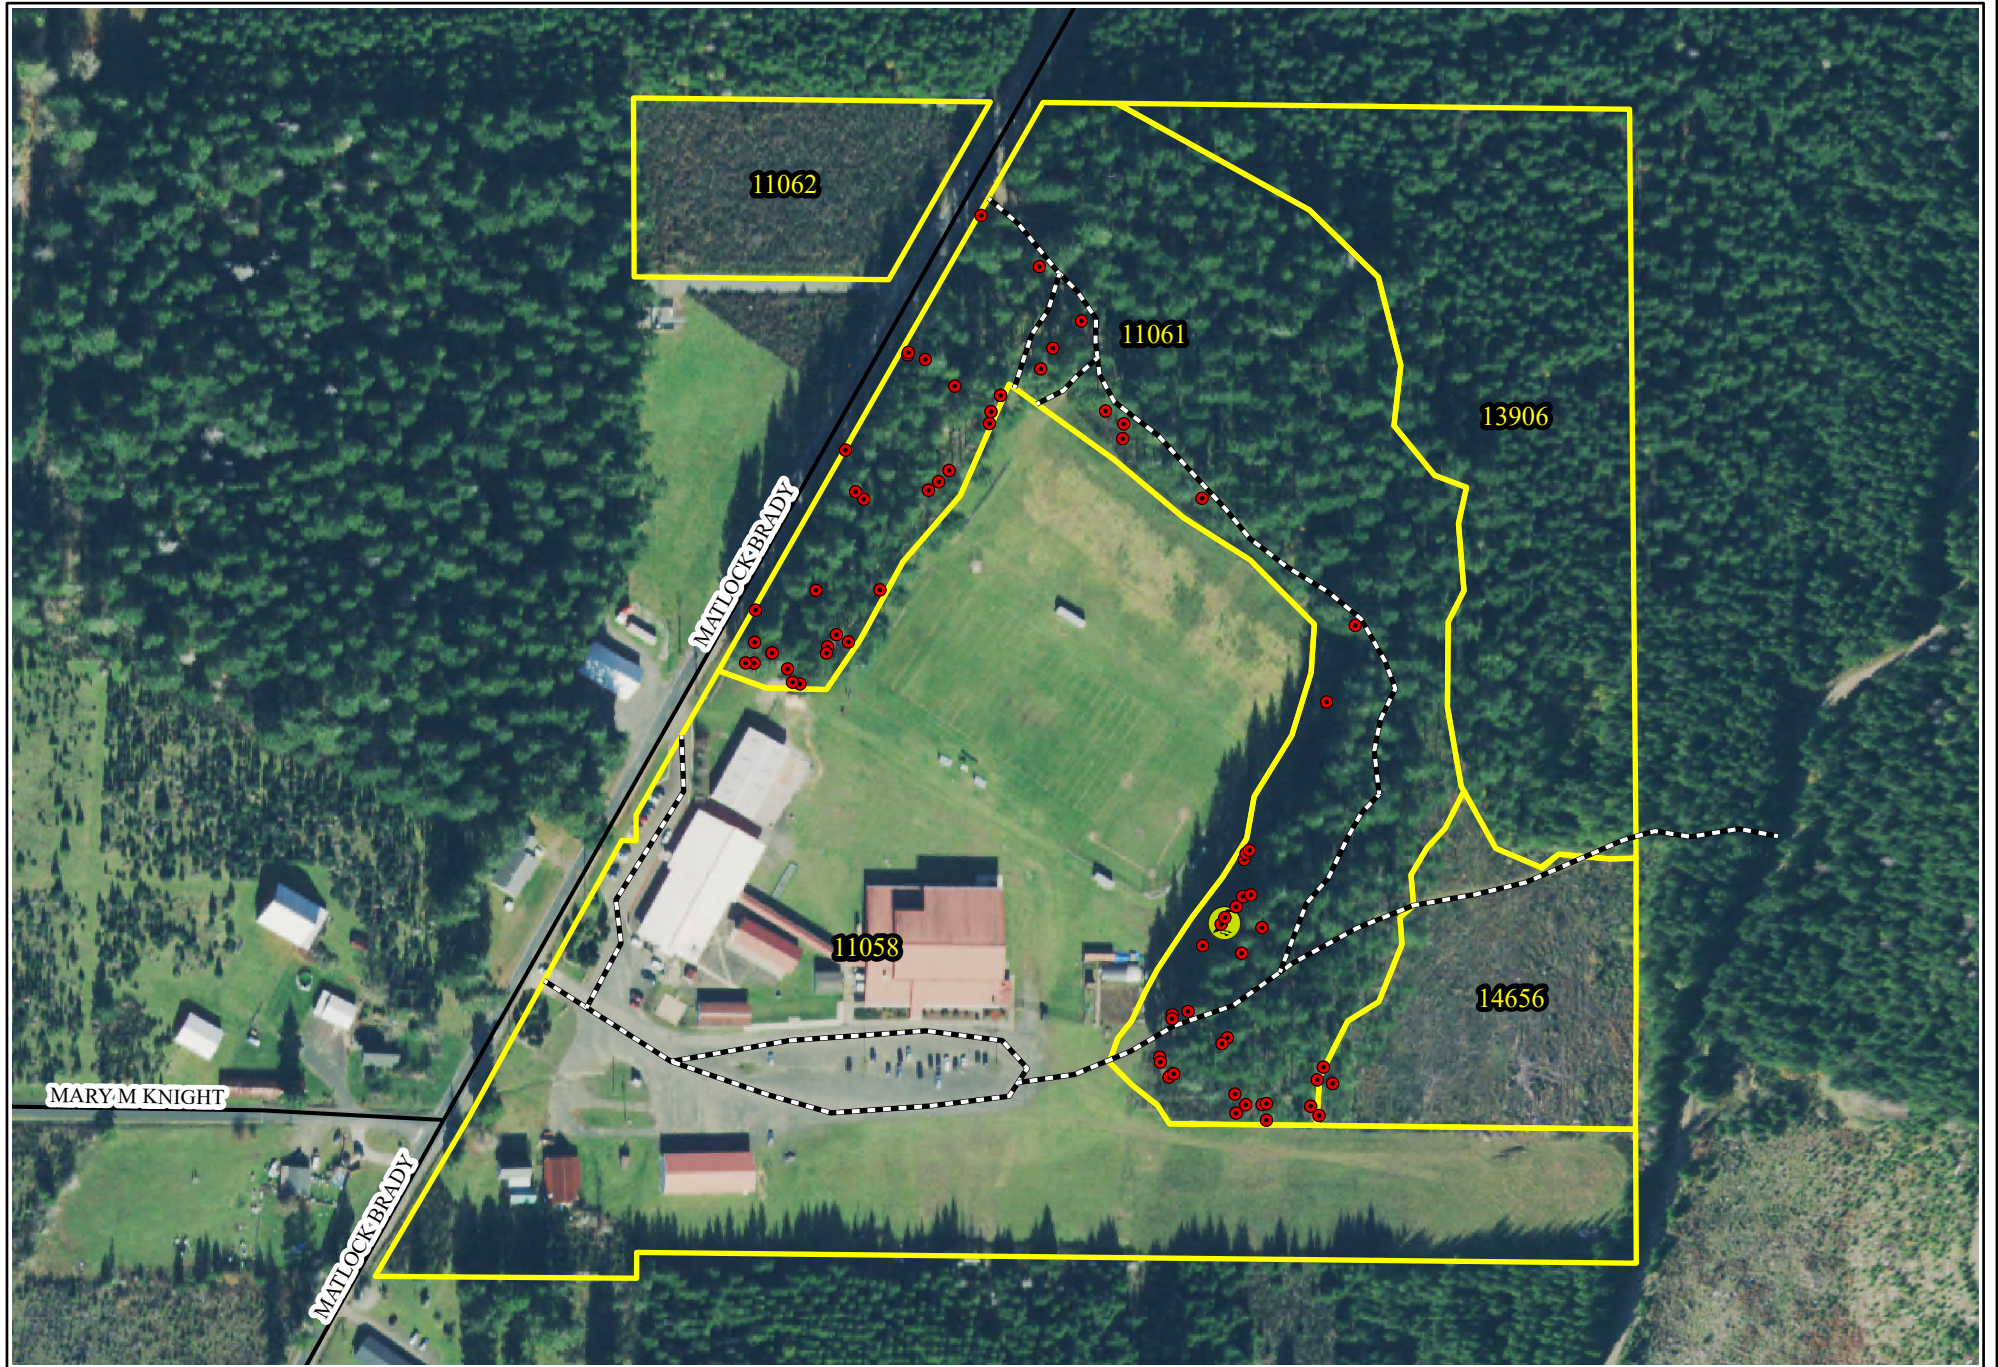

Based on visual observations, these trees exhibit characteristics associated with structural weakness — such as visible defects, leaning, scarring, significant crown loss, or mortality — and are located near structures or populated areas. Please note that potential windthrow was outside the scope of this assessment.

I recommend scheduling these marked trees for removal. Depending on the timeline, additional trees may decline in health and meet these criteria, so a re-review at the time of removal may be warranted.

Please contact me should you have any questions.

Best,

Jim Frost, ACF, SAF # 43268
