Re: Student Representative Report September 2026

Forums

As of this year, Daniel Wright has implemented 20-minute lunch periods to add an additional minute to passing periods. Many students had suggestions and questions, so Mrs. Groncki and Ms. Barba held a student forum on September 4th. Students were given the option to stay after lunch or during FLEX and were asked to provide potential ways to keep things efficient without changing the schedule. Students provided insight on both passing periods as well as lunch. This proved to be successful, with many kids attending to share their insights and solutions to improve the newly revised system. Since then, we have added an extra register, as well as food being prepacked to keep lines moving efficiently. Amenities in the cafeteria (utensil and condiment stations) have also been relocated to mitigate any congestion at the front of the cafeteria. Students are now able to drop their lunches off at the cafeteria steps so as to save time in between CAPE, FLEX, and lunch. In order to maximize passing period time, students are now able to pass through the gyms when traveling to their classes.

Clubs, ASAs, Sports:

A variety of Clubs, ASAs, and Sports have started. The Science Olympiad had tryouts in early September, and so did the Science Bowl. Soccer tryouts also took place from August 25-August 27, with 18 students making the team for both the girls' and boys' teams. There have been many new clubs such as Dungeons and Dragons, Rock Climbing, and Trading Cards. Many people have proposed new club ideas for Daniel Wright, with one being Business, Leadership, and Investing. Students are very excited to be able to start a club that finds a niche that has not been discovered yet.
