

Dear Lucas Francois,

Thank you for your continued partnership with Gateway Technical College's Transcribed Credit program. We are proud to share with you the results of your faculty and leadership teams' efforts to keep college affordable and build upon every student's academic and career plan.

Transcribed Credit allows high school students to earn both high school and Gateway credit at the same time. Gateway's courses are taught by your high school faculty at your high school, using the same Gateway materials and curriculum that they would find on our campuses. Your high school teachers work with Gateway faculty mentors to ensure your students are meeting the same competencies and achieving academic success as the adult students on campus.

Your high school students are given the option to register for the Gateway credit (and many of them choose to do so). This process is facilitated by your teachers with support from Gateway's High School Partnerships department. Together this partnership has provided access to college for thousands of youth throughout our tri-county district.

I would also like to thank your teachers for all the extra effort they provided for students and their families in the 2025-2026 school year.

- Andrew Creswell
- Carrie Rydzewski
- Chad Coleman
- Dena Brecht
- Jennifer Minikowski
- Jennifer Serkowski
- Kyle Rader
- Michael Wicks
- Taylor Juran

Thanks to these teachers' dedication and expertise, Waterford Union High School had 666 student enrollments in Transcribed Credit courses earning Gateway credit and saving your students a total of \$368,978.76.

Congratulations and thank you for your continued partnership.

Sincerely,
