Proposal to Resurface 2 Tennis courts at Bellville Independent School District

We have inspected the project and recommend as follows:

1. We will remove all areas where the paint is bubbling up.
2. We will open cracks.
3. We will pressure wash 2 tennis courts.
4. We will flood courts to mark low spots holding water (birdbaths).
5. We will patch all cracks, low spots, and places where the bubbles were removed with a mixture of court patch binder, sand, and Portland cement.
6. We will sand down all patched areas with smooth grinding wheels.
7. We will apply (1) coat of black acrylic resurfacing paint by California products to refill in the small hairline cracks and small pores, giving the surface a more playing grip and making it much longer on tennis courts.
8. We will apply (2) coats of color red and green.
9. We will paint playing lines.
10. We will paint net posts to a new look finish.
11. We will re-install your nets.
12. We will clean the site at 100%.

We will perform the following for the amount of twenty-five thousand nine hundred and sixty-seven dollars ($25,967).

Note: Structural cracks are exempt from warranty, and they may reflect through the new surface as a hairline cracks within 24 to 36 hours of completion. That is why we only warrant 3 years on the paint and not on the cracks.

Thank you for choosing AAA Court Services. If you have any questions or concerns please call us anytime or contact us via email at aaacourtservices@ yahoo.com.
