Re: 2027 Summer School Proposal

Below is a proposal for Summer School 2026 at Jefferson High School. (I have previously shared Summer School 2026 data with Dr. Reckard and Mr. Cloum.)

Proposal below suggests not offering biology or English 10 through JHS due to the low numbers and success rate over the last few years. These can be offered through Edmentum.

Current offerings proposed as all online for SS 2027:

US Govt- All online offerings, taught by JHS instructor.

Econ- All online offerings, taught by JHS instructor.

US History- All online offerings of one section of US Hist 1 and one section of US Hist II, taught by JHS instructor.

Health- All online offerings, taught by JHS instructor.

Personal Finance Online- This would give incoming freshmen another (2) summer school course opportunity since we will not offer PE. It is a one semester course and required for graduation. Not license specific course.

Edmentum- Propose continuing to offer Edmentum courses for those courses we do not offer online, through JHS summer school, for credit recovery and special situations.

Current offerings proposed as in-person for SS 2027:

Alg I-1 and 1-2- All in-person classes. These are all students who have failed Alg during the school year and are trying to regain credit.

Geometry- All in-person classes. These are all students who have failed Geometry during the school year and are trying to regain credit.

English 9-1 and 9-2- All in-person classes. These are all students who have failed English during the school year and are trying to regain credit.
