l. New Business

2. Board Correspondence.

Information: BB 9012 Communications to and from Board addresses received email communications as public records. This Bylaw provides guidance, but not explicit answers regarding how/when email communication is shared with the public. As per board's request, Superintendent reached out to AASB's Katie Oliver for her perspective and to legal counsel.

For the board to consider:

- There is caution around re-dacting information. Who determines when/what information would be redacted from emails? This could be perceived as a 'personal' choice and one for further scrutiny.
- In the perspective of some experts, board's typical practice should not include emails in the board packet as they often address personnel concerns, which should be discussed in executive sessions, not regular board meetings. The board president or Supt. should respond to the sender to confirm receipt.
- Cordova's BB 9012 has an additional paragraph, as compared to other districts and model policy, that was added in Dec. 2025. As we discuss email communications and board packets, does this paragraph align with the practice our board deems most appropriate?

Discussion:
