k. Information Items:

For reference only.

1. Award from the Board to Sierra Westing 2026 ASAA Division III Girls Cross Country State Championship race.
2. SERRC Alaska's Educational Resource Center / Critical Infrastructure Protection (CIP) RFP for Cordova Jr./Sr. High School Building.

Background Information: As part of our CIP MOA with SERRC, they are prepared to publicly advertise a Request For Proposal through ADN and Plan Rooms. The RFP establishes an initial three-year term, with an option for an additional two years at the District's discretion. It covers facility assessments, planning, design, and construction administration for projects of varying size. Once a firm is selected and the agreement is in place, individual assignments would be authorized through written task orders establishing the scope, fee, schedule, and deliverables. Selecting a firm does not commit the District to a particular construction project or minimum amount of work. This RFP has no financial commitment.
Proposals will be received through Nov. 30th with a selection deadline of Dec. 3rd. Following acceptance of the award by the selected firm, work then begins on the expectations of the conditions assessment. A planning meeting with myself, Chris Moreno, SERRC (David Landis) and City representatives (Sam and Malvin) on Nov. 18th.
