Intervention Strategies

- After each exam, our teachers review the results to see which TEKS students have mastered and where they need more support.
- We use that information to assign practice based on each student's performance, so students spend time working on the specific skills they struggled with.
- We use IXL across all subjects and Renaissance to support reading.
- The same data also helps us identify students who would benefit from tutoring and gives teachers a clear starting point for what to reteach.
- Our goal is to close those learning gaps before they carry over into the next unit.
