SUBJECT:	Consideration and possible approval of the Campus Improvement Plans, Local Improvement Plans, and Comprehensive Support and Improvement Plans for the 2026-2027 school year.
BACKGROUND:	Campus Site-Based Decision-Making Committees and campus leadership teams conducted comprehensive reviews of student achievement, attendance, accountability data, and other performance indicators to identify needs and establish priorities for continuous improvement. In accordance with state and federal accountability requirements, campuses developed Campus Improvement Plans, Local Improvement Plans, and, where required, Comprehensive Support and Improvement (CSI) Plans to address identified performance concerns and support student success. These plans align with the District Strategic Plan and District Improvement Plan and establish student achievement goals, campus systems goals, and targeted evidence-based strategies for implementation during the 2026-2027 school year.
FINANCIAL IMPLICATIONS:	Budgeted items are identified within the campus plans and are allocated within the approved budget for the 2026-2027 school year.
RECOMMENDATION:	We recommend approval of the Campus Improvement Plans, Local Improvement Plans, and Comprehensive Support and Improvement Plans for the 2026-2027 school year.
