CITIBOT

The Resident-First, AI-Powered Government
Communications Platform

Empowering
Government.
Serving
Residents.

Resident-First AI Platform

Built specifically for the government, Citibot blends enterprise-grade AI with human-centered design to ensure equity, trust, and accessibility. Residents receive verified, accurate information across every channel, supported by our closed-system AI that prioritizes compliance, privacy, and security.

-  **Multi-Channel Access:** 24/7, multilingual support across web, text, and social.
-  **ADA & Accessibility Compliance:** AI governance that supports ADA compliance and WCAG alignment.
-  **Reduce routine call volume** by 30–60% in 30 days.
-  **Accurate & Up-to-Date Content:** Ensure residents always receive accurate, reliable information.
-  **Integrations & Data Intelligence:** Fast, accurate answers from connected systems.

Real Results for Modern Government

Roseville, CA answered questions in **14 languages** in the **first two months**.

City & County of Denver, CO **saved \$500K** in the first **18 months**.

Saved 1 Month of staff time in the first 6 months.

Citibot helps governments modernize service delivery, reduce operational strain, and improve resident satisfaction — all while maintaining compliance, accessibility, and security.

- Save 1 month of staff time per year
- Increase resident services without adding staff
- Support 70+ languages automatically
- Ensure accurate, ADA-compliant website content
- Increase resident trust with faster response times

AI Assistant for Government

Provide residents with instant answers and 24/7 support via a multi-channel AI Assistant.

Build Trust Through High-Quality Digital Experiences

24/7 Availability

Provides residents with instant support — day or night.

Service Requests

Allows residents to submit service requests directly for faster follow-up.

Automated Answers

Automatically responds to commonly asked questions using your approved website content.

Multi-Channel

Meet residents on their preferred platform — with one cohesive experience.

Multilingual

Support 70+ languages with AI that recognizes and responds in each user's native language.

Save Resources

Reduces call volume and repetitive tasks so staff can focus on higher-priority work.

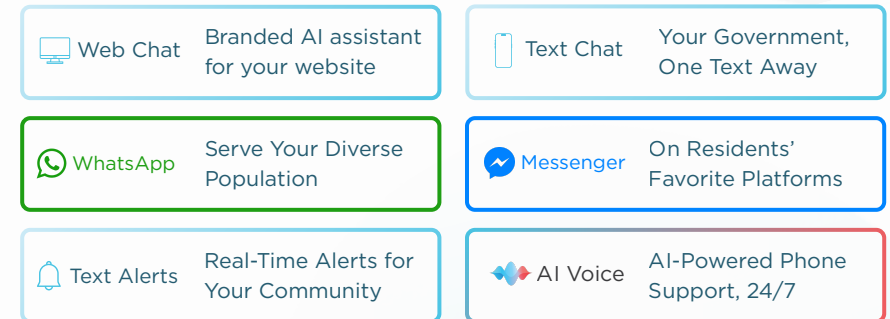

Our platform unifies your website content and trusted data sources into one reliable AI experience.

How it Works

Our AI-powered platform can be set up for either residents or internal staff. Residents can easily submit questions or requests, while internal staff efficiently locate and manage information.

Available on your Residents Preferred Channel

Answer resident questions using trusted sources like document repositories, websites, and municipal records. Manage service requests and work orders through seamless integrations with existing municipal systems.

Refresh leverages the data captured across interactions to retrain and optimize municipal websites, keeping your knowledge base up-to-date and relevant.

AI Voice

Set a New Standard for Resident Phone Experiences.
Easily add best-in-class AI Voice Agents into your agency's phone system.

Trusted by

How AI Voice works

Answers calls 24/7 with **natural, human-like voices**—including localized accents.

Supports the most commonly spoken languages in your community for inclusive service.

Enables **instant answers, service requests,** and **smart routing** to the right department.

Sends **automatic text follow-ups** with call details and helpful resources.

Refresh

Refresh Your Website in Hours — Not Months

Keep your content accurate, accessible, and aligned, without overwhelming your team.

What Refresh Evaluates

Accuracy

AI scans every page to ensure content is correct, consistent, and free of duplication — so residents always get reliable information.

Current

Flags pages that haven't been updated recently, prompting staff to refresh content and guarantee human oversight where it's needed most.

Persona

Refresh makes your web content speak with one consistent voice across your website.

Accessibility

Flags common accessibility issues (e.g., missing alt text) and helps support ADA compliance and WCAG 2.1 alignment.

How Refresh works

Scan - Identifies web and PDF issues across accuracy, outdated content, tone, accessibility, and clarity.

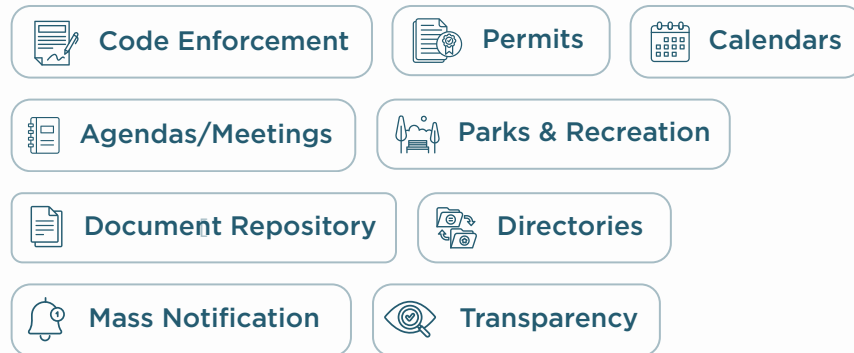

Recommend - Provides clear, specific updates so teams know exactly what to change.

Explain Why - Outlines why each change matters — so you always understand how it improves trust, clarity, and accessibility.

Deep Integrations & Data Intelligence

Citibot doesn't only use web and PDF content to build its chat knowledge base for external and internal chatbots. We unify data from existing systems and platforms that cities use every day. This fusion of verified data sources produces cohesive, context-aware answers - simplifying resident experiences and enabling governments to deliver faster, more informed answers to questions.

Fully Managed. Fully Branded.

Citibot manages everything from implementation to launch, making it easy for your team to get started. We deliver custom branding, seamless integration, and hands-on support—ensuring your AI assistant reflects your community while meeting the highest standards for accessibility, security, and performance.

Insights & Reporting

Citibot overlays sentiment, topic, and time critical information, in real-time, to inform the city on what residents are really asking.

Know the critical data points to serve your community better

- Total Interactions with Chat History
- Top Resident Inquiry Topics
- Average Sentiment by Topic
- Response & Engagement Rate
- Keyword Performance Tracking

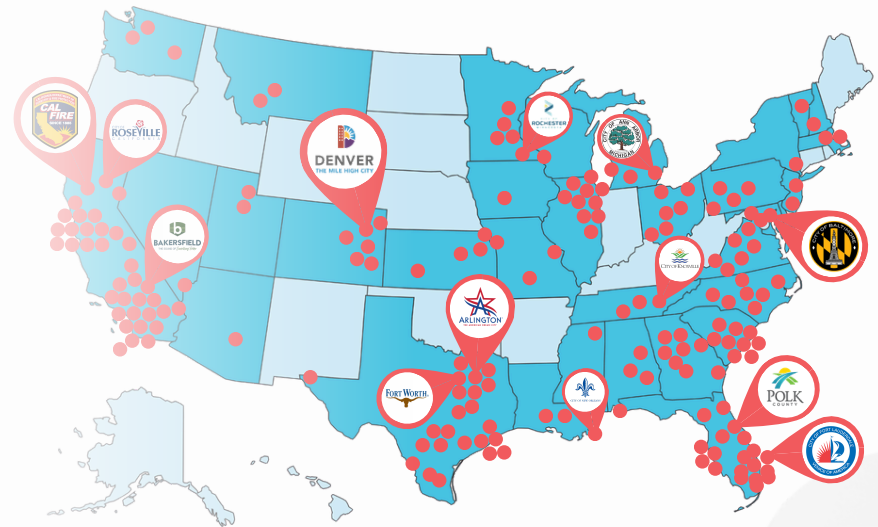

ABOUT CITIBOT

WHO WE ARE

Founded by Bratton Riley—whose passion for civic innovation was inspired by his father’s 40 years as Mayor of Charleston—Citibot was built on a simple belief: local government should be accessible, responsive, and give everyone a voice.

We help governments deliver accessible, unified digital experiences that make it easier for residents to get answers and engage with their community — **because better digital experiences build stronger trust with your residents.**

Powering AI-Driven Service for 200+ Governments Across the U.S.

WHO WE SERVE

- 
Local Government
- 
311's & Call-Centers
- 
Government Agencies

Citibot has been empowering municipalities for the past decade, but our reach extends far beyond cities and counties. We serve a wide variety of government agencies—from appraisal districts to mosquito control, public safety departments, and specialty service authorities. No matter your role, if you’re helping residents, we’re here to help you.
