

**COMMUNITY USE OF SCHOOL FACILITIES**

The public investment in school plants and sites and the general community welfare justify the use of school buildings and grounds by local citizen groups for cultural, educational, civic and recreational purposes outside of school hours when such use will not conflict with or negatively impact the school program.

The Nye County School District encourages as full and extensive use of its facilities as possible for the welfare of the community, provided that such use will not impair the ability of the district to utilize its resources to the maximum in providing educational opportunities for the students of the district.

The Superintendent/**Designee** will develop a regulation to implement this policy, including a fee schedule.

Rental/lease fees (Policy 3330) and any fees collected for temporary use of school facilities under this policy will be deposited into the Buildings and Sites Fund and will be used for general upkeep of such facilities.
