MARCH MADNESS....

The month of March is full of benchmarks, State Assessments, Field Trips and Student Performance Incentives....and of course SPRING BREAK! Our teachers and students continue to work diligently toward meeting our established goals for accountability, attendance, and i-Ready performance. While we recognize there are areas where we are still striving to improve, the level of effort and commitment across our campus remains strong. We are currently refining our intervention structures and strengthening targeted support systems to better address student needs and close the gap between our current performance and our goals. We are confident that with continued focus and intentional action, we will see meaningful growth in the months ahead.
