POLICY IMPLEMENTATION

The Superintendent has responsibility for carrying out, through administrative regulations, the policies established by the Board.

The policies developed by the Board and the Administrative Regulations developed to implement policy are designed to promote an effective and efficient school system. It is necessary that all district employees and students carry them out.

There are many activities that are common to all schools, but procedures for conducting them may vary from school to school. School principals will establish procedures for conducting activities within their individual schools within the larger framework of Administrative Regulations and Board policies.

In the absence of Board policy relating to a specific situation, the Superintendent/**Designee** will use his/her best judgment in arriving at a decision, employing legal counsel and other resources when needed. The decision will be made on the best judgment of what the policy would be if it existed, based on the spirit and tenor of other existing policy. The Superintendent/**Designee** will recommend to the Board whether a policy should be written to cover similar incidents.
