**Online Learning**  
**Policy Series: 4000 Curriculum, Instruction, and Assessment**

**Policy No. 4050**

**Purpose**

The Provo City School District recognizes that online learning provides unique opportunities for students to access rigorous curriculum, recover credits, and pursue flexible learning pathways. The Provo City School District Board of Education believes that a variety of learning options, including online courses and programs, are critical for 21st century learners. The board recognizes that the online learning environment provides students with unique opportunities to become self-disciplined learners with life-long learning skills. The board believes that online learning provides tremendous opportunities for students to access curriculum and specialized courses in a flexible learning environment that might not otherwise be available. Online course curricula must be rigorous and demonstrate subject-specific alignment with Utah State Core Standards.

Therefore, the board supports a wide range of online learning opportunities that are equally accessible to all students enrolled in the school district. The board directs the superintendent to provide information to parents, students and staff regarding online learning options and the guidelines for participation.

The board believes that The superintendent will develop procedures to implement this policy. The procedures will include, but not be limited to, a description of all online opportunities and options available to students. ~~The Superintendent shall report to the Board of Education how the state standards are being met and~~ third party providers must meet all state requirements and mandates, how third party providers will be monitored for both district and state compliance and how the overall district online program successes and challenges will be presented to the board on an annual basis. ~~of these online options.~~

**Information and Notices**

41  
42 Information about online courses and programs available through the Statewide Online  
43 Education Program (SOEP) shall be provided in school registration materials, posted on the  
44 District's website, and posted on school websites. Information in registration materials shall be  
45 provided concurrent with the high school registration period for the upcoming school year.  
46

#### 47 **Inclusion in Daily Membership**

48  
49 The online course credit hours of students enrolled in online courses whose primary enrollment  
50 is in a District school are included in calculating District daily enrollment except to the extent that  
51 doing so would result in the student being counted as more than one FTE. (This restriction does  
52 not apply if the student intends to complete high school graduation requirements early and exit  
53 high school early in accordance with the student's plan for college and career readiness.)  
54

#### 55 **Students Eligible for Fee Waiver**

56  
57 If an enrolled student is eligible for fee waiver, District schools shall provide the student access  
58 to an online course by either allowing the student access to necessary technology to participate  
59 in the online course in a computer lab or other space within the school building during a school  
60 period or during the regular school day or by providing the student with the technology and wi-fi  
61 needed to participate in the online course outside of the school building.
