Summer School Report - 2026

At the start of May, DHS administrators and counselors identified students that would benefit from credit recovery courses during a summer school session. With available space, additional students were included to keep them on pace with their grade level peers. With a larger than normal enrollment, we were able to run two classroom spaces, and 149 courses ultimately were completed by students.

- Total number of students enrolled: 61
- Courses Completed: 149
 - 54 students completed at least one course
 - 38 students completed their assigned courses before the end of the summer school session

We have a feeling of accomplishment with several freshmen that were in danger of being credit deficient ultimately return to “on track” status to begin their sophomore year.
