

GRADING AND GRADE ADJUSTMENT

It is expected that all teachers will teach their students using benchmarks to guide instruction, Nevada Academic Content Standards as stated in District standard-based curriculum guides and the course of study. Grades will be based on student performance towards mastery of the designated benchmarks and standards.

The Board of Trustees shall not change the grade given to a pupil by a teacher unless the school district has not established and followed a procedure that allows the teacher an opportunity to substantiate the grade that was given.
