BLUE BIRD

January 8, 2026
Dealer Memo 26-01

To: Blue Bird Dealers
From: Sumanth Balesh, Director of Product Certification and Compliance
Subject: **Blue Bird Policy on School Bus Seating Alteration**

Blue Bird Body Company certifies all new buses sold in the United States and Canada are compliant with all applicable FMVSS and CMVSS regulations in effect at the time of build through rigorous engineering, testing and development. FMVSS Code of Federal Regulations, 49 CFR 571.222 and CMVSS 222 222 (School Bus Passenger Seating and Crash Protection) and 49 CFR § 571.210 and CMVSS 210 (Seat Belt Assembly Anchorages) apply to the final stage vehicle manufacturer and those who may alter a vehicle, including any vehicle repair businesses. Modifications that render a safety feature “inoperable” are prohibited by Section 30122 of the United States Motor Vehicle Safety Act.

Because our certifications rely on new product and OEM assembly processes, we do not and are unable to sanction or certify compliance of any aftermarket installations or modifications made to the bus that changes the original seating configuration other than to designated convertible seats done per the Blue Bird and seat manufacturer instructions. Those who perform these modifications are solely responsible, and should conduct their own evaluations to ensure compliance with all Federal Motor Vehicle Safety Regulations.

In summary, Blue Bird does not recommend or affirm the effectiveness of any alteration made after delivery to the seats installed in our buses or seating configurations. Furthermore, no Blue Bird-manufactured seat, Blue Bird-installed IMMI seat or C.E. White (CEW) non-convertible seat may be altered or replaced by a different type of seat, belts added, or relocated from its position as certified in the original floor plan.

Sumanth Balesh

Director of Product Certification & Compliance

eff. September 1, 2019.

Sec. 547.618. EQUIPMENT REQUIRED FOR CERTAIN AUTOMATED MOTOR VEHICLES. (a) In this section, "automated motor vehicle" and "automated driving system" have the meanings assigned by Section 545.451.

(b) An automated motor vehicle that is designed to be operated exclusively by the automated driving system for all trips is not subject to motor vehicle equipment laws or regulations of this state that:

- (1) relate to or support motor vehicle operation by a human driver; and
- (2) are not relevant for an automated driving system.

(c) If a vehicle safety inspection is required under this code for the operation of a vehicle described by Subsection (b), the vehicle shall automatically be considered to pass the inspection with respect to any equipment:

- (1) the requirements from which the vehicle is exempt under Subsection (b); or
- (2) the inspection of which is not required under Section 548.051.

Added by Acts 2021, 87th Leg., R.S., Ch. 892 (H.B. 3026), Sec. 3, eff. September 1, 2021.

SUBCHAPTER L. ADDITIONAL EQUIPMENT REQUIREMENTS FOR SCHOOL BUSES,
AUTHORIZED EMERGENCY VEHICLES, AND SLOW-MOVING VEHICLES

For expiration of Subsections (f), (g), and (g-1), see Subsection (g-1).

Sec. 547.701. ADDITIONAL EQUIPMENT REQUIREMENTS FOR SCHOOL BUSES AND OTHER BUSES USED TO TRANSPORT SCHOOLCHILDREN. (a) A school bus shall be equipped with:

- (1) a convex mirror or other device that reflects to the school bus operator a clear view of the area immediately in front of the vehicle that would otherwise be hidden from view; and
- (2) signal lamps that:
 - (A) are mounted as high and as widely spaced

laterally as practicable;

(B) display four alternately flashing red lights, two located on the front at the same level and two located on the rear at the same level; and

(C) emit a light visible at a distance of 500 feet in normal sunlight.

(b) A school bus may be equipped with:

(1) rooftop warning lamps:

(A) that conform to and are placed on the bus in accordance with specifications adopted under Section 34.002, Education Code; and

(B) that are operated under rules adopted by the school district; and

(2) movable stop arms:

(A) that conform to regulations adopted under Section 34.002, Education Code; and

(B) that may be operated only when the bus is stopped to load or unload students.

(c) When a school bus is being stopped or is stopped on a highway to permit students to board or exit the bus, the operator of the bus shall activate all flashing warning signal lights and other equipment on the bus designed to warn other drivers that the bus is stopping to load or unload children.

(c-1) A person may not operate a light or other equipment described by Subsection (c) except when a school bus is being stopped or is stopped on a highway to:

(1) permit a student to board or exit the bus; or

(2) distribute to a student or the parent or guardian of a student:

(A) food; or

(B) technological equipment for use by the student for educational purposes.

(d) The exterior of a school bus may not bear advertising or another paid announcement directed at the public if the advertising or announcement distracts from the effectiveness of required safety warning equipment. The department shall adopt rules to implement this subsection. A school bus that violates this section or rules

adopted under this section shall be placed out of service until it complies.

(e) In this subsection, "bus" includes a school bus, school activity bus, multifunction school activity bus, or school-chartered bus. Except as otherwise provided by this subsection, a bus operated by or contracted for use by a school district for the transportation of schoolchildren shall be equipped with a three-point seat belt for each passenger, including the operator. This subsection does not apply to:

(1) a bus operated by or contracted for use by a school district if the board of trustees for the school district determines that the district's budget does not permit the district to purchase a bus that is equipped with the seat belts required by this subsection; or

(2) a bus for which the warranty would become void if the bus were equipped to comply with this subsection.

(f) Not later than the end of the 2025-2026 school year, the board of trustees of a school district that makes a determination under Subsection (e)(1) shall submit to the Texas Education Agency and present in a public meeting of the board a report that includes:

(1) the number of buses operated by or contracted for use by the district that:

(A) are not equipped with seat belts;

(B) are equipped with two-point seat belts; and

(C) are equipped with three-point seat belts; and

(2) the estimated cost to the district to equip with three-point seat belts each bus operated by or contracted for use by the district that is not equipped with three-point seat belts as required by Subsection (e).

(g) Not later than January 1, 2027, the Texas Education Agency shall:

(1) collect the information submitted under Subsection (f);

(2) calculate the total amount of financial assistance needed for all school districts to come into full compliance with Subsection (e); and

(3) summarize and make available to the governor, the
