

Consideration for Approval of a Grant of Easement to the City of Temple for Drainage Improvements for the FM 93 Spur Project

The City of Temple will soon be making drainage improvements along FM 93 Spur. These improvements will run along the northern and eastern boundaries of the property the district purchased in 2023 for a future elementary school campus.

In order to construct the drainage improvements, the City is requesting that the district convey a 0.009-acre easement.

The attached Easement Agreement includes the legal description and map depicting the property to be conveyed.

The administration supports this important infrastructure improvement and recommends conveyance of the property for the easement, as requested by the City.

Recommendation: Approve the attached Easement Agreement for drainage improvements for the FM 93 Spur project.
