

## MINUTES

Members Present: DeEtta Moos, Kevin Gross, Christina Thayer Anderson, Chris Kampa, Chris Wilmot, and Dr. Nate Rudolph

- I. Curb Changes at CMS - We have an area that will require some curb work in the entrance of CMS. The area will be cut back for better traffic flow.
- II. Radiant Heat Panels at CPIS - We will be replacing the last 4 radiant heat panels by door #1. These are starting to leak and need to be updated.
- III. District Roof Repairs - We will be inspecting and repairing various leaking roof drains at several buildings throughout the district.
- IV. IIS Cafeteria Heat - We have a return line to our heat loop under the floor in the lunchroom at IIS. We are currently working on a solution to resolve a long-standing issue that will not involve tearing up the cafeteria floor.
- V. Facility Use Rental Rate Review - The Committee reviewed proposed updates to the district's facility use rates, which were last approved for 2022–2025. The updated structure is intended to simplify rental classifications, better align rates with regional comparisons and current staffing costs, and maintain accessible use for local youth, school, and community partners. New rates and structure will be proposed in the July Board meeting.
