EVALUATION OF SUPERINTENDENT

Evaluation is a valuable tool in establishing and carrying out the goals of any institution. Although the evaluation of the Superintendent has several purposes, the ultimate objective is to ensure educational excellence through effective governance and management of the school system.

The successful operation of the school district is achieved with an effective working relationship between the Board and the Superintendent. The development and maintenance of such a relationship may be assisted by an annual review of the role and responsibilities of the Superintendent, accompanied by the appraisal of his/her performance.
