ENVIRONMENTAL AND SAFETY PROGRAM

Every possible precaution will be taken to protect the safety of all students, employees, visitors, and others present on District property or at school-sponsored events.

The practice of safety also will be considered an integral part of the instructional program through fire prevention, emergency procedures and drills, driver education, and traffic and pedestrian safety.

Each principal will be responsible for the supervision of a safety program for his/her school. The District Safety Coordinator will have overall responsibility for the district's safety program.

General areas of emphasis in the safety program will include, but not be limited to, in-service training, plant inspection, fire prevention, accident record keeping, driver and vehicle safety programs, emergency procedures and drills, and traffic safety problems relevant to students, employees and the community.

The Board will endeavor to provide schools that are safe from hazards, sanitary, properly equipped, lighted, and ventilated; and esthetically suited to promoting the goals of the schools.

The site administrator of each school will (a) be responsible for the care and maintenance of the buildings and grounds, and (b) supervise the custodial staff of the school in maintaining an adequate program for such care and maintenance.
