

StudentsAsthma, Anaphylaxis, and Allergic Reaction Protocol

The District will adopt and implement the Emergency Response to Life-Threatening Asthma or Systemic Allergic Reactions (Anaphylaxis Protocol as required by the Nebraska Department of Education.

The Superintendent, in conjunction with licensed health personnel, shall establish administrative regulations for the implementation of this policy. The regulations established shall comply with NDE rules regarding the protocol to follow in case of a life-threatening asthma or systemic allergic reaction (including anaphylaxis) and use of an EpiPen and albuterol. These regulations and protocols shall also ensure that each school building will procure and maintain the equipment and medication necessary under the protocol in the case of any student or school staff emergency. Staff training in using the protocol shall occur periodically. Records of such training and occurrences of administering medication under the protocol shall be maintained.

The Emergency Protocol shall be implemented, and the equipment and medication necessary to implement the Emergency Protocol shall be maintained, at each school building while school is in session. For purposes of the Emergency Protocol, the phrase "while school is in session" is defined as the core instructional school day. The "core instructional school day" is defined as that portion of each day school is in session during which teachers are on duty to provide and students are scheduled to receive instruction in the School District's curriculum, generally beginning at 8:00 a.m. and ending at 3:30 p.m. The Emergency Protocol shall not be required to be implemented other than in the school buildings while school is in session, and as such is not required to be implemented at extracurricular activities, on school buses, or during school field trips. Implementation of the Emergency Protocol at such non-mandatory times or places shall be made in the discretion of the administration and shall be subject to the availability of the employees designated or trained in implementation of the Emergency Protocol and the availability of the necessary equipment and medication at such times or places.

The parent or guardian of a student of minority age may sign a waiver requesting that their student not receive emergency treatment under this protocol.

The Superintendent or designee shall further develop and implement protocols to address anaphylaxis and the emergency use of epinephrine at school buildings and school-sponsored activities. A school nurse or trained staff member may administer epinephrine to any individual believed to be experiencing anaphylaxis. These protocols will also address the District's response, documentation, notification, and reporting any instances of administering epinephrine. The District will continue to implement individualized health or Section 504 plans for students with known severe allergies, and nothing in this policy limits rights or accommodations under Section 504, the ADA, or the IDEA.
