

## **D2 Technology Department Board Report - March 2026**

### **Technology Director, Paul Ciszek**

- IAR testing is underway and running smoothly
- Online registration for all grade levels opens April , 2026
- We have begun our kickoff processes for our Skyward SMS to Qmlativ migration with go-live dates for the student management system being August 5, 2027 and the finance system being October 5, 2027. Since RB will have its systems migrated a full year in advance, we expect to be well prepared for the change at Nippersink SD2.
- We have completed our annual IT inventory audit and we are working though our FY27 technology budget and necessary replacement cycle items.
- After seven years of service, we say farewell to our shared services support technician, Norman Vitellaro. He has accepted a job with McHenry HSD 156. We wish him well as we work to fill the position. We have found a new candidate for this vacancy, but are awaiting the completion of our administrative processes.
- We have kicked off a project to use Frontline to improve Staff onboarding and administrative workflows.
- We had some latency issues with our Illinois Century Network (ICN) internet connection during the month of February. With the help of our own Bob Sly, ICN was able to identify and mitigate the issues. Mr Sly did a good job in assisting our new provider, ICN.
