NOTES

**Evergreen Technology Subscription.** SMART tag™ Evergreen Technology Subscription using Samsung Galaxy Tab Active tablets. Tablets will be used for four (4) years. Prior to the start of the fifth (5th) year all tablets will be sent back to SMART tag™ to be replaced with the newest version tablet available. This same four (4) year cycle with tablets being replaced with the newest version prior to the start of year five (5) will continue perpetually for as long as the school district desires to partner with SMART tag™. The Evergreen Technology Subscription is offered to assist school districts by providing a scheduled replacement plan for tablets. It is not a tablet maintenance or protection plan. If a tablet is in need of repair or service that cannot be performed or accomplished by SMART tag™ the school district will be responsible for all costs associated with the repair or replacement of the tablet. Broken screens are not covered by the Samsung warranty and are, therefore, not covered under the Evergreen program. Replacement screens must be paid for by the school district at a cost of \$300 per screen replacement. **NOTE: Tablet version dependent on device lifecycle. If a newer version tablet becomes available prior to or at the timing of delivery of tablets to the school district, changing to the newer version will increase the cost of the tablet. Amount of cost increase will be determined by Samsung's pricing of the newest version tablet. If upgrading to a newer version tablet requires upgrading of any or all of the mounting system, charging dock, or power harness, the cost for the hardware upgrade will be the responsibility of the school district.**

**Wi-Fi Required.** A private, non-shared SMART tag™ wi-fi network installed at the transportation building (per depot) where drivers will pick up their tablets and login is required for fast and efficient downloading of map updates and route information, student photos, etc. The SMART tag™ Driver App will be configured to automatically connect to the wi-fi network the school district provides.

**Warranties.** One (1) year manufacturer's warranty on all hardware except; six (6) month warranty on tablet computer battery, and no warranty on tablet screens. Should a tablet need repairing the customer will send the tablet to SMART tag™ for assessment that may require sending to Samsung. If the repair will take more than 3 weeks a loaner tablet will be made available at no cost. Three (3) year manufacturer's warranty on idp printers.

**Installation.** Installation cost is based on one (1) scheduled timeline to complete. If installation is not completed due to circumstances outside of our control (i.e., weather, bus availability, etc.), subsequent trip(s) to accomplish completion of the installation may be subject to additional trip charge(s), including travel and lodging.

**Invoicing Disclaimer.** The quantities quoted are based on information provided by the school district. SMART tag™ (Secured Mobility, LLC) will invoice according to actual final quantities installed/utilized during implementation. If any of the actual quantities are lower than quoted, the school district will be invoiced accordingly. If any of the actual quantities are higher than quoted due to the school district's directive, the school district will be notified of the overage amount from the originally approved quantity and provided with a quote of the additional expense to be charged. One of the following options would be required; a) a change order to the originally submitted PO that identifies and approves of the additional cost, or 2) a new PO would be required to approve the additional expense , or 3) payment in full for the additional expense via a credit card payment.

School District Representative

Pricing is valid for 90 days from the date of this quote on the goods and services named.

The **1st** and **Best** tablet solution for school bus drivers in pupil transportation  
... and the only one conceived by a school bus driver.

**Patent Protected**

As the first tablet solution for student safety and security on school buses, SMART tag™ has a portfolio of active patents including, but not limited to, the following:

- Wrong stop alerts / Wrong bus alerts / Guardian required alert / Auto tier transition

Our solutions help bring peace of mind to transportation staff, district administrators and their community (parents) with regards to student safety and security. If another provider is suggesting that their solution can provide such features, ask them how their system avoids SMART tag's patents and how they will protect you from any downtime if they are no longer able to support their system. US patents: 9977935, 10452878, 10636230, 10685521, 11170590, 11195360, 11915539, 12094280, 12223788, and 12249201
