

Regular Board of Directors Meeting
Monday, March 9, 2015 6:00 PM
Lower Platte North NRD Office
1616 County Road 17
Wahoo, NE 68066

1. Call to Order

NOTE: The agenda is on file at the LPNNRD office and may be changed up to 24 hours prior to the meeting as scheduled.

- 1.A. Meeting Notice

- 1.B. Inform Public on Location of Copy of “Open Meeting Act”

- 1.C. Pledge of Allegiance

2. Roll Call

- 2.A. Introductions

3. Approval of Agenda

4. Comments - Advisors/Guests

- 4.A. Guest Comments

- 4.B. NRCS Report

- 4.C. NARD Report

- 4.D. NRC Report

- 4.E. Managers Report

- 4.F. Education Program

5. Approval of Minutes

6. Report of Standing Committees

- 6.A. Executive Committee - Action as Required

6.A.1. MEETINGS

6.A.1.a. Pending

6.A.1.a.1. Nebraska Water and Water Law Conference

UNL will be hosting the High Plain Aquifer: Sustainability for Food Production and Water Supply Conference on Thursday, March 19th. The Nebraska Water Law Conference will be held Friday, March 20th. Draft agendas are attached to the Executive Committee Minuters. Registration for both days is \$290 and March 20th only is \$175. Please let Breunig know by March 3rd if you are interested in attending.

6.A.1.a.2. National Watershed Conference

The National Watershed Conference is May 17-20 in Ft. Worth Texas. This conference is held every two years and we have attended in the past.

6.A.1.a.3. Groundwater Foundation Annual Meeting

It has been over 10 years since the Groundwater Foundation Annual Meeting has been held in Nebraska. The October 20-22 conference is scheduled for Lincoln and they are looking for sponsors. Attached find information that was sent. The lowest level sponsor is \$500 although they will accept general support funds. Is this something we want to be a part of?

6.A.2. MANAGEMENT ITEMS

6.A.2.a. Directors Absence

Attached find Director McDermott's excuse of absence from the February Board Meeting.

6.A.2.b. Bob Weaver

6.A.2.b.1. Monthly Conference Call and Update

The monthly Weaver Conference Call was held March 6th.

6.A.2.b.2. Monthly Bill

6.A.2.c. Monthly Education Program

6.A.2.d. CCEI Lawsuit

Lausterer gave oral arguments on the CCEI case on February 10. The Brief can be viewed on line.

6.A.2.e. Recognition Ceremony

The Executive Committee has set the date for our Annual Recognition Picnic for June 7 (June 14 Rain date) to be held at Czechland Lake beginning at 5:00 p.m.. All directors, staff and former board members will be invited to attend along with our award recipients.

6.A.2.f. Report from Director Vacancy Sub-Committee

The director vacancy committee is tasked with bringing forth a candidate

for consideration at our March board meeting. So far two applications have been received.

6.A.2.g. NWRA Dues

Last year it was found that NWRA was not assessing dues as had been set in their bi-laws. We have received our annual invoice from them and it is for \$2,558. A group of NRD Managers are working with NWRA to amend the dues structure so that NRD dues are more inline with irrigation districts. No action is needed at this time.

6.A.2.h. Lickteig Request

In February 2014 the Wirka Tract (Sand Creek Site 16) was sold at auction and purchased by Dave Lickteig. Attached find a request from Lickteig's attorney. The NRD has always maintained that most of the lake would be on the Wirka tract, however there was no way to be sure of this until until the lake filled. Unfortunately the auction company placed on the flyer that 100% of the lake would be on the land being sold. Lickteig's attorney seems to be confused as to what our statement of "no public access" means as there is no public access on this lake. On the land closing agreement the auction company added a statement that the west end of the dam is on adjacent property.

6.A.3. EQUIPMENT

6.A.3.a. Microphone System for Board Room

Mitch O'Reilly is working with audio visual companies and gave a presentation to the committee which are attached to the Executive Committee Minutes. The committee asked for the board room tables to be changed to allow board members to be closer by narrowing the gap between tables and closing the north end (to form an oval). A decision on the sound system and projector will be delayed until the new room layout can be tried.

6.A.4. PERSONNEL

6.A.5. FINANCE

6.A.5.a. Approval of Financial Reports

Attached find the January Financial Statement.

6.A.5.b. Approval of Managers Time and Expense Sheets

6.A.5.c. Accounts over 90 Days

6.B. Education, Operations & Rural Water Systems Committee - Action as Required

6.B.1. WILD NE/CREP REPORT

6.B.1.a. Wildlife & CREP Payments

There are no CREP payments.

We have not heard if the Federal Grant Funding through NE Game & Parks for projects at Homestead and Czechland Lakes has been approved.

6.B.2. OPERATION & MAINTENANCE & OTHER ITEMS

6.B.2.a. O & M Crew

The O & M crew have completed burning all tree piles at Czechland and Wanahoo. Prepared Czechland for the contractor to start the rock project. The crew help load 4 of the 6 docks sold from Czechland.

6.B.2.b. Equipment

Heimann looked at a Turbo Tree Saw at Benes Service. Their price is \$6,150. The saw has 15 four sided cutting teeth, each side should last approximately 100 hrs. Today, those teeth cost \$30/piece to replace.

6.B.2.c. Tractor Rental

The State of Nebraska is currently reviewing a new contract for tractor rental through John Deere. Various tractor sizes are available and the rate is \$13.25/hr, with a minimum usage of 300 hours. The review and acceptance to this contract may take up to two weeks.

Platte Valley will rent the District a JD 8245R tractor for \$1,100 a month. The District would use this tractor from July 15 - October 15 which would equal \$3,300.

Benes Service will not commit a rate or type of tractor until we are closer to the time of need.

6.B.2.d. Czechland Lake Improvements

The contractor has started hauling the type-C rip-rap to Czechland Lake, they have not started placing the rock. Staff has prepared the area by moving the docks, trimming trees and moving trash barrels. Four of the six docks have been sold.

6.B.2.e. Wanahoo SRA

Staff met with Game & Parks officials regarding the use, revenue and expenses at Lake Wanahoo SRA on Feb. 17. The usage of the park and revenue did increase in 2014 and expenses declined. NGPC expenses are beyond income and legislative subsidy so the deficit of \$8,045.17 be subsidized by the District. Two spreadsheets from each agency are attached.

The NARD and Lower Platte North NRD are organizing a 5K and 1 mile run/walk at Lake Wanahoo on Saturday, April 11. The Run-a-Hoo at Wanahoo is to benefit the NARD Foundation. The cost to run the 5K is \$35 and \$20 for the 1 mile walk. Bring your shoes for the start at 8:30 a.m.

6.B.2.f. Bellwood Watershed Dam repair request

Jamie Yindrick the tenant for Sean McFadden (Zepplin Farms) is requesting to repair a watershed dam which is directly above the District's Bellwood Dam 5-H. The pipe in the dam is rusted through and eroding around the pipe. This dam was originally designed by NRCS and built in 1956, modified in 1983. This dam directly benefits Bellwood 5-H (road structure). The replacement pipe is 30" and 48' in length which cost

\$1,658.29. Yindrick has contacted the NRCS for advice. The site is located in Butler County SE Section 10, T-15, R-2.

6.B.2.g. Ice Jam Expense

An ice jam in the Platte River occurred January 25 - 29 approximately 2 miles south of Hwy 92. When the tie back levee on the north end of the Clear Creek Levee was about to fail, Clark Construction was mobilized to the National Guard Camp near Ashland in anticipation of removal of a fuse plug if the Clear Creek Levee failed. In case of a failure, the plug is removed to allow water back into the Platte River. Clark Construction submitted an invoice for the use of his excavator, 21 hours at \$185.00 which comes to \$3,885.00

6.B.2.h. Fremont 205 Feasibility Study

A meeting with the COE and the Non-federal partners was held at the NRD office on Feb. 12. The Corps stated they have approval to transition the 205 Study into a General Investigation Study and the funds are available at \$425,000. The COE covers the first \$150,000 leaving the study at \$275,000. The Non-federal partners have to provide \$137,500 or 50%. An Amendment has been developed for the partners as to what percentage each will pay when a formal request is received by the COE. This will begin in 2015 rather than being split up between 2015 and 2016. An estimated construction cost by the Corps is \$50-55 million.

6.B.3. ROCK AND JETTY

There are no request for payments.

6.B.4. EROSION & SEDIMENT RULES & REGULATIONS

6.B.5. INFORMATION AND EDUCATION

6.B.5.a. Information

6.B.5.a.1. Newspaper and Radio Ads

This month we are running ads on the National Water Quality Initiative signup and the remaining Water Certification classes.

6.B.5.a.2. Spring Viaduct

The spring issue of the Viaduct will come out in March. This is one of our two printed issues of the year distributed in area newspapers.

6.B.5.a.3. NWQI 2015

Wahoo Creek was again chosen as a target watershed for National Water Quality Initiative funds from NRCS. We are running ads and have updated the poster from last year to help promote the signup, which ends March 20.

6.B.5.a.4. SCWIG Signs

Thompson will be helping the Shell Creek Watershed Improvement Group with a design for new road signs. The signs will focus on the "Slow the Flow" slogan used for last year's open house. The grant has \$10,000 budgeted for signage.

6.B.5.b. Education

6.B.5.b.1. Soil & Water Stewardship Week

Soil & Water Stewardship Week orders are due March 6. Orders have been slow to date, we will send a reminder message next week.

6.B.5.b.2. Earth Wellness Festival

Thompson will present at the Earth Wellness Festival in Lincoln in late March.

6.B.5.c. Computer

6.B.5.c.1. New Projector

We purchased a new projector for the office - a ViewSonic model PJD5533W for \$438.99. It is significantly brighter and sharper than our old projector, which was more than 10 years old.

6.B.6. RURAL WATER SYSTEMS

- February water samples were taken on the 24th, results should be available by Board Meeting

- I am working with Troy to assess our System's need for new/upgraded meter reading/billing equipment and software. We are gathering information and will bring to March Committee meeting.

- We will be adding a new customer to the Colon line this month - Bob (Toby) Malousek, 3914 Browning Drive

- Meeting with Brainard/Dwight is scheduled for Monday, March 2nd at 7:00 pm.

- Over the next few months I will be developing a comprehensive inventory of the Rural Water Dept's parts, tools and equipment.

- Tyler Benal is enrolled in the May Grade IV Water Operator course.

- We have replaced a damaged meter radio reader on the Colon system caused by snow plow.

6.C. Water Committee - Action as Required

6.C.1. REGULATORY

6.C.1.a. GROUND WATER MANAGEMENT AREA

We need to issue an "Order" for our GWMA rules change.

6.C.1.a.1. Variance Request in the Hydrologically Connected Area
(Limited Development Area)

Several producers have requested applications for new irrigated acres in the HCA.

6.C.1.a.1.A. Ray Kucera Jr. Variance Modification

Mr. Kucera is asking permission to alter how he will be irrigating 11 acres that were approved in S2-T16N-R7E in Saunders County. The expanded water use variance was approved in February of 2014 for 11 acres under the name Ronald V. Freeman, variance number LPN-V-013-0344. Staff has compared the two irrigation patterns and there would be no change in the original ranking score. Attached is a map of the field. The black outline is what was initially approved, and the red is what is proposed.

6.C.1.a.2. Variance Requests in the Non-Hydrologically Connected Area (Normal Development Area)

One new application has been submitted for 10 acres in the NHCA.

6.C.1.a.3. Variance Requests in the Restricted Development Areas
No updates.

6.C.1.a.4. Well Permit Program

6.C.1.a.4.A. Well Permits Approved

Wells Permits Approved: 5

Landowner	Number of Wells	Number of New Irrigated Acres	Type of Well	County	Subarea
Kent Hall	1	115	Irrigation	Dodge	North Bend
KWEA LLC	1	0	Irrigation	Dodge	North Bend
Seier & Seier	1	0	Irrigation	Boone	Upper Newman Grove
Claire Ehernberger	1	0	Irrigation	Colfax	North Bend
Western Sand and Gravel	1	0	Commercial	Saunders	Wann

The total number of approved permits for 2015 is 14

Location of Approved Well Permits for 2015: Correct as of 2/25/2015

County	Irrigation - New	Irrigation - Replacement	Stock	Commercial	Municipal	Other	Total
Butler	1	0	0	0	0	0	1
Colfax	0	1	0	0	0	0	1
Dodge	2	1	0	0	0	0	3
Boone	0	2	0	0	0	0	2
Madison	0	0	0	0	0	0	0
Platte	3	0	0	0	0	0	3
Saunders	3	0	0	1	0	0	4
Total	9	4	0	1	0	0	14

6.C.1.a.4.B. Hestekind Well Permit Request

The attorney for ‘Robert Hestekind and Leona L Hestekind, Co-Trustees Of the Robert H Hestekind Revocable Trust dated December 18, 2003; and Jerry D Hestekind and Judy Hestekind as joint tenants’ has requested that this permit be reissued in the name of the ‘above’ (see attachment). The well for this permit, G-172602, was drilled 4/5/2014 and registered with the Nebraska Department of Natural Resources on 6/19/2014 by the well driller, Charles Sargent Irrigation Inc – Neligh (see attachment). A survey, requested by Dale Schlinder, was done on 5/8/14. This survey showed that the irrigation well was actually located on the Hestekind property and not on the Score property (see second

attachment). On the basis of this survey the attorney for the Hestekinds is making this request.

The Water Committee took no action on the Hestekind request.

6.C.1.a.4.C. Taylor Farms General Partnership, KWEA LLC,
Supplemental Well Request

Justin Taylor is requesting a supplemental well in the NE1/4 NW1/4 of S8-T17N-R8E in North Bend Subarea of Dodge County. A permit for the proposed location was previously approved by the Board in 2013 (LPN-013-1359). The well will be tied together with a second well to irrigate 59 certified irrigated acres in the same legal description. Attached is a map of the field and the well log from the well currently located on the property. This well log shows the potential aquifer is only about 11 feet thick.

6.C.1.a.5. Cottonwood Valley Farms Transfer Request

Cottonwood Valley Farms is requesting a transfer of 17 irrigated acres from a farm in the NE 1/4 of the SW 1/4 of S23-T16N-R2E in the Octavia Subarea of Butler County to the SW 1/4 of S19-T16N-R2E in the Bellwood Subarea of Butler County. They will submit a variance for the field in section 19 with the plan to move the transferred acres back to section 23 if the variance is approved. Attached is the packet of information submitted by Jesse Hough, Manager of Cottonwood Valley Farms LLC.

6.C.1.a.6. John Temme Transfer

John Temme is requesting a transfer of twelve irrigated acres from two certified irrigated corners in the W1/2 SW1/4 in S14-T22N-R6W in Boone County to the SE1/4 SW1/4 and SW1/4 SE1/4 of S15-T22N-R6W. See attached map.

6.C.1.a.7. Mike Steinbach Transfer Request

Mike Steinbach would like to transfer 42 acres from the E1/2 SE1/4 of S31-T17N-R9E in the Fremont Subarea of Dodge County to the SW1/4 SW1/4 of S21-T17N-R9E in the North Bend Subarea of Dodge County. See attached map and request letter.

6.C.1.a.8. Special Quantity Subareas

6.C.1.a.8.A. LPNNRD SQS Operator Certification Classes

Two educational classes have been held for producers in the Butler-Saunders SQS. Twenty-one producers attended.

The Lower Platte South NRD will hold a single class on Wednesday February 25, 2015 in Valparaiso for producers of their adjoining Quantity management area.

6.C.1.a.8.B. Meter Maintenance Program

Lower Platte North NRD

Meter Repair and Maintenance Program (see attached LPNNRD approved flow meters)

1. Yes or No to establish a Meter Repair and Maintenance Program / staff recommends we start such a program.
2. If yes, Maintenance cost share program for one meter (McCrometer) or all approved flow meters / staff recommends we cost share and do maintenance on one meter, McCrometer.
3. Contractor or LPNNRD / staff recommend that LPNNRD run this program.
4. Cost share options
 1. Republican NRD's: NRD staff does the labor for the maintenance programs and producer pays 100% of the cost on equipment.
 2. UBBNRD: They contract out the maintenance program / The individual meter is not eligible for cost share repair more than once every 4 years (meter can receive cost share payment only once in a 4 year period) / cost share rate is 50% not to exceed \$150 per a water meter repair /
 3. LPNNRD recommendation: / NRD staff do the repair and maintenance program / cost share rate is 50% not to exceed \$200 on each individual meter in a 4 year period (meter can be repaired more than once in a 4 year period, up to a limit of \$200 in cost share funding) / on meters installed before February 17, 2015 then LPNNRD will consider cost share on purchase of straightening vanes, flow stabilizers, and anti-reverse feature as part of that \$200 cost share limit in a 4 year period.
5. Cost share amount – 50%, or some other amount
6. Water meters are not eligible for cost-share payment on equipment replacement or repair if the flow meter is still under warranty.

6.C.1.a.9. Lower Platte River Basin Water Management Plan Coalition (LPRBC)

The last technical committee met in Ord at LLNRD on February 10, 2015 (see attached minutes). The main topics were DNR depletion analysis tool under development as part of the Upper Platte Basin project. DNR anticipates the tool to be used first for the Upper Platte basin in the next few months and eventually state wide by the end-of-summer. The other topic was on Water Banking. David Kracman of the Flat Water Group presented on the history and accepted definition of water banking as well as examples of various kinds of water banking both in Nebraska as well as an example in California. Water Banking

can be actual physical water and/or paper water.

The Water Banking workshop will be held in Columbus NE at the Community College on March 10, 2015 starting at 1:00 pm.

6.C.1.a.10. Voluntary Integrated Water Management Plan - LENRD and LPNNRD

The latest Stakeholder meeting was held on February 3, 2015. Stakeholders were asked to vote on individual action plans within the goals and objectives as to their estimate of the time and expense to carry out each action (see attached minutes). Results will be shown at the next Stakeholder meeting on April 7, 2015 at our office starting at 2:00 pm. Only one or two stakeholder committees remain and the contract is to end in June of this year.

6.C.1.a.11. Cost Share Programs

6.C.1.a.11.A. Irrigation Well Sample Kits

One kit has been requested since the last committee meeting. Kits will be mailed in June, before the start of the irrigation season.

6.C.1.a.12. Bellwood Phase 2 Area

2014 was the twelfth year of this Phase 2 Area. 2014 Annual Fertilizer Application Reports have now been received from Osantowski Brothers and Steve Semin. 211 reports have been received for this area. To be in compliance with our Rule we will need to either reduce the size of this Phase 2 Area or discontinue it. The **Bellwood Phase 2 & Subarea Groundwater Results** (attachment) is summary of LPNNRD's sampling - this map shows that high nitrates are still an ongoing concern in a portion of this area. The recommendation for this area is to reduce it from the 32 sections approved in 2003 to 21 sections for 2015 (map attached).

Need motion to change boundary of Phase 2 area.

6.C.1.a.13. Richland - Schuyler Phase 2 Area

2014 was the eleventh year of this Phase 2 Area. 2014 Annual Fertilizer Application Reports have now been received from Chris Dvorak. 406 reports have been received for this area.

To be in compliance with our Phase 3 rule we should declare the 55 sections of the Richland-Schuyler Area (map with most recent LPNNRD sampling is attachment) as **Ground Water Quality Management Area -Phase Three**. If 50% or more of the wells sampled are > 10.01 ppm then a Phase 3 area can be declared. Additional Phase Three rules are:

Rule 2 Continuation of Phase One and Two Rules A continuation of Phase One Rules as defined in Section E, Rules 1-6, Section F, Rule 2

and in Phase Two Rules as defined in Section G, Rules 3, 4, 5, 8, 9, 10 and 11 shall apply.

Rule 3 Fertilizer Application On All Soils The application of commercial nitrogen fertilizer is prohibited in the fall and winter on all soils until after March 1. Spring applications of commercial nitrogen fertilizer will require split applications (pre-plant and side-dress) or the use of an approved inhibitor applied as recommended. If a split application is used and 50 percent or more of nitrogen fertilizer is applied as a pre-plant, the use of an approved inhibitor, applied as recommended, is still required.

Rule 4 Record that District Approved Inhibitor was Used If 50% or more of commercial nitrogen fertilizer is applied at pre-plant, then operators are required to furnish the District a record from the fertilizer dealer that a District inhibitor was used at recommended rates. This record shall accompany the Fertilizer Application report made to the District by December 31 of each year.

Need motion to change to Phase 3 area

6.C.1.a.14. LPNNRD Certification

6.C.1.a.14.A. LPNNRD Operator Certification Classes

Cert. Number	Cert. Date	Name	Re-Cert.	Comments
6344	2/13/15	Craig Jelinek	No	first timer

There have been two on-line test requests since the last committee meeting. One of these has completed the test and a certification card was mailed.

=

Six of the eleven scheduled classes have been held. The class scheduled for the morning of Wednesday, February 4th, was cancelled due to blowing and drifting snow.

Class	Date & time	Location	Attendance	First-time
# 1	Thursday, January 8th @ 2:45 p.m. (after Corn Expo)	Fremont - Christensen Field	75	17
# 2	Thursday, January 15th @ 1:30 p.m.	Columbus - Ag Park	56	6
# 3	Monday, January 26th @ 1:30 p.m.	ARDC - Mead	52	8

# 4	Wednesday, February 4th @ 9:30 a.m.	Schuyler - St Benedict Center	Cancelled	
# 5	Wednesday, February 4th @ 1:30 p.m.	Lindsay - Village Office	24	1
# 6	Thursday, February 19th @ 1:30 p.m.	David City - Hruska Library	36	2
# 7	Tuesday, February 24th @ 9:30 a.m.	Columbus - Pinnacle Bank	28	6
# 8	Wednesday, March 4th @ 1:30 p.m.	Fremont - Extension Office		
# 9	Tuesday, March 24th @ 9:30 a.m.	David City - Hruska Library		
# 10	Thursday, March 26th @ 7:00 p.m.	ARDC - Mead		
# 11	Tuesday, March 31st @ 7:00 p.m.	Columbus - Ag Park		

The class schedule was mailed to about 500
producers. 271 40

6.C.1.a.15. Norman Kavan Jr. Request for Certified Irrigated Acres
Norman Kavan Jr. is asking the Board to recognize a field in the NW 1/4 of S27-T14N-R8E in Saunders County, as being historically irrigated. Mr. Kavan has submitted FSA-578 forms showing a range of 113 to 146 certified irrigated acres between the years of 2000 and 2004. The Kavan's were unaware of the 2 in 10 rule for historically irrigated acres when they purchased the farm in 2009. They applied for 40 in 2011 and were approved but decided to allow the variance to expire. Justin Kavan reapplied in 2013 and the variance application has yet to be approved due to the 2,500 acre limit in the HCA. Attached is a map of the proposed system as well as the supplied FSA-578 forms. The new pivot will irrigate approximately 60 acres from an existing well located in the same quarter.

6.C.1.a.16. Bob Vering Certified Acre Request
Bob Vering is requesting 69.3 irrigated acres for a farm he owns in the SE1/4 of S28-T18N-R8E in Dodge County. The acres were part of a cattle operation that has since been converted to crop land. The field was irrigated in 2014 and the violation was discovered during the acre certification process. Mr. Vering would like the Board to consider his water use for the cattle as an offset for the new irrigated acres. The attached map shows the quarter in question, but does not reflect the current irrigation system.

Mr. Vering addressed the Committee on his situation. He would like to sign with NRCS and list this as irrigated ground due to the higher seeding rate for a cover crop. NRCS also has a non-irrigated rate and Committee members felt he could sign up with that program. The Water Committee took no further action.

6.C.1.a.17. Certifying Acres in Saunders and Dodge Counties
Poole reports that certification papers were due February 1, 2015 from Dodge County. He reports that about 80% of these have been turned in. As in other situations, the last ones to turn in their reports take the longest.

6.C.1.b. CHEMIGATION

Rules will be submitted to DEQ for their review and hopefully their approval.

Renewal forms are being developed for our District and these will be mailed out in late March or early April.

6.C.1.c. LIVESTOCK WASTE PERMITS
The LPNDRD has received one new livestock permit applications from DEQ since the last Water Committee meeting.

Name	Livestock	Type of Permit	Legal Description	County
Scott Schmid Feedlot 127 Road I Columbus NE 68601	Cattle 3,500 Head 3,500 A.U.	Construction & Operating Permit	NW1/4, Section 30, T18N, R2E	Colfax
Little Pine Ridge Feedyard PO Box187 Bellwood NE 68624	Cattle 10,800 Head 10,800 A.U.	Expansion on Operating Permit	SW1/4, Section 23, T16N, R2E	Butler

7. The Scott Schmid Feedlot operation is two miles north of the current Richland-Schuyler Phase 2 area.
8. The Little Pine Ridge Feedyard is expanding operations of existing 5,000 Head with addition of 5,800 Head for a total of 10,800 head or 10,800 A.U. This operation is 4 miles east of the current Bellwood Phase 2 area.

6.C.2. GROUND WATER PROGRAMS

6.C.2.a. DECOMMISSIONED WELL PROGRAM

6.C.2.a.1. Well Estimates

Two new wells has been reviewed and approved by Gottschalk for decommissioning since the last Committee meeting.

Well Owner	Type of Well	Cost Share Estimate	County
Karl Grotelueschen	1 Irrigation	\$951.68	Colfax
Gary Labenz	1 Domestic	\$235.94	Platte

6.C.2.a.2. Plugged Wells

Two wells have been plugged, reviewed, and ready for cost share payment approval this month.

Well Owner	Type of Well	Cost Share Estimate	County
Charles Emanuel & Sons	1 Irrigation	\$514.03	Dodge
Wilma Loseke	1 Irrigation	\$613.16	Platte

6.C.2.b. LOWER PLATTE NORTH NRD GROUND WATER STUDIES

6.C.2.b.1. Eastern Nebraska Water Resources Assessment (ENWRA)

The ENWRA Technical Committee met on Wednesday Feb. 25, 2015 to discuss the addition of 125 miles of AEM flightlines that are to be flown this spring (see attached sheet). These are still scheduled to be flown in late March into April.

6.C.2.c. NEW MONITORING WELLS

LPNNRD staff has identified several sites for future test holes and potential monitoring wells. C&SD division is currently scheduling test hole drilling for June and it is not clear if the test holes requested by our NRD will be drilled within this fiscal year.

6.C.3. OTHER

6.C.3.a. GMDA SUMMER SESSION

The GMDA Summer Session is scheduled for Coeur d'Arlene, Idaho on June 10-12, 2015. Agenda is still being worked on, but one possible topic is the use of drones in agricultural production.

The 2015 GMDA Summer Session will be held at the Coeur d'Alene Golf and Spa Resort on June 10-12, 2015.
The 2015 GMDA Summer Session will be held at the Coeur d'Alene Golf and Spa Resort on June 10-12, 2015.

6.C.3.b. 2014 SUMMER INTERNS

The LPNNRD is again considering hiring two to four interns this summer. Work areas will include tree planting, spraying dams and other areas for weeds, repairing fence, ground water sampling, chemigation, summer gwel readings, etc. Bob Heimann and Russ Oaklund will interview and hire these individuals.

6.C.3.c. COMMENTS FROM THE PUBLIC

Arnie Stuthman addressed the Water Committee about his request for 40 additional irrigated acres. His original application for more acres (in the now SQS area) was made in 2012 and he purchased the pivot at that time. His application was apparently lost in the mail since the LPNNRD never received it.

6.D. Projects Committee - Action as Required

6.D.1. SWCP

Gottschalk reviewed the current SWCP spreadsheet with the committee. We have expended approximately 36% of State and local SWCP funding.

6.D.1.a. SWCP Application Approvals

No applications for approval were presented.

6.D.1.b. SWCP Payments

14-B-53 Mary Ann Shuey Rev. Trust Flow Meter \$ 625.00

6.D.1.c. SWCP Cancellations

None

6.D.1.d. Cottonwood Creek Payments

Leonard & Shirley Chmelka Living Trust Basins/Terraces/Tile
\$ 5,878.42

Kenneth D. Fencil Basins/Waterways
\$ 1,927.66

TOTAL: \$ 7,806.08

6.D.1.e. Sand/Duck Creek Approvals

None

6.D.1.f. Sand/Duck Cost Share Payment

None

6.D.1.g. Wahoo Creek Cost Share Payments

WAHOO CREEK PAYMENTS:

Lawrence Mach

Terraces/Basin/Pipe

\$ 1,712.57

(This is the first payment for Wahoo Creek. These payments coordinate with Federal EQIP funding)

6.D.1.h. SWCP Policy Review

The Committee reviewed proposed 2015 changes our SWCP Policy as attached and gave input. We will be asking for a recommendation to approve the final draft at the April 2 Projects Committee Meeting.

6.D.2. WATERSHEDS

6.D.2.a. Shell Creek

6.D.2.a.1. Shell Creek Watershed Water Quality Plan

NDEQ is finishing their edits to the completed Watershed Water Quality Plan and will be sent to EPA for comments soon.

6.D.2.a.2. Shell Creek Watershed PIP for New Grants

Staff met with NDEQ, SCWIG and NRCS personnel on February 24 to discuss recent EPA 319 and Environment Trust grant awards and work on a Project Implementation Plan. We have been approved for \$50,000 from NDEQ and have been preliminarily approved for another \$155,000 from NET for grade control structures and other watershed BMP's. There is also another \$87,000 from prior approved NET grant awards which is planned to be used toward project engineering and design.

6.D.2.a.3. Shell Creek Watershed Improvement Group Liability Concern

During the February 10th SCWIG meeting, group members requested Assistant Manager Mountford to investigate their potential liability acting as LPNNRD's Advisory Group and if they could be covered under our liability coverage. This topic was presented to our attorney, Jovan Lausterer, and his suggestions for proceeding are attached. SCWIG has been in existence for about fifteen years and has been a vital partner in accomplishing conservation measures in the watershed. SCWIG initially helped secure and administer several grants and teamed with the Praireland RC&D to apply for and disperse those funds. Although SCWIG will be closing out an older grant with the Environmental Trust this year, LPNNRD has taken over the lead role with new Shell Creek grant efforts. We suggest looking into the

costs for our insurance provider, LARM, to add liability coverage for SCWIG solely acting as our advisory group.

6.D.2.a.4. Newman Grove Science Club Assistance Request (attachment)

The Newman Grove Science Club is requesting our assistance in purchasing water testing supplies and equipment for 2015 sampling of Shell Creek. In the past we have shared this expense with SCWIG who has used available grant funds to help the club.

6.D.2.b. Wahoo Creek Watershed

6.D.2.b.1. Wahoo Creek Watershed Water Quality Plan Phase I

We anticipate receiving an invoice from JEO's for work completed on the Wahoo Creek Watershed Water Quality Plan by Board Meeting. If received, board review and approval will be requested at that time.

6.D.3. LOWER PLATTE RIVER CORRIDOR ALLIANCE

6.D.3.a. LPRCA Monthly Report

Meghan Sittler was present to update the Projects Committee on several Alliance activities. She briefed the committee that LPRCA members will have a discussion (9:00 a.m. on April 21, at LPSNRD) regarding the obstruction removal project at Two Rivers State Park. As we know, the project costs doubled due to pier removal requirements required by the U.S. Fish & Wildlife Service. Discussion on whether the partners wish to continue with a portion of the project or drop this effort entirely will occur. Discussion on the upcoming draft Alliance Budget for FY 2015-2016 will also occur at that time. Also attached to the Projects Committee Minutes is Meghan's written January 2015 report.

6.D.4. OTHER

6.D.4.a. Army COE 205 Projects

6.D.4.a.1. Fremont 205

Heimann updated the committee on the current status of the Fremont 205 Study as detailed in the O, E, & RW Committee Minutes.

6.D.4.a.2. Schuyler 205

Contractor plans on returning to the job site early March. The following items need to be completed: Final Grading, Staking of Boundary Markers and Seeding.

6.D.4.b. Shell Creek Landowner Levee Project Update

Director Bailey gave an update on the slow process of getting needed information from the Army COE that is required to complete his no-rise certificate needed for the landowners project east of Schuyler. Suggestions were given that will hopefully move things along quicker.

6.D.4.c. All Hazard Mitigation Plan Update

JEO continues to work on completing our All-Hazard Mitigation Plan update for the District. They are in the process of contacting Woodcliff,

Colon and Dwight about completing some detailed analysis on priority projects. We will also determine if we wish to use some of the available grant funding to complete downstream breach route mapping on a few of our floodwater dams. This information would be used for informing county zoning and floodplain officials to prohibit residential development in those mapped areas.

6.D.4.d. Projects Committee Time

The Projects Committee decided to change the starting time of their future meetings from 8:30 a.m. to 9:00 a.m.

6.D.4.e. Review of Projects Financial Statement

Attached are the Project Financials as of January 31, 2015. The Projects Budget as of that time was 27.19% expended. The Land Treatment Budget (found under Water Expenses) was 32.32% expended.

6.D.5. SAND CREEK ENVIRONMENTAL RESTORATION PROJECT REPORT

6.D.6. WESTERN SARPY/CLEAR CREEK LEVEE REPORT

Segment 4B -

Contractor is working with the COE on a contract modification to extend the current levee construction area and cross section of the area affected by the ice jam flooding. This segment is 75% completed.

Segment 5

Contractor has completed work on Camp Ashland side of the river and is focusing on the Big Sandy Development Area, which is to be completed by mid-May.

7. Additional Action Items

7.A. WS/CC Segment 5 Powerline Relocation

7.B. Wanahoo Entrance Paving

7.C. Czechland Lake Improvement Payment to JEO

We have received an invoice of \$2,500 from JEO for the construction oversight on the Czechland Lake Shoreline Improvements Project. This is 16.66% of the total cost for the construction oversight.

7.D. Czechland Lake Improvement Payment to Contractor

Sibbernson Excavating has submitted an invoice of \$57,655.80 for 63% of the completed construction on the Czechland Lake Shoreline Improvements Project. The east and north piers have been established and the shoreline armoring has begun.

8. Approval of Bills Pending

9. Consent Agenda Adoption
10. Comments from Directors/Guests
11. Meeting Establishment/Adjournment

NOTE: The agenda is on file at the LPNNRD office and may be changed up to 24 hours prior to the meeting as scheduled.

United States Department of Agriculture

Lower Platte North NRCS/NRD Report for March 2015

Mark Walkenhorst, District Conservationist

Wahoo Field Office

District Secretary, Marla Milliken
Resource Conservationist, Jami Thoene
Civil Engineering Technician, Kenneth Kotera
Soil Conservation Technician, Sean Elliott
NRD Technician, Kelly Bartek
Compliance Specialist, Becky Pieper

Fremont Field Office

District Secretary, Jenny Campbell
Resource Conservationist, Jeremiah Schutz
Soil Conservationist Technician, Brian Hagerbaumer

Columbus Field Office

District Secretary, Ona Foland
Resource Conservationist, Eric Smith
Soil Conservation Technician, Bill Bos
NRD Technician, Ed Drozd
Shell Creek Coordinator, Melissa Foreman
WRP Team 6 Coordinator, David Bichlmeier

David City Field Office

District Secretary, Susan Leu
Resource Conservationist, Brach Johnson
Soil Conservation Technician, Greg Havlovic
Soil Conservationist, Jenna Kampschnieder

Schuyler Field Office

District Secretary, Patty Holmberg
Resource Conservationist, Bryan Euse
Wildlife Biologist, Brian Teeter

Fall construction projects completed in the LPNNRD

41 projects were completed in the fall of 2014.

By Practice: Terraces 65,348 feet (12.4 miles) installed

Underground pipe 55,516 feet

Sediment & Water Control basins 73#

Grassed Waterways 1.8 acres

Cover Crops applied in the fall 4072 acres

LARRY RASMUSSEN, BY LESHARA NEBRASKA TERRACES AND TILE OUTLETS, CONSTRUCTED

FALL OF 2014; this particular project, located in the northeast part of Saunders County was completed in the fall of 2014. Josh Charles, Soil Conservation Technician, detailed from the Blair Field Office, designed the project that resulted in the treatment of 50 acres of cropland by reducing sheet and rill erosion along with ephemeral erosion on this area.

Besides the installation of structural practices, a cover crop mix of wheat was planted last fall and will hopefully provide additional ground cover this spring.

Program	Deadlines Dates
2016 EQIP	Ongoing
2015 ACEP (WRP, GRP)	Ongoing
2015 CSP-SIGNUP	Ongoing
2015 NWQI Wahoo Creek	March 20 2015
2015 NRD programs	Ongoing

Status of the 2015 EQIP Sign-up:

With 119 applications that have been plan, rank and evaluate and with the allocation of over 703,000 EQIP dollars, the next step will be the preapprovals and

approval of the EQIP contracts for FY15. At this time 25 of these applications have been preapproved with responses waiting from these applicants "on whether they want to enter into an EQIP contract or not". Most of these early EQIP applications that are preapproved deal with management practices such as cover crops, no-till, irrigation water management, etc.

More to come in next month report.

Personnel News: Mark Young, Soil Conservation technician in the Wahoo Field Office, retired after 32+ years with the Soil Conservation Service/Natural Resource Conservation Service. Mark's last day was at the end of February.

Helping People Help the Land

An Equal Opportunity Provider and Employer

Managers Report
John Miyoshi
March 9, 2015

Meetings

The annual Director's Retreat was held February 11 at the Benedictine Center north of Schuyler. This day of planning is always time well spent with time taken for full discussion of important current issues and long range planning.

A day was spent with the Corps of Engineers on February 12 to update the Schuyler and Fremont Projects. As reported in committee the Schuyler Platte River Levee will go onto the shelf once a 30% design is completed by the COE and look for funding at some future time. The Fremont Project gave us several surprises with the largest being that Corps Headquarters has converted the 205 Study to a GI (General Investigation) Study. Another surprise was the switch to the preferred alternative being a modified U-shaped levee. The Chiefs Report on the Fremont Project is to be completed by September of 2016.

The Lower Platte River Basin Water Management Plan managers met on February 14 in Norfolk. The next important meeting is the Water Banking Meeting scheduled for tomorrow (3-10-15) at Central Platte Community College in Columbus. All basin NRD directors are encouraged to attend the 1:00 p.m. meeting.

Brian Dunnigan and Steve Oltmans from Olsson Associates met with staff members on February 20. It was a good opportunity for all staff to meet Dunnigan and for our staff to relay to OA what we see as our priorities for projects and programs.

OPPD and Fremont Utilities are planning for a new power line from Blair to Fremont. A kick-off meeting was attended in Fremont on February 26. The first public meeting will be held on March 11 in Arlington.

Mark Geist from USB met with our staff on February 27 to review how our district sponsored retirement plan is performing.

On March 2 a meeting was held with Dwight, Brainard, UBBNRD, LPSNRD and LPNNRD to discuss the Dwight/Brainard Rural Water Study that was completed by JEO. The recommended plan is for construction of a new well and treatment plant located between the two villages. The study has been forwarded to the state Water and Waste Water Committee for funding consideration (the committee does not always fund the recommended alternative).

A Pond Management Workshop was attended on March 4. Presenters included UNL Extension, DEQ, G&P and LPSNRD. Much very good information was presented on pond types, construction, maintenance and management for your intended purpose.

The quarterly Nebraska Land Trust meeting was held in our off ice on March 6. I was not able to attend, however John Hannah and Chris Poole represented LPNNRD.

The next Projects Committee meeting (April 2 beginning at 9:00 a.m.) will be followed by a tour of the WS/CC Project and current construction activities. All directors are welcome to attend.

Item of Interest

Testimony was given on two Legislative Bills this past month. LB 130 sponsored by Senator Watermeier takes funding from the Water Sustainable Fund to complete approved NRDF Projects was supported along with LB 344 that is Senator Kolowski's bill to grant NRDs bonding authority similar to what other political sub-divisions have.

We continue to work with Senator Jerry Johnson to receive supplemental funding from the state to support Lake Wanahoo SRA. The Appropriation Committee meets on Thursday when both the DNR and G&P budgets will be discussed.

Staff continues to work with the Phoenix Group, which will add one additional proposal for data base management when we are ready.

Governor Ricketts has appointed a search committee to develop a slate for candidates for the Director of the Department of Natural Resources. The Committees first meeting was held March 4.

Mark Young NRCS soil conservationist in Saunders and Dodge Counties retired on February 20. Many producers in the two counties have had the opportunity to work with Mark through out the years.

Draft Agenda

High Plains Aquifer: Sustainability for Food Production and Water Supply

Thursday, March 19, 2015

7:30 a.m. Registration (continental breakfast available)

8:15 a.m. Welcome and announcements, Chittaranjan Ray, NU Nebraska Water Center

Morning Sessions

Moderator: Bob Swanson, USGS Nebraska Water Science Center

8:30-9:00 a.m. *"A Simple, First-Order Approach for Assessing Prospects for Sustainability of the High Plains Aquifer in Western Kansas,"* James Butler, Kansas Geological Survey, University of Kansas

9-9:30 a.m. *"Geology and Hydrology of the High Plains/Ogallala System,"* Jesse Korus, UNL Conservation and Survey Division

9:30-10 a.m. *"Modeling of Water Flow in the Northern Part of the High Plains/Ogallala Aquifer,"* Steve Peterson, USGS Nebraska Water Science Center

10-10:30 a.m. Break

Moderator: Jesse Korus, UNL Conservation and Survey Division

10:30-11 a.m. *"Managing Water for Nebraska Farmers,"* Roric Paulmann, Nebraska Water Balance Alliance

11-11:30 a.m. *"Managing Water for Texas farmers,"* Glenn Schur, Texas Alliance for Water Conservation

11:30-12 p.m. *"Simulating the Land Surface Response to Drought and Climate Change Across the High Plains,"* Anthony Kendal, Michigan State University

12-1 p.m. Lunch

1-2 p.m. Poster sessions

Afternoon Sessions

Moderator: Dan Snow, NU Water Sciences Laboratory

2-2:20 p.m. **Local studies #1:** *"Sustainability and Groundwater Management in Western Nebraska,"* Douglas R. Hallum and Steven Sibray, UNL Conservation and Survey Division

2:20-2:40 p.m. **Local studies #2:** *"Water Sustainability Projects in the Central Platte NRD,"* Lyndon Vogt, Central Platte Natural Resources District

2:40-3 p.m. **Local studies #3:** *"Innovations in High Plains Water Management Institutions,"* Nick Brozovic, NU Robert B. Daugherty Water for Food Institute

3-3:20 p.m. **Local studies #4:** *"USGS 2010 Water Use Compilation: The Nation, High Plains, and Nebraska,"* Nathan Schaepe, USGS Nebraska Water Science Center

Panel Discussion

3:45-5 p.m. *"Use and Sustainability of the Aquifer into the Future"* (invited): Jerry Kenny, Platte River Recovery Implementation Program; Scott Smathers, NRCS; Jim Schneider, Nebraska Department of Natural Resources; Pat O'Brien, Upper Niobrara White NRD; Lee Orton, Nebraska State Irrigation Association; John Heaston, The Nature Conservancy; Rick Kellison, Texas Alliance for Water Conservation

5 p.m. Adjourn

Nebraska Water Law Conference

Friday, March 20, 2015

- | | |
|-----------------------|---|
| 8:30-9:30 a.m. | <i>"Water Law Update,"</i> David J. Barger, Rembolt, Ludtke, LLP and LeRoy Sievers, Nebraska Department of Natural Resources |
| 9:30-10:30 a.m. | <i>"Federal Impacts on Water Law,"</i> Michael S. Mostek; Tom Wilmoth, Blankenau, Wilmoth & Jarecke, LLP; and Michael J. Linder, Koley Jessen PC, LLO |
| 10:30-10:45 a.m. | Break |
| 10:45-11:45 a.m. | Keynote Speaker: <i>"Department of Justice Positions,"</i> Anne O'Connell, Assistant to the Solicitor General of the United States |
| 11:45 a.m.-12:45 p.m. | Lunch |
| 12:45-1:45 p.m. | <i>"Innovations and New Developments in Integrated Management Planning":</i> Jasper Fanning, Upper Republican NRD; and Jim Schneider, Nebraska Department of Natural Resources |
| 1:45-2:45 p.m. | <i>"Practice and Procedure in Natural Resources Districts,"</i> Russ Barger; Don Blankenau, Blankenau, Wilmoth, & Jarecke, LLP; Daniel L. Lindstrom, Jacobsen, Orr, Lindstrom & Holbrook, PC, LLO |
| 2:45-3 .m. | Break |
| 3-4 p.m. | <i>"Ethics in the Water Law Arena,"</i> The Honorable James E. Doyle IV, Judge of the District Court, 11th Judicial District, Nebraska |
| 4 p.m. | Adjourn |

14th NATIONAL WATERSHED CONFERENCE

National Watershed Program Partner Summit

Presented by the

National Watershed Coalition

in Partnership with

Texas Association of Watershed Sponsors

Texas State Soil and Water Conservation Board

Association of Texas Soil and Water Conservation Districts

Tarrant Regional Water District

in cooperation with

Texas USDA Natural Resources Conservation Service

May 17-20, 2015

Worthington Renaissance Fort Worth Hotel

Fort Worth, Texas

WHO WE ARE

The National Watershed Coalition (NWC) is a nonprofit coalition founded in May 1989. NWC is made up of national, regional, state, local, and tribal organizations, associations and individuals, that advocate dealing with natural resource problems and issues using the watershed as the planning and operational unit. We advocate using total resource management principles in planning, and believe that the Small Watershed Program, authorized by PL 83-566, is the best management and implementation vehicle available for water and land resource management. We represent the needs of watershed project sponsors. We offer assistance on watershed planning when requested, sponsor biennial conferences, and other special resource workshops and conferences. We believe that proper care of our Nation's resources is a top national priority. Visit NWC at our website www.watershedcoalition.org.

WHO SHOULD ATTEND

Local, state, tribal, regional, and federal watershed, floodplain, and natural resources program managers and project sponsors will find the conference informative and useful as they address their unique natural resource management concerns. Local community leaders will learn what programs are available to them, and how they can be implemented. Governmental officials will hear from local program managers what works best at the local level and what needs to change. Those involved in land and water resource development, management and protection, and members of non-government

PRELIMINARY AGENDA

Sunday – May 17, 2015

- 8:00 AM Registration
- 8:45 AM Texas Tour
- 12 Noon Exhibit Set-up
- 5:30 PM Chairman's Reception & Exhibitor Mixer

Monday – May 18, 2015

- 6:45 AM Continental Breakfast
- 7:00 AM Registration
- 8:00 AM Opening General Session
- 10:00 AM Morning Networking Session & Break
- 10:30 AM Second General Session
- 11:45 AM Luncheon and Address
- 1:30 PM Concurrent Sessions
- Evening on Your Own

Tuesday – May 19, 2015

- 7:00 AM Continental Breakfast
- 7:00 AM Registration
- 8:00 AM Third General Session
- 10:00 AM Morning Networking session & Break
- 11:45 AM Luncheon and Address
- 1:30 PM Concurrent Sessions
- 6:00PM Texas Night

Wednesday – May 20, 2015

- 7:00 AM Continental Breakfast
- 8:00 AM Concurrent Sessions
- 9:30 AM Closing General Session
 - NWC Awards & Recognition
 - Introduction of New NWC Officers
 - Conference Adjourns
- 11:30 AM NWC Board of Directors Luncheon Meeting

PROGRAM HIGHLIGHTS

2014 was a watershed year for the Watershed Program! The infusion of funding from local, state and federal partners helped rekindle and refocus the national interest in the Program and the watershed work it places on the landscape.

We are excited to be back in Texas for the 14th National NWC meeting! Fort Worth and the Trinity River provide a great venue. The Watershed partnerships there and all across Texas are a prime example of people effectively working together to address water issues. Texas is home to more than 2000 USDA-NRCS assisted upstream flood protection dams. In recent years Texas Watershed Sponsors and their state and federal partners have taken the program and its benefits to new heights. Texas state and local watershed leaders have served NWC in leadership roles for almost 30 years. The Texas Association of Watershed Sponsors is one of the most effective groups of its kind, partnering and collaborating with other Texas groups who share common concerns. Along with our formal agenda, rubbing shoulders with our Texas partners and friends affords an opportunity to both learn from their insight and enjoy their generous hospitality. Come with expectations to hear new information about both traditional concerns as well as exciting new technical innovations that can make us more effective in our efforts.

Conference attendees will get the latest on watershed and conservation policy and programs from Washington, DC. Invited keynote speakers include the new Chair of the House Agriculture Committee, Congressman Mike Conaway of Texas as well as USDA-NRCS Chief Jason Weller. Conference participants will also have a first hand opportunity to hear and interact with those charged with administering the new Regional Conservation Partnership Program (RCPP). The RCPP offers competitive funding opportunities for Watershed Project Sponsors in specific critical conservation areas. The NWC feels that the RCPP holds great promise for funding watershed program work. RCPP presenters will provide information and guidance that will enhance the ability of your proposal to compete for funds. A special general program segment on dam failures will speak to the importance of everything from design to inspections and on to emergency action plans.

Our concurrent sessions are shaping up to present a solid line up of watershed related topics. The forum provides attendees the opportunity to both learn from and engage our concurrent session speakers. A sample of the topics include the use of new technology for watershed assessments and inspections, successful dam rehabilitation efforts, utilizing land treatment to improve water quality, partnerships for watershed project success and project funding strategies.

Our program offers an innovative and informative line up of speakers and presentations, our hosts promise a Texas sized serving of hospitality. We look forward to seeing you in Fort Worth!

Don't miss this opportunity for professional development and personal involvement in shaping the future. Register before May 1, 2015 and receive a \$25.00 discount. To receive conference room rates at the Worthington Renaissance Hotel you must make your reservations by April 16, 2015. Don't delay, register now!

WHAT YOU NEED TO KNOW TO REGISTER

THINGS TO REMEMBER

- ✖ A separate form must be completed for each registrant.
- ✖ Credit card or purchase order registrations may be emailed to nwc2015ftworth@gmail.com
- ✖ Payment is required prior to processing.
- ✖ Sunday's tour is hosted by our Texas partners at no additional cost to conference attendees. Space is limited to 45. If you wish to take the tour please indicate that on your registration form.
- ✖ Texas Night is hosted by the Tarrant Regional Water District at no additional cost to conference attendees. If you wish to attend Texas Night please indicate that on your registration form.
- ✖ Registrations cannot be mailed or emailed after **May 6, 2015**. After this date, all registrations must occur on-site.
- ✖ Completed forms with payment should be mailed to: NWC, PO Box 556, Chandler OK 74834.

FEES INCLUDE

Register early and take advantage of the discounted registration fee. Register by **May 1st** and **save \$25**. We urge you to take advantage of this money saving opportunity. All participants are required to pay the registration fee.

Full Registration

- ✖ admission to all sessions
- ✖ admission to the exhibits
- ✖ exhibitor reception (Sunday)
- ✖ 3 continental breakfasts
- ✖ 2 luncheons
- ✖ all breaks

One-Day Registration (Monday or Tuesday)

- ✖ admission to sessions that day
- ✖ admission to the exhibits that day
- ✖ conference meal functions that day

Guest Registration

- ✖ conference meal functions
- Note: Guest registration is intended for use by the spouse or guest of a registered attendee and is not intended for use by a colleague or additional attendee.**

CANCELLATION AND REFUND POLICY

To receive a refund, notice of cancellation must be received by **Wednesday, May 6**. All refunds are subject to a \$50 processing fee. After the cutoff date, registration fees are no longer refundable.

FORM OF PAYMENT

Registration fees can be paid by check, credit card, or purchase order. Please provide credit card or billing information where indicated. A copy of the purchase order, with billing instructions must accompany the registration form if payment is to be processed by purchase order. If payment is made by credit card the card holder's name, mailing address associated with the card, card number and expiration date are required.

HOTEL RESERVATIONS

Conference Hotel:

Worthington Renaissance Fort Worth Hotel
NWC conference rate is **\$144** per night plus tax.

Call 1-817-870-1000 to make your hotel reservations. Mention you are attending the National Watershed Coalition meeting to take advantage of the discounted room rates.

Reservations must be made by Thursday, April 16th.

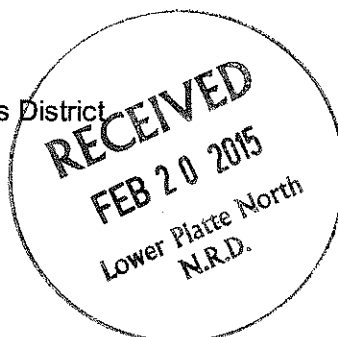

EXHIBIT AREA

Commercial exhibitors are those in business for profit. Government / Nonprofit are those not for profit organizations. Each exhibitor registration includes one conference registration with admission to all sessions, the exhibitor's mixer, two luncheons, three continental breakfasts and all breaks. Exhibit displays will be located near the conference meeting and meal functions. Conference attendees are encouraged to spend time visiting the exhibits. The exhibit area will be open Sunday evening and all day on Monday and Tuesday. The exhibit area will open at noon on Sunday, May 17th. All exhibits must be installed and ready for opening by 5:00 PM. No dismantling can begin before 3:30 PM on Tuesday, May 19th. All exhibits must be removed by 6:00 PM on Tuesday, May 19th. Each exhibit space will be 10' X 10' with one table and 2 chairs. Exhibitors are responsible for transporting their exhibits to the conference site in time for set-up, and return home.

Educating people and inspiring action.

John Miyoshi
Lower Platte North Natural Resources District
P.O. Box 126
Wahoo, NE 68066-0126

Dear John,

30 years ago it all started - the idea that education could be a catalyst to action. Well, the idea has proven itself true. In the past 30 years the Groundwater Foundation has developed innovative approaches to successfully educate millions of people and involve hundreds of communities in groundwater protection and conservation. A few remarkable achievement include:

- Creation and world-wide implementation of Children's Groundwater Festival model
- Designation of hundreds of communities as Groundwater Guardians - which means effectively protecting the drinking water of millions of people across the nation

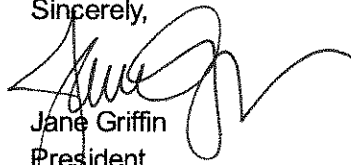

But, the work is never done. And it cannot be done alone. The demands and threats to our water supply are ongoing and evolving, that is why we are focusing our 30th anniversary activities on the commitment to 30 more years of meaningful work. We are inviting you to be a catalyst right along side us! Please see the enclosed information about our:

- National Conference and Anniversary Celebration
- Special Anniversary Activities and Outreach Efforts

And decide what effort(s) you would like to support. As you will note, each one offers widespread recognition and therefore Lower Platte North Natural Resources District will be highly visible as a prominent supporter of clean water for future generations.

I will touch base with you in a couple of weeks to answer any questions or further discuss any of the opportunities. If, in the meantime, you would like to get in touch with me with any questions please do not hesitate to do so.

Sincerely,

Jane Griffin
President
Groundwater Foundation

*John -
I hope you will
be able to support
our efforts!
All my best,
Jane*

2015 Groundwater Foundation National Conference and 30th Anniversary Celebration

Theme: It's Just the Beginning...Let's Get Started!

When: October 20-22, 2015

Where: Lincoln, Nebraska

Purpose: Groundwater is perhaps an even more critical resource now than three decades ago. Increased demand for groundwater for drinking water, agriculture, and industry, along with ever-changing threats from contamination, puts groundwater at an important juncture - one that necessitates action by each and every one of us.

The 2015 Groundwater Foundation National Conference will serve as a call to action on behalf of groundwater. The future is upon us, and action is needed to identify challenges and develop approaches and solutions to address them. From climate change and growing societal needs to a wide variety of emerging contaminants, each of us will need to be prepared to prevent and mitigate the potential risks to this precious resource.

Featured speakers include **Dr. Jay Famiglietti**, Hydrologist, UC Irvine Professor and JPL Senior Water Scientist. Dr. Famiglietti will share his experience using advanced computer models and satellite remote sensing to track water availability. In addition to Dr. Famiglietti, the conference will provide presentations and site visits that offer conference attendees valuable approaches to effective groundwater education, and insight into protection and conservation solutions that can be adapted in their communities.

Audience: The National Conference is attended by water operators, educators, water experts, consultants, engineers, scientists, and concerned citizens. The majority of the attendees participate in one or more Groundwater Foundation programs, or are members or partners of The Groundwater Foundation. Attendees come from all areas of the country.

Presenting Sponsor

As the sole Presenting Sponsor your company will receive:

- Prominent recognition (name and logo) as Presenting Sponsor on all printed and electronic materials developed for the conference (i.e. invitations, programs, press releases, signage)
- The opportunity to officially open the conference and welcome participants
- One session to present about your company's innovative approaches to groundwater sustainability
- Recognition on the Groundwater Foundation website as Presenting Sponsor
- Five (5) complimentary conference registrations for employees and/or constituents
- One table (8 top) at the Celebratory Dinner on October 20, 2015
- Premier display unit in central location and one display table in the exhibition area

➔ **Investment: \$25,000**

National Conference Co-sponsor

As Conference Co-Sponsor your company will receive:

- Recognition as Co-Sponsor on all printed and electronic materials developed for the conference (i.e. invitations, programs, press releases, signage)
- The opportunity to present at conference
- Recognition on the Groundwater Foundation website as a Co-Sponsor
- Three (3) complimentary conference registrations for employees and/or constituents
- Four (4) complimentary seats at the Celebratory Dinner on October 20, 2015
- Two (2) complimentary display tables in exhibition area

➞ **Investment: \$15,000**

Partner

As a Partner your company will receive:

- Identification as a Partner on all printed and electronic materials developed for the conference (i.e. invitations, programs, press releases, signage)
- Recognition on the Groundwater Foundation website as a Partner
- Two (2) conference registrations for employees and/or constituents
- Two (2) complimentary seats at the Celebratory Dinner on October 20, 2015
- One (1) complimentary display table in exhibition area

➞ **Investment: \$10,000**

Supporting Sponsor

As a supporting sponsor your company will receive:

- Recognition as a Supporting Sponsor in printed and electronic materials developed for the conference (i.e. invitations, programs, press releases, signage)
- Recognition on the Groundwater Foundation website as a Supporting Sponsor
- One (1) conference registration for employee or constituent
- One (1) complimentary seat at the Celebratory Dinner on October 20, 2015
- One (1) complimentary display table in exhibition area

➞ **Investment: \$5,000**

Additional Conference support opportunities:

➞ \$2,500 Sponsor of Celebratory Reception and Dinner

➞ \$2,000 Sponsor of Groundwater Guardian and Groundwater Guardian Green Sites Designation Celebration

➞ \$1,500 Sponsor of Networking Dinner

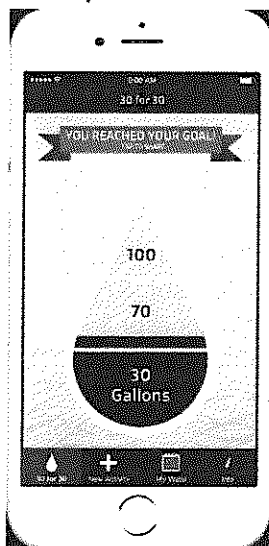

➞ \$750 Sponsor of Conference activities

➞ _____ I would like to provide \$_____ towards the conference scholarship fund.

Additional 30th Anniversary Activities and Outreach Sponsorship Opportunities

To successfully protect and conserve groundwater for the next 30 years we need to educate, inspire and involve the people who will be directly involved in the decisions and actions over the next 30 years – college-aged students and young professionals. As such, our outreach efforts and activities will be aimed at this age group. Make sure this generation of people of the role your company plays in protecting and conserving water! As a supporter of one of these activities your company will receive appropriate recognition on the website and event materials.

30 by 30: Water Tracking App

This app will track daily water usage; it will encourage and incentivize people to reduce their water usage by 30% over a 30 day time frame. We will use a grassroots approach to promoting this app. We are working with universities and colleges to get their students on board for the 30 by 30 water tracking activity. The use of social-media, rewards and incentives will be utilized to trigger interest. Competition between rival schools will be used to drive usage and water usage improvements among young adults!

➤ 30 by 30 Presenting Sponsor: \$10,000

Your funds will be used for the development and promotion of the App. Recognition will be on website, in promotional materials including e-promotions, e-newsletters, social media posts, etc.

➤ 30 by 30 Partner Sponsor: \$5,000

As an App partner your company will help fund the development and will be recognized accordingly in the numerous avenues of promotion (on website, in e-publications and on social media).

Stories and Outreach Supporter

The Groundwater Foundation will use the success stories of its program participants and constituents to show that our efforts do make a difference! A series of stories - told by pictures, as a poem, in a video – will be shared throughout the year. Help us make this happen; we all know that everyone loves a good story!

➤ Story Teller Sponsor: \$1,000

As the Story Teller Sponsor your name will be prominently displayed: "This story series is brought to you by..."

➤ Story Teller Supporter: \$500

As a Story Teller Supporter your company will be recognized as a supporter of this series.

To: Glenn Johnson, John Miyoshi, John Winkler, Marlin Petermann,
Paul Zillig, Tom Mountford, Mike Murren and Meghan Sittler

From: Bob Weaver

Date: March 5, 2015

Subject: Washington Report for February 2015

**Report on Federal Legislation, Appropriations, Other Washington
Developments**

- Congress and the President approved full FY 2015 funding for the Department of Homeland Security earlier this week in a clean bill.
- FY 2016 Appropriations hearings are underway in the House and Senate based on the President's FY 2016 Budget requests sent to the Hill on February 2, 2015. Earlier this week Congressman Fortenberry was acting chair in the House Appropriations Subcommittee on Military Construction during appearance of the Department of Defense and the Military Services on military facilities construction budget requests. Efforts are underway to add federal funding for the FEMA required upgrade to the Missouri River levee in this appropriations legislation.
- Word abroad in Washington is that the chairman of the House Transportation and Infrastructure Committee has intentions to initiate the development of a new Water Resource Development bill to move forward following House approval of a Congressional extension to the federal highway and mass transit trust fund reauthorization bill. Historically, the Congress has intended to enact new WRDAs in each Congress.
- EPA continues revision to the Agency's and the Corps of Engineers' proposed Waters of the United States rule. On February 4, 2016 both agencies told a Joint House/Senate hearing that the Executive Branch received 900,000 comments on that version of the rule proposed in May 2014.
 - EPA Administrator Gina McCarthy said that the Executive Branch is seeking to clarify elements of the existing rule and spoke about the hydrological connections that affect water quality.
 - The issue remains however as to the present statutory meaning of "navigable waters" and how those waters are affected. In this regard,

the agencies have chosen to rely only on the “significant nexus” description that was adopted by only one Supreme Court Associate Justice, Anthony Kennedy, in the *Rapanos* case.

February, 2014 Accomplishments

- Continued review of the FY 2015 appropriations results for the Energy and Water Appropriations bill.
- Conferred with the Corps of Engineers on the FY 2016 budget request.
- Initiated review of the process for converting Section 205 Small Flood Control Program projects to stand-alone project authorizations in future Water Resource Development legislation.
- Prepared for Washington meetings by LPR NRD representatives with the Congressional delegation and the Corps of Engineers.
- Further monitored Congressional and Executive Branch developments to finalize the Administration’s proposed Waters of the United States rule.
- Continued review of the Administration’s “flood plain rule” for FEMA’s National Flood Insurance Program to limit future Program exposure.
- Conferred with LPRNRD managers and prepared reports to the NRDs.
- Continued to search for potential funding opportunities for the LPR NRDs.
- Reviewed other reports on federal water resource issues.

March 2015 Planned, Anticipated and Potential Actions

- Continue pursuit of project funding requests for the Lower Platte River NRDs in the FY 2016 appropriations process including funding for the Section 205 Small Flood Control Program.
- Initiate LPR NRD proposals for the development of the FY 2017 Corps of Engineers budget, the process for which begins now. Section 205 projects conversion and advancement of the Lower Platte River Watershed Restoration Project authorized in 2007 are among the options for the next Administration budget.
- Confer on programs and issues related to implementation of the Water Resources Reform and Development Act (“WRRDA”) of 2014 including an increase in the federal share for Section 205 planning, design and construction that was authorized in that Act.
- Continue to pursue funding with the Administration and Congress for strengthening the Missouri River levee in Sarpy County in the FY 2016 Military Construction Appropriations bill.
- Further monitor and report on developments for the National Flood Insurance Program
- Confer with USACE contacts for converting Section 205 projects to other USACE program authorities.
- Pursue scheduling of, and prepare for, Washington meetings for March.
- Prepare reports to, and confer with management of, the LPR NRD’s.
- Continue to search for federal funding opportunities and report to LPR NRDs.

Statement for Services to the Lower Platte River NRDs for February, 2015

Date	Atty.	Description	Hours
2.2.15	RCW	Reviewed President's FY 2016 budget for the Corps of Engineers.	1.0
2.3.15	RCW	Further reviewed President's budget and reported to LPRNRDs.	1.5
2.4.15	RCW	Conferred with LPRNRDs on Platte ice jam relief success.	NC
2.4.14	RCW	Witnessed House/Senate joint hearing on the Administration's proposed Waters of the United States jurisdictional rule that included Senator Fischer.	4.0
2.6.15	RCW	Prepared for and conferred with Congressional on LPR NRD appropriations priorities. Prepared January report to the LPRNRDs.	6.5
2.7.15	RCW	Reviewed request from P-MRNRD and conferred on line with same.	.5
2.9.15	RCW	Searched DOD funding request for partnering between DOD and local governments on natural resource and related flood issues.	2.0
2.11.15	RCW	Prepared for and attended House Energy and Water Appropriations hearing on the Corps of Engineers FY 2016 budget request by the Administration. (4.0)	3.0
2.13.15	RCW	Conferred on, reviewed and prepared report on DOD Readiness and Environmental Protection program.	3.5
2.17.15	RCW	Conferred with LPNNRD on change from Sec. 205 projects to other Corps funding and prepare followup email confirming change details. Considered next steps. (1.5)	1.0
2.18.15	RCW	Conferred on AF meeting with Hill and prepared report to PMRNRD.	.5
2.20.15	RCW	Conferred with senior USACE management on Sec. 205 Small Flood Control Flood Control Projects and conversion to named authorized projects.	1.0
2.23.15	RCW	Worked on Washington meetings scheduling and preparation.	2.0
2.24.15	RCW	Reviewed and prepared talking points for the Missouri River levee project and	

	House hearings. Prepared meeting requests for LPR NRD meetings in Washington and conferred with delegation offices on same. (4.3)	3.5
2.25.15 RCW	Conferred with Hill staff regarding Offutt levee and prepared report to P-MRNRD. Conferred with Department of the Air Force regarding levee. Reviewed reports. Prepared additional report to P-MRNRD. Prepared strategy for House MIL CON hearing and inclusion of levee in FY 2016 appropriations.	4.0
2.26.15 RCW	Worked on scheduling meetings for March for NRDs.	1.0
2.27.15 RCW	Further conferred with AF and Congressional staff to prepare for House Military Construction Appropriations hearing on the AF construction budget in support of funding the Missouri River levee.	.7

Total: 35.7 hours at \$185.00 per hour = \$6,605.50

Agreement amount for this joint LPRNRD statement: \$3,300.00

I appreciate the opportunity to serve the Lower Platte River Natural Resources Districts.

Very truly yours,

/S/

Robert C. Weaver
For the Firm

December 29, 2014

On behalf of the Nebraska Water Resources Association (NWRA), I invite you to renew your membership for 2015. The NWRA has had another transformative year, including increasing the value of the association to the membership. This includes now providing a video recording of the Water Round Tables on our website; providing continuing education to engineers who are members that attend the Water Round Tables; submitting comments to the EPA on the agency's proposed changes to the Clean Water Act; and creating an electronic newsletter. This is why we need you to support NWRA for 2015!

Water continues to be an issue of critical importance to both the state and the country. Our water wealth must be carefully supervised in order to preserve the wise use of such a valuable resource. The NWRA's continuing role in this process as an educator, consensus builder, and policy developer is vitally important, especially as we continue to advocate at both the state and national that water is necessary for our economic welfare.

Your NWRA membership is an investment to support you, your organization and the people in your organization. The NWRA offers what no other association offers in the area of water policy—a growing and vibrant Association of active and informed members representing a diverse but unified and influential voice in the legislative, judicial and administrative arenas, that also reaches out to educate and inform the citizens of Nebraska about our water resources.

The NWRA is a member in the National Water Resources Association (National WRA) and have two board members that actively participate in the National WRA. The National WRA is a nonprofit federation of state organizations concerned with the appropriate management, conservation, and use of water and land resources on a national scope. As a member of the NWRA you will also have the benefit of membership in the National WRA, which provides you with timely information on what is happening at the national level in Congress and with the EPA, federal funding, FERC, the Water Resources Development Act and the Endangered Species Act. You will also receive *Irrigation Leader* magazine and *Water News Daily* that will provide you with the latest news articles, press releases and discussions about western water related issues.

The Association continues to coordinate the Water Round Table that meets from 8:00 a.m.-9:00 a.m. on the second Wednesday of the month beginning in October through May of each year. These informative, hour-long meetings are an important component of our goal to be an educator on water issues. Please let me know if you have any suggestions for topics or if you would be interested in sponsoring one the Water Round Tables.

The NWRA also coordinates the joint convention being held November 22-24, 2015, at the Holiday Inn Conference Center in Kearney that provides Nebraska water leaders like you an opportunity to participate in a conference designed to facilitate interaction and discussion about water.

February 25 2015

Lower Platte North NRD

Att: John Miyoshi

RE: Purchase of Land by David Lickteig on Feb 7th 2014

Dear John:

I have been retained by David to address the issues raised by the purchase of NE $\frac{1}{4}$ of the NE $\frac{1}{4}$ and South Half of the NE $\frac{1}{4}$ of Section 16, Township 16 North, Range 5 East of the 6th P.M., Saunders County NE, which was sold at auction 2/7/14.

See attached land Purchase Agreement and action bill and other supporting documents.

I understand that you and the Board are aware of the problem. Essentially, David paid a premium price for this property at action. The sale was advertised and confirmed in the Land Purchase Agreement that the lake was 100% on this property, referred to in contract having "no public access to any of this property". The contract also provided easement for access from the dam.

As you know, information that was in the hands of the NRD reflected that these statements were not accurate. It is apparent from aerial maps of the NRD that part of the water area is located on adjacent landowner's property. This information was not made public in the listing, sale bill or Purchase Agreement.

As you know, if a land owner has access to any of the shoreline on any navigable waters in this State, they have the right to use the full water surface. This results in the neighboring property owner having full access to what was to be an exclusive lake. Also the easement from the dam to the lake by David is on that same other landowner's property.

This came to light when the neighbor announced his intent to build on his property and allow access to the lake to others (unclear if that would be a commercial venture or not).

When there exists a misrepresentation (need not be intentional fraud)) such as this, it constitutes a breach of the contract. The offended party has remedies to correct the problem.

Those remedies include:

- 1) Rescission of the Contract: i.e. cancelling the contract, give the money back (plus attorney fees and costs) and the return of the land to the NRD.
- 2) Reformation of the Contract: i.e. make the contract conform to the actual meaning or intent of the parties.
- 3) Contractual money damages. That is determining the value of the breach. In this case the breaching party pays the difference between the amount paid and the true value of the property. This is a difficult remedy because the amount of the premium paid for exclusive use is nearly impossible to determine, and attorney fees and costs.
- 4) Specific Performance. An order of the Court to carry out the actual contract. In this case, an order to force the NRD to block the water from reaching the adjoining property, preventing access; assure the dam easement is in place and does not give the neighbor access; hence creating the exclusive use. This may be possible but cost could be quite high. Also Attorney fees.

My client is willing to listen to any proposal of the NRD to fix this problem. He however believes that the simplest way to deal with this is the rescission. He would deed back the land. The NRD would return the purchase price. The NRD would pay the interest paid on the purchase price from contact date to the return, plus other necessary and reasonable cost of completing this transaction.

We ask that this matter be placed on your agenda for consideration. I understand that you have an executive meeting on Friday. I assume that it would be referred to the appropriate subcommittee for review, input and negotiation. When resolved return to the full Board for approval.

I and my client can be there Friday morning if that would help. If it is just to refer to subcommittee, it might be better that we wait for that time. I also have dealt with government entities that have authorized their attorney to negotiate a resolution that returns to the Board for approval. That would work if this is a recession but not if we look at specific performance.

Please let me know how your Board would like to proceed.

Respectfully Submitted

/s/ Richard Register

Richard Register

SAUNDERS COUNTY LAND AUCTION

FRIDAY FEBRUARY 7, 2014 1:30

Held at the St. John's Parish Hall, Prague, NE

Offering 120 acres with Private NRD Dam Structure
with Approx. 45 acres of farm land.

Looking west across dam

This farm could make a potential home site subject to Saunders Co Zoning requirements.

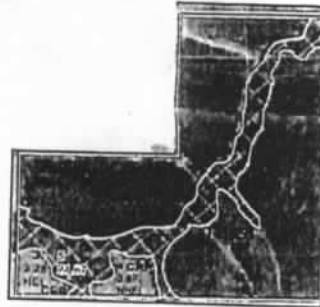

Looking east across top of dam

This farm is located 3 1/2 miles north and 2 miles west of Prague, NE. Offering 120 acres Legally Described as the Northeast Quarter of the Northeast Quarter and South Half of the Northeast Quarter of Section 16, Township 16 North, Range 5 East of the 6th P.M., Saunders County, NE. This farm has a new NRD Dam and 42 acres lake located on it. The NRD holds a permanent easement for the dam, permanent pool, temporary flood area and wildlife habitat areas all located inside the fenced area. The area inside the fence will be seeded by the NRD and can never be farmed, mowed or

Farm ground in Southeast corner

grazed. The owner of this farm has control over access to the dam site, water and wildlife areas as 100% of the lake is located on this property. There is no public access to any of this property. The NRD holds a permanent easement to operate and maintain the dam, lake and wildlife area. Please review the easement for specifics. A copy is available by contacting Kobza Realty.

Full possession of the property will be given

at final closing subject to NRD Easement and CRP Contract. The 2013 taxes are exempt. There is approximately 45 acres of cropland with 7.3 acres of that amount being enrolled in CRP at a rate of 105.43 per acre, expiring 9-30-2017. Buyer will assume and abide by the CRP contract.

TERMS: A 10% Non Refundable Down Payment will be made the day of the Auction with the signing of a Purchase Agreement by the Buyer. This sale is contingent upon approval of the Lower Platte North Board at their February 10 meeting. Upon approval of the Board, the balance will be due on March 21, 2014. Full possession of the property will be at final closing subject to NRD Easement and CRP Contract. The Title Insurance and Closing fee will be split half to the Seller and half to the Buyer. This sale is not contingent upon the Buyer getting financing and is considered a cash transaction. All announcements the day of the auction take precedence. Kobza Realty and it's agents represent the Seller in this transaction. To inspect the property, contact Kobza Realty.

402-538-2125

John J. Kobza, Assoc. Broker
Robert H. Kobza, Salesman

1221 43 1/2 Road, Bellwood, NE 68624

Made this 7th day of February, 2014 between

SELLER: Lower Platte North NRD

BUYER: David S. Leikberg
Having personally examined the premises and agree to purchase through KOBZA REALTY, agent for the Seller, the following described property:

Northeast Quarter of the Northeast Quarter and South Half of the Northeast Quarter of Section 16, Township 16 North, Range 5 East of the 6th P.M., Saunders County NE, containing 120 acres more or less.

The Buyer agrees to pay \$ 540,000.00 on the following terms:
\$ 54,000.00 down payment paid with signing of this Purchase Agreement.
\$ 486,000.00 due in CASH or by CASHIER CHECK, due on March 21, 2014.

SPECIAL TERMS:

1. Full possession will be given at closing for the 2014 crop year.
2. This sale is contingent upon approval of the Lower Platte North NRD Board at their February 10 meeting. Down payment check will not be deposited until Kobza Realty receives written notice of approval of the sale by the Board. If the Board does not approve the sale, the down payment check will be returned to the Buyer.
3. Buyer understands that the NRD holds a permanent easement to operate and maintain the dam structure, lake and wildlife habitat. Buyer must accept and abide by the LPN NRD Permanent Easement for the dam, permanent pool, temporary flood area and wildlife habitat areas all located inside the fenced area.
4. Buyer understands the area inside the fence will be seeded by the NRD and can never be farmed. Inside the fence can be mowed or grazed only with approval of the NRD.
5. Buyer understands that Buyer will have private access to the dam site, water and wildlife areas and that there is no public access to any of this property.
6. Buyer understand that there is presently a CRP contract on this farm with 7.3 acres enrolled at a rate of \$105.43 per acre, expiring 9-30-2017 and agrees to accept and abide by that CRP contract.
7. FSA will do a reconstitution of the property because of changes in farmable acres.
8. Buyer is aware an ingress and egress easement between east property owner and NRD will be in place before closing.
9. West end of the dam is on adjacent property.

Title Insurance Policy will be ordered from Nebraska Land and Title, Linda Little with the cost to be paid half by the Seller and half by the Buyer. The Seller shall have a reasonable time to correct any defects in the title. If a lender requires a Title Insurance Loan Policy, the premium cost will be paid solely by the Buyer. The 2013 and all prior taxes will be paid by the Seller.

The Seller agrees to pay the Documentary Stamp Tax, Seller's Attorney fee, and any cost necessary to give marketable title. Seller agrees to convey by Warranty Deed, free and clear of all liens but subject to any existing easements and zoning ordinances that apply to the property.

Buyer agrees to pay for their own attorney fees, the fee for recording the Deed, and all cost associated with obtaining financing and loan, if any. The Buyer understands that the property is being sold as it currently is and agrees to accept the premises and their condition as the same exists at this time.

The Seller is not aware of any previous chemical or hazardous waste dumping on the property. The Seller represents that there are no hidden defects in the property of which the Seller is aware unless noted in this agreement.

It is agreed that time is an essential element in this contract and that in case either the Buyer or the Seller fails to perform the term of this contract, the failing party shall pay the other party the sum of \$ 54,000.00 as liquidated damages for breach of contract.

This agreement shall be binding on the heirs and legal representatives of each party. The right and obligations under this Agreement may not be assigned by the Buyer with the written consent of the Seller.

Buyer is aware that the down payment check must be cashed within 72 hours of acceptance of this contract by the Sellers, with the funds being held in the Kobza Realty Trust Account in the Bank of the Valley, Bellwood/David City, NE until final closing. The down payment funds will be transferred to the title company prior to the closing.

BUYER AND SELLERS ARE AWARE THAT KOBZA REALTY REPRESENTS THE SELLER IN THIS TRANSACTION.

The Torque Models are designed to operate on the hydraulic system of a standard flow skid steer. This is the perfect tool as a tree cutter for invasive trees such as Red Cedar, Mesquite, Salt Cedar, Osage Orange, etc. They will cut a 10" tree in under 8 seconds and comes equipped with bolt on TS3 cutting teeth for low maintenance. These units are the #1 attachment for tree removal in their class.

The High Torque Fixed Boom is designed with the landowner in mind. Like all Turbo Saw models this unit has excellent visibility and with the hydrostatic drive on the skid loader this unit is excellent for selective cutting. The High Torque Fixed Boom saw is a both economical and versatile solution to your tree clearing needs.

- ☒ Safety Features

Safety is a primary concern of Dougherty Forestry Mfg. Each turbo saw has more standard safety features than the competition. The operator's manual is contained within a waterproof canister on the skid steer for easy access.

Bener \$6150.⁰⁰
 MSRP 5950.⁰⁰

Blade Shield

A shield behind the blade prevents sawdust from being directed towards the operator

SPECIAL CONSERVATION FUNDS AVAILABLE for WAHOO CREEK WATERSHED

**WAHOO CREEK
WATERSHED**
NWQI Areas 2015

For a limited time, increased funding is available to producers in the Wahoo Creek watershed for conservation practices such as cover crops, filter strips, terraces, no-till and other erosion control practices to improve water quality.

In addition to EQIP cost-share, producers who sign up for the NRCS National Water Quality Initiative by **March 20, 2015** may qualify for additional funding from the Lower Platte North NRD and Lands for Conservation for summer 2016 construction.

For more information, contact the Saunders County NRCS office or the Lower Platte North NRD.

SIGNUP ENDS MARCH 20 - CALL TODAY!
Saunders County NRCS: 402.443.4106 ext 3
Lower Platte North NRD: 402.443.4675

*Funding for these programs is being provided by the NRCS, Lower Platte North NRD, Nebraska Department of Environmental Quality, and Nebraska Environmental Trust.
USDA is an equal opportunity provider and employer.*

RE: Score – Hestekind – Well Permit

Dear Bret & Russell,

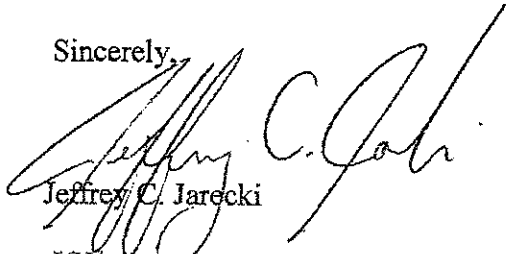

I recently spoke with each of you about a well permit that had been issued to Jane Score. The will permit was issued to Ms. Score because the Lower Platte North NRD had the understanding that a well had been drilled on Ms. Score's Boone County, Nebraska property. However, when the well was drilled it was actually drilled on property owned by Robert Hestekind and Jerry Hestekind. Because the well is located on the Hestekind property, it is in the request of the Hestekind's that the well permit be reissued in the following names:

- a. Robert Hestekind and Leona L. Hestekind, Co-Trustees
Of the Robert H. Hestekind Revocable Trust dated
December 18, 2003; and
- b. Jerry D. Hestekind and Judy K. Hestekind as joint tenants

I have enclosed a copy of a recent survey that was completed for your records.

Contact me with any questions or concerns.

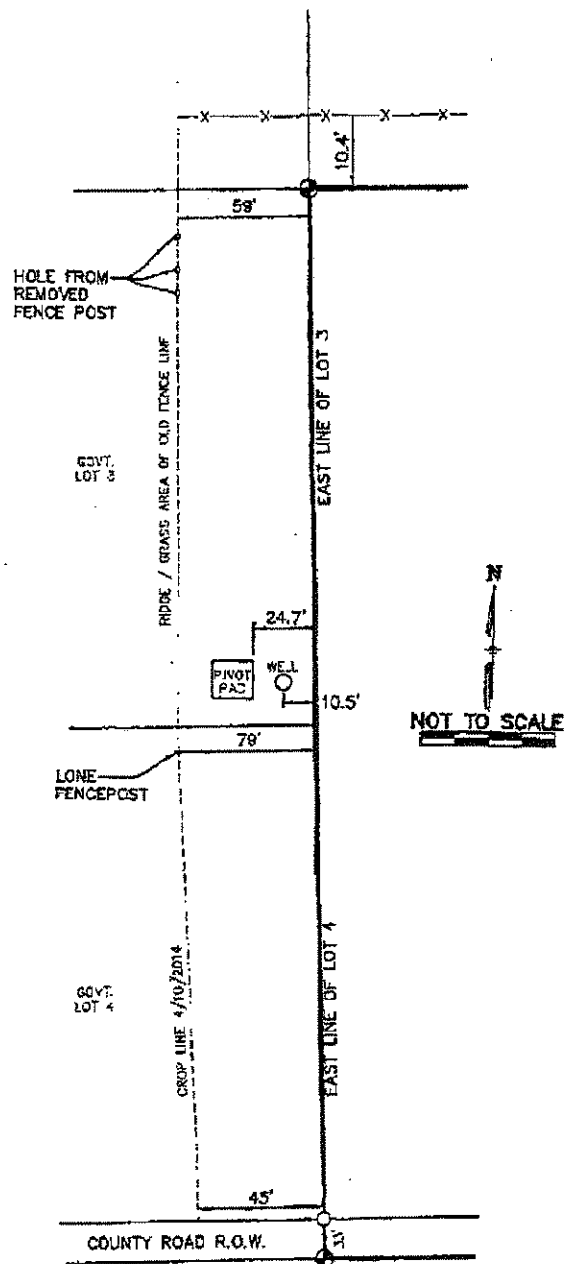

Sincerely,

Jeffrey C. Jarecki

JCJ/an

REGISTERED GROUNDWATER WELLS DATA RETRIEVAL

Note:

Information on Public Water Supply Wells is not available through this interface. Contact the Department of Natural Resources (Data Bank) at 402-471-2363 for more information. All registration documentation for water wells registered after January 1, 1969, except Public Water Supply wells, are now available.

Due to possibility of a well being in more than one series, an individual well might be listed more than once.

1 Records found.

January 26, 2015

To whom it may concern,

We would like to transfer the irrigation rights from farm exhibit A 42 acres (Well G017279 decommissioned in 2013), to farm exhibit B in which a new well was put in during the fall of 2014. Attached is well approval for farm exhibit B, also this farm was being irrigated by adjoining farm's well and pivot.

A handwritten signature in cursive script, appearing to read 'Mike Steinbach'.

Approved List of Flow Meters
Lower Platte North Natural Resources District (LPNNRD)
Effective: February 9, 2014

Approved List of Flow Meters and Required Conditions

LPNNRD requirements for all meters:

- Anti-reverse flow feature to prevent backflow.
- Follow manufactures installation recommendations taking into account in-pipe jetting or non-jetting flow conditions. (Correct installation of the flow meter is critical to getting an accurate reading. Most meters require a straight pipe before and after the flow meter that is at least equivalent to five times the pipe diameter in order to obtain an accurate flow measurement. Doing the installation correctly the first time saves money in the long run).
- Straightening vanes are required according to manufacturer's installation recommendations for in-pipe jetting or non-jetting flow conditions.
- Meter must be positioned to ensure water totally fills the pipe, such as a level pipe or positioned on a riser.
- Meter must be configured: to inside and outside diameter of the pipe, material of the pipe, meter used that will operate within minimum and maximum output flow rates of the well, horizontal or vertical installations, and unobstructed straight run distance upstream and downstream of meter and in most cases straightening vanes (or other flow straightener) will be necessary.
- Meter totalizes flow in acre inches and flow meter dial is in gallons per minute.
- A flow meter must be dedicated to each individual well. (Exceptions will be made if several wells are used to provide enough water to operate a single irrigation system such as a pivot or gated pipe. In these situations a flow meter placed at the central location where all water can be metered is acceptable).

Manufacturer	Model	Notes
McCrometer	McPropeller	All propeller models
Sparling	Propeller saddle meter	Model 312 propeller meter
ARAD Group	Saddle Water meter	Meter for irrigation applications
Geyser	Saddle meter	All propeller models for Farmland Irrigation
Senninger	Ag Rotor meter	Propeller model

LPNNRD prefers the following added features for all meters:

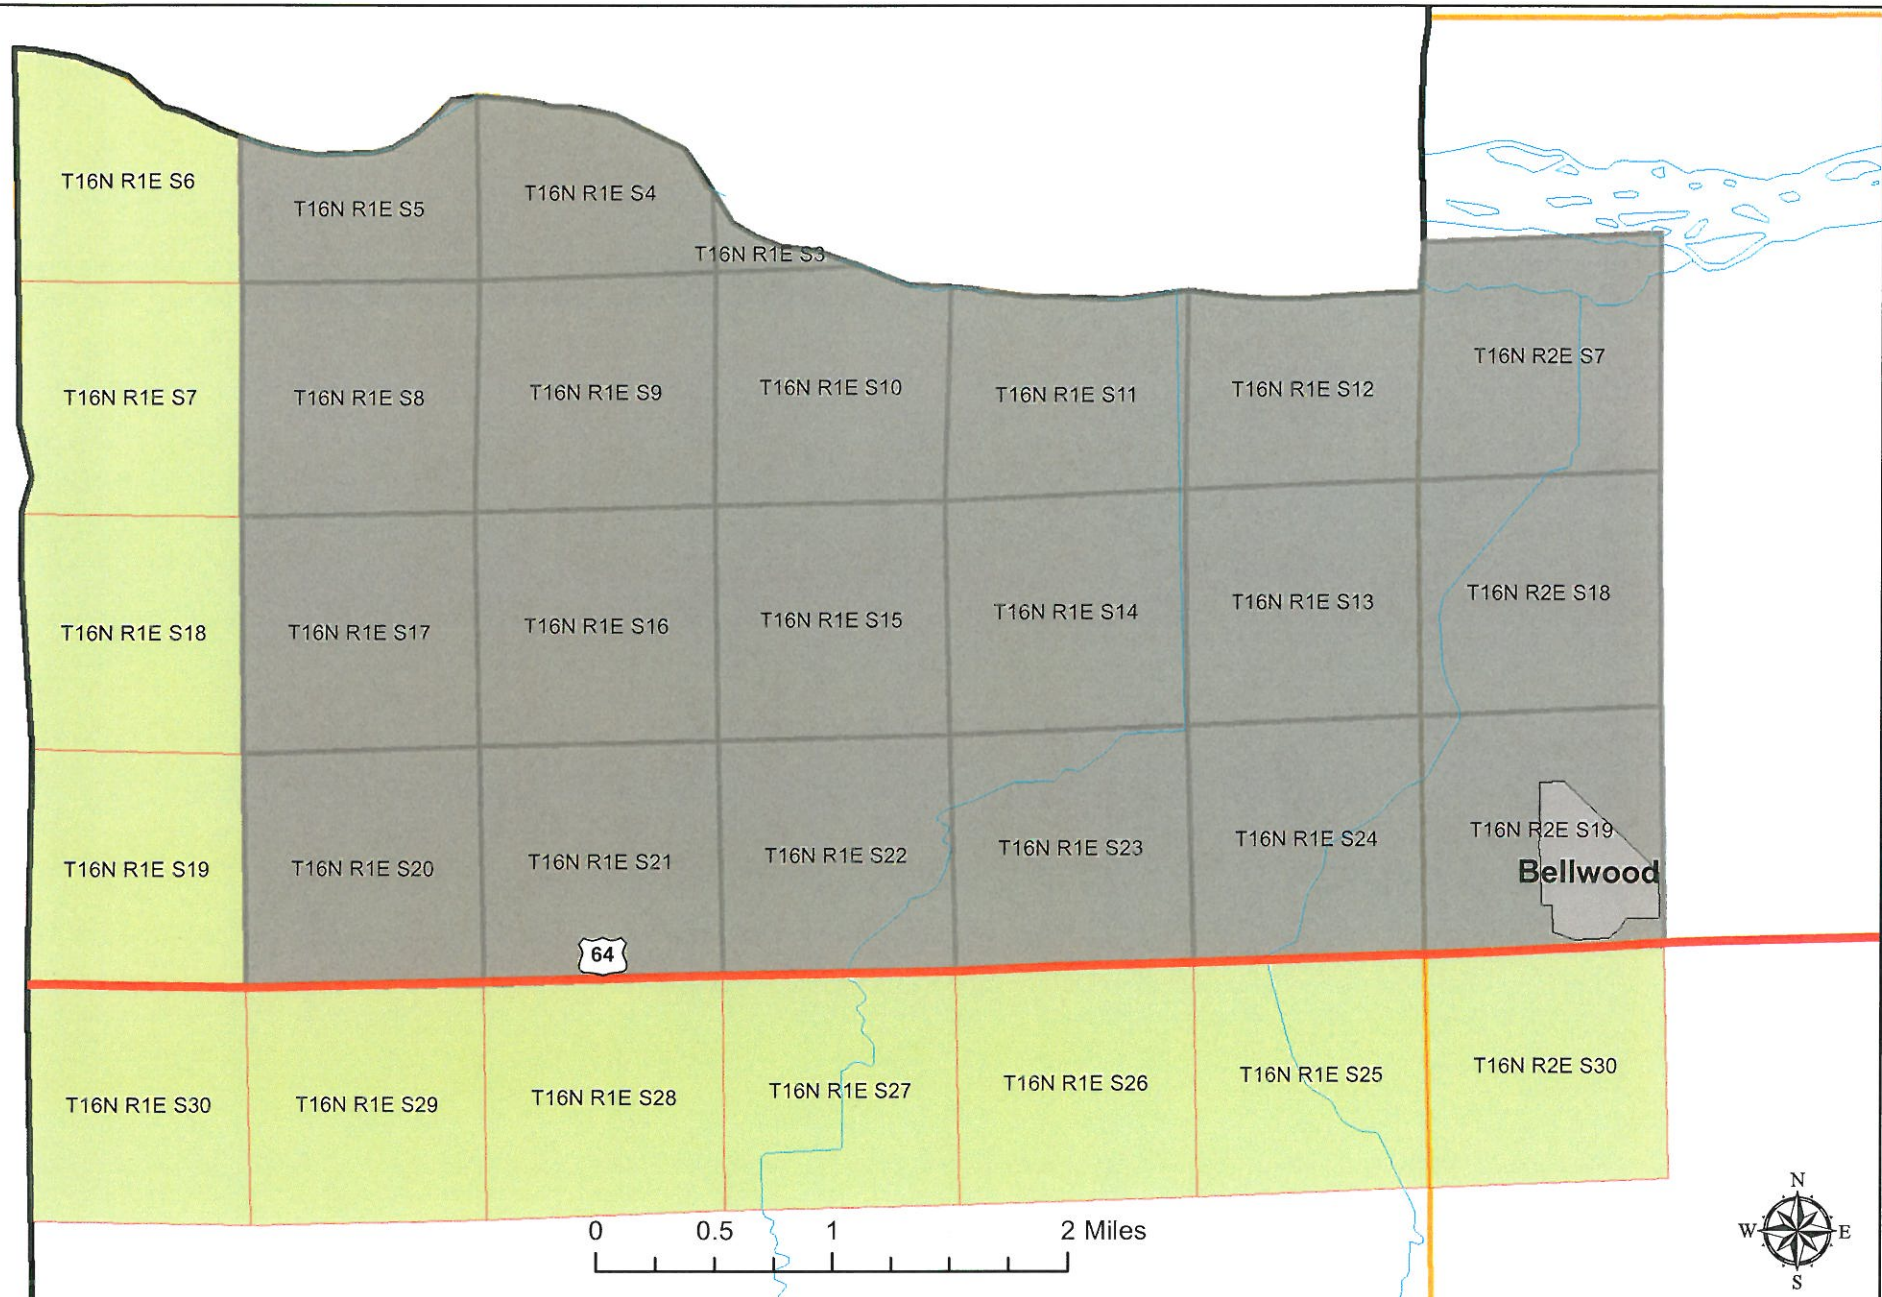

- Over-run bearing (or extra bearing) for smother operation and to extend life of the meter
- Canopy cover to protect meter

LPNNRD will inspect systems for proper installation of flow meters.

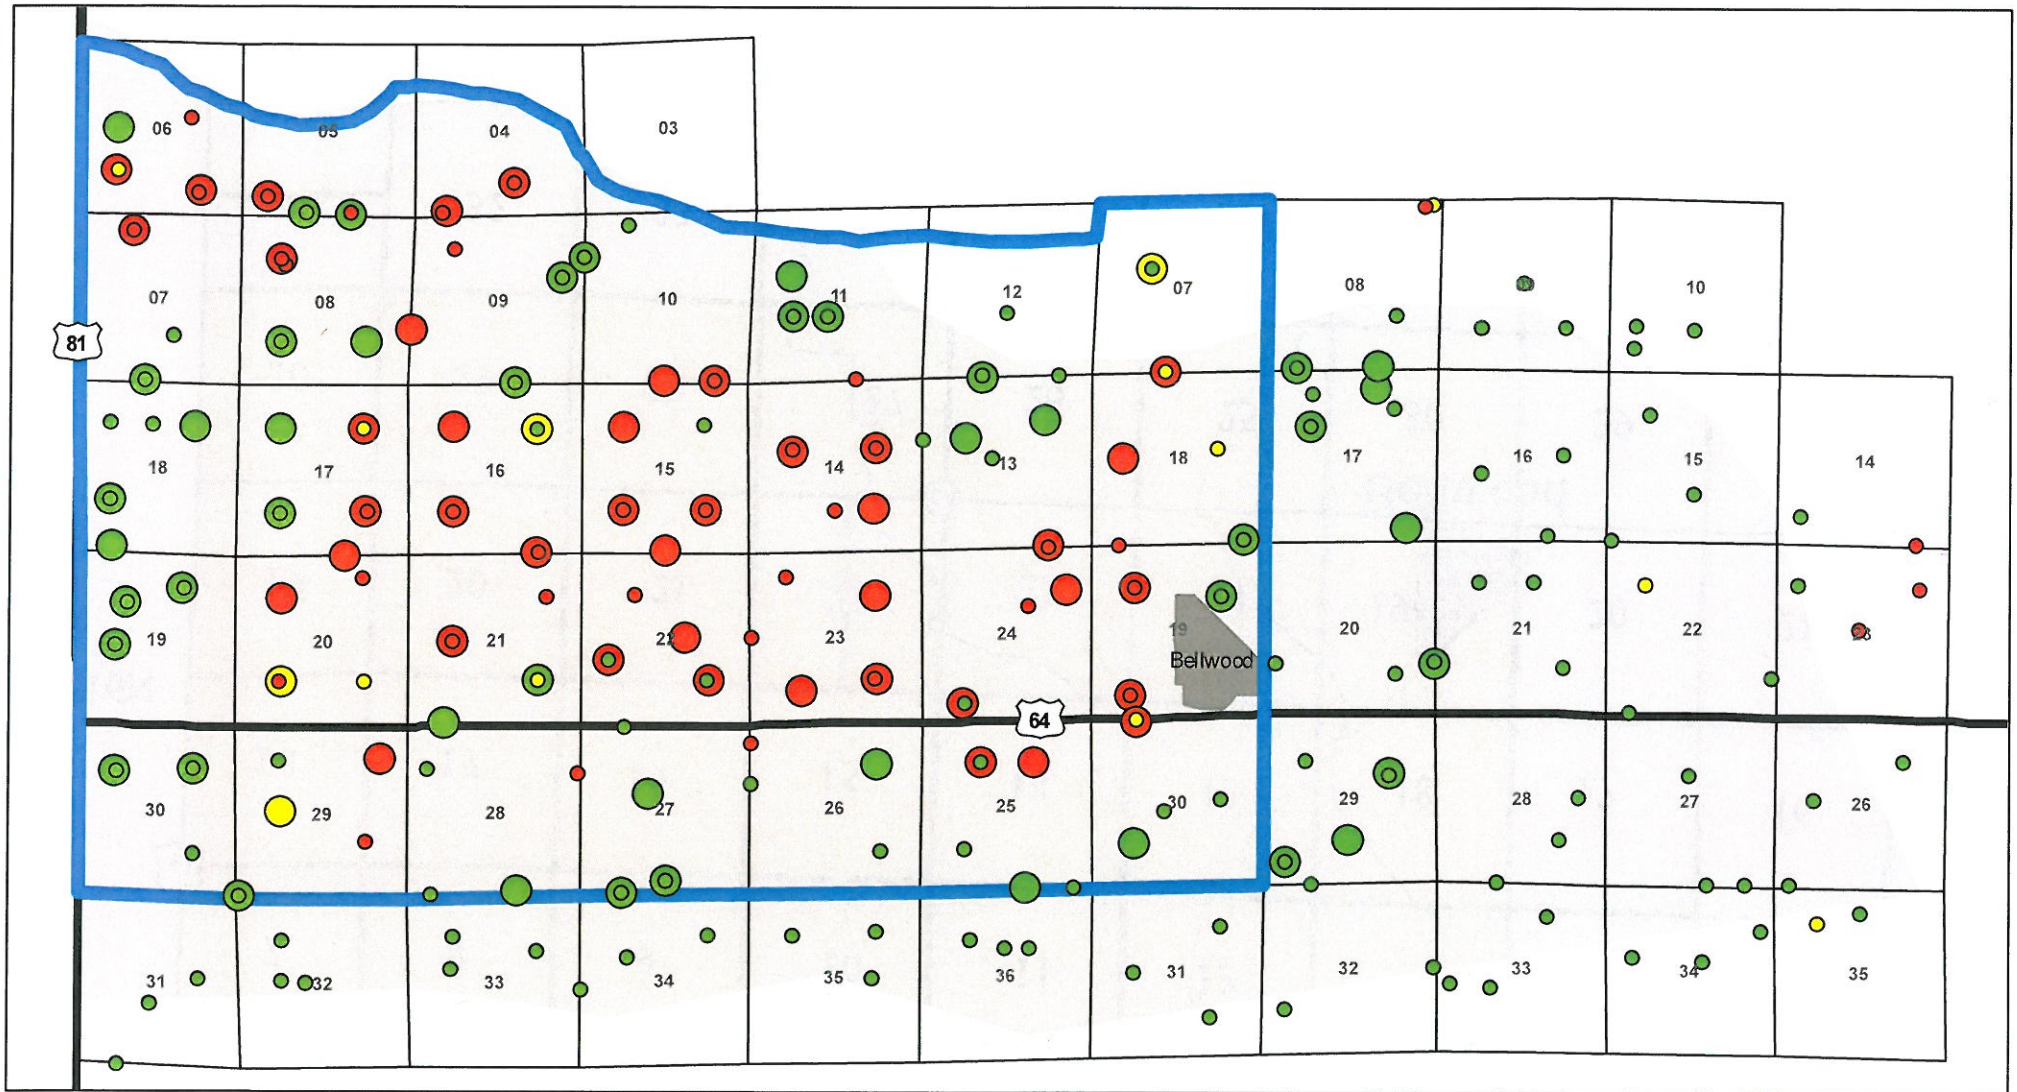

LPNNRD Flow Meter Repair and Maintenance Program

Details still being worked on, but likely a 50% cost share program.

Helicopter to Make Low-level Flights over Southeastern Nebraska in Late March

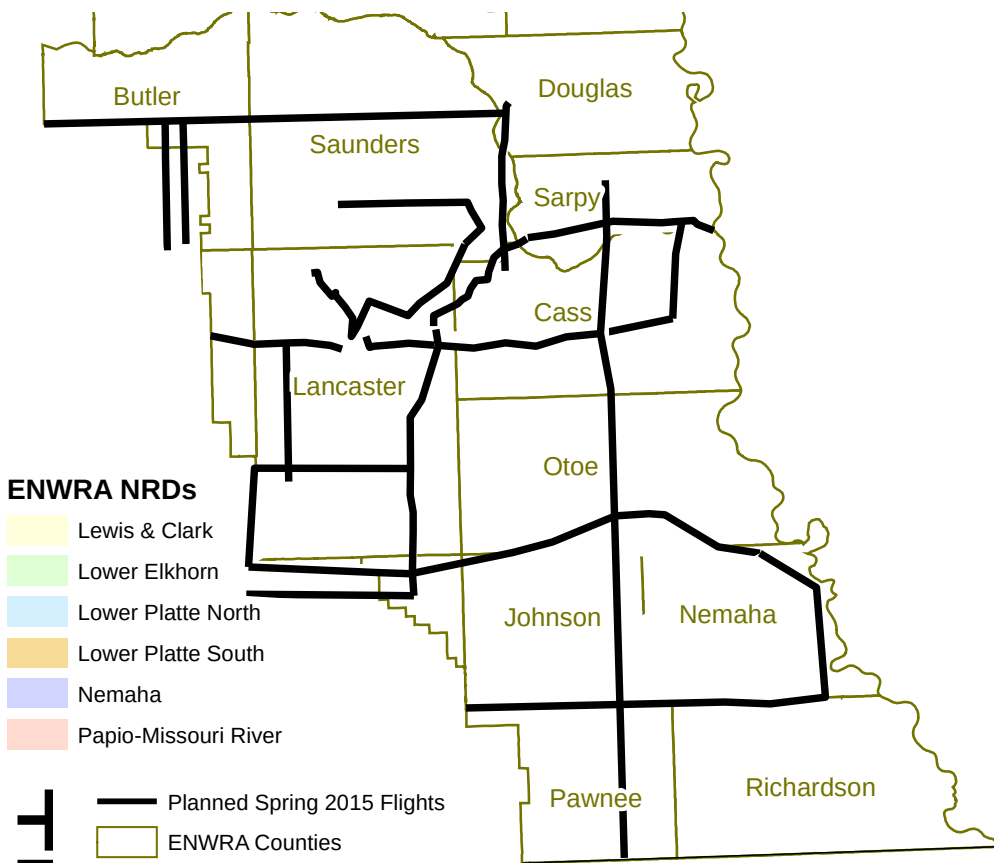

Beginning at the end of March and lasting up to 3 weeks, a low-flying helicopter will fly approximately 670 miles of flight lines across southeast Nebraska recording geologic measurements for information about buried sand and gravel aquifers in the area.

Members of the Eastern Nebraska Water Resources Assessment (ENWRA) will use this information in ongoing efforts to better understand and manage groundwater resources. Exploration Resources International LLC will oversee this project.

These flights are the southern component of ENWRA's overall flight plan for Eastern Nebraska; the northern flights were across northeast Nebraska conducted in October 2014

February 14, 2015

To: Shell Creek Watershed Improvement Group

Subject: Minutes of February 10 Meeting

The regular meeting of the Shell Creek Watershed Improvement Group was called to order by Co-chair Matt Bailey at 7:10 pm, February 10, 2015 at the USDA Service Center, Columbus, NE. Present: Matt, Ralph Pieke, Merle Stone, Eric Smith, Melissa Foreman, Tom Sprunk, Carl Groteluschen, Tom Mountford, John Hanna, Eric Gotschalk, and Gene Wissenburg.

Minutes were dispensed with due to the brevity of the previous meeting at the Water Quality Presentation/NRD meeting night.

Melissa presented the financial report showing NETF balance of \$87,851.98. Funds should be used by June 30, 2015. Contracts to be submitted for 2015-16-17 total \$28,619.60. Grants approve for future include NETF \$155,000 And NDEQ \$55,000.

We have funds available right now to hire a person to promote Conservation/Water Quality projects in the watershed. Discussion followed on who this person could be and what projects could be promoted or "sold" to farmers and landowners. No action was taken.

Discussion then followed on what to do in the next two years with the \$215,000 approved in grant funding. Grade stabilization structures can be quite expensive and will require Corps of Engineers permits. Tom Mountford encouraged members close to Shell Creek to identify bank erosion areas and "nick points" on tributaries of the creek. Lidar could also be used to find these areas. After much discussion, Ralph moved and Carl seconded to move forward on the grants for conservation and water quality efforts in the Shell Creek, in Shell Creek tributaries, and also continue with land treatments. The motion carried. These intentions will be shared with Elbert Traylor.

Discussion was held concerning liability issues and possible insurance for SCWIG board members. Tom M. will check with Lower Platte North NRD attorney and report back.

Tom M. reported on an upcoming meeting with Elbert to work on a Project Implementation Plan for the new grants. The meeting is being scheduled for February 24, 9:30 am at the NRD office in Wahoo. SCWIG members are encouraged to attend.

Melissa is checking on a possible date and time for Newman Grove and Schuyler Water Quality team presentations at CCC, Columbus. This could happen in early March.

The meeting adjourned at 9:10 pm.

Respectfully submitted,

Gene Wissenburg, secretary

March 3, 2015

To: Shell Creek Watershed Improvement Group

Subject: Minutes from February 24, 2015 meeting

A special meeting of the Shell Creek Watershed Improvement Group was held in Wahoo at the Lower Platte North NRD office with DEQ present as well. The meeting began at 9:55. Those present were Tom Mountford, Matt Bailey, Ray Flood, Ralph Pieke, Eric Gottschalk, Melissa Foreman, Eric Smith, Mike Archer, Elbert Traylor, John Hannah, and Carla McCullough.

The meeting began with discussion of the PIP and what NET has approved. A breakdown of the grant apps was shown to DEQ. A few ideas brought to the table were to have more planning to get stuff on the ground that would include more construction projects. The area that will be targeted first would be the Loseke and Taylor tributaries to find places to begin work.

Matt stated that Carl talked with landowners and he found no opposition from any of them on doing construction projects for stream bank stabilization. This gives way to possible starting points. As for some engineering NRCS expertise could be a possibility to save on some of the cost associated with it.

Next discussion was on how to use up the remaining funds of the NET grant. Melissa will check with NET to see if some of the funds can be used for the preliminary work on these stream bank stabilizations for the design and engineering of the work. Funds could also be used up by purchasing new signs to replace the current highway signs in the watershed. Thought would be use the poster we had and use it as a campaign. The group thought it would be best to use a more durable sign.

Matt Bailey said he would have a possible spot that some of the preliminary work could begin. There also needs to be a few other locations that would be ready to go where landowners are willing to do something. Stream bank stabilizations would be the main idea with these locations. These structures do not require buffers, permits are usually a quick process with a public notice of 30 days.

The main goal is to identify 3 sites to have engineers go in and see what can be done. Have them give the best design. It was recommended the softer the construction the better. Before any work could be done a biologist would need to come in and look at the site to check for species habitat.

Melissa will be in contact with NET to request a six month extension to get the funds used up. She will also check to see the group can use remaining funds to complete the preliminary work with the design and engineering. One other thing to check was the possibility of switching the grant over to the NRD and not PrairieLand RC&D.

Tom Mountford brought up the liability question he asked the NRD's lawyer. After getting answers on this, it would probably be best if the Shell Creek Watershed group be an advisory committee to the NRD board.

Tom was going to work on reworking the budget a bit to include stream bank stabilizations. Be sure that you make the categories broad so more can be included. If the category is not used up you still have the option to use it at a later time.

Other topics discussed were what other land treatments will be available. Will septic systems still be available? They would be but the cost share rate could be changed to whatever the group likes. And the entire watershed would be open at one time. Another topic was about the designated meeting area. If the designated area for meetings was changed and was held at a place that charges a fee, that expense can be reimbursement in the grant.

Meeting adjourned at 11:10. Next meeting for the Shell Creek Watershed will be March 10 before the Shell Creek Watershed Water Quality Presentations at CCC in Columbus.

Sincerely, Melissa Foreman, Shell Creek Watershed Project Coordinator

Tom Mountford

Subject: RE: Shell Creek Watershed Improvement Group (SCWIG) Liability Question

Tom,

I have reviewed the information and documentation you provided. While this entity has a "constitution" and "by-laws" I would take the position that it is still just an advisory subcommittee of the Lower Platte North NRD. As a result, any claims against it should be directed to the NRD rather than in the name of the "Shell Creek Watershed Improvement Group" which technically doesn't exist as a separate entity.

In a perfect world it would make sense for the District to:

- 1) I would suggest that you begin by asking LARM for a written coverage opinion as it relates to both your E&O coverage for the appointees as well as any lawsuits brought against the NRD and/or the advisory group for property damages claims. I will be honest in that I'm not sure you have insurance coverage based on the way I understand LARM's insurance to work.
- 2) Discuss with the board LARM's coverage opinion;
- 3) Have the chair formally appoint SCWI as an advisory subcommittee for the District;
- 4) Ask for the board to affirm the chair's appointments;
- 5) Restructure the "Constitution" and "By-laws" as informal policies established by the advisory subcommittee. This cleans up the fact that SCWI created documents which on their face purport to bind the group (in fact only the NRD has that authority). The board can later ratify those policies if you want.
- 6) Going forward it will then be key that this advisory subcommittee doesn't take any action on behalf of the NRD but rather only makes recommendations to the NRD.

I believe the above actions are necessary in order to protect against the argument that this entity is an unincorporated charitable association under Nebraska Revised Statutes 21-608 et. seq.

Please contact my office should you have any questions or concerns. Thank you.

Monthly Report for February 2015

Meghan Sittler, Coordinator

Recreation Planning

In February, I met with staff from the Corps of Engineers, National Park Service and the Nebraska Game and Parks Commission to review the current draft Recreation Plan for the Lower Platte River Corridor and identify our proposed final recommendations to be included within the plan. We will be working on finalizing the plan in March and hope to have a full draft available for review by LPRCA members and the public in the beginning of April. In March we will also start working closely with the National Park Service to begin to pull together a stakeholder advisory group and lay out a plan for the “roll out” of the plan. We anticipate a mixed approach including some public meetings to present the plans, meetings with city, counties and other stakeholders as well as print and electronic media. We are very excited about finishing the plan and moving to implementation.

River Obstruction Removal

At their February Board of Directors meeting, the Lower Platte North Board of Directors approved a board motion to request that the River Obstruction Removal project be placed on the agenda for the April 21st LPRCA Quarterly Meeting. The motion also states that LPNNRD is fully supportive of the work of the LPRCA with the exception of the focus on the obstruction removal effort. At the January Quarterly Meeting LPRCA members had approved a motion for rebidding to occur to identify if the estimated costs of the removal project had changed from bids received in September 2013 or were markedly different than the current engineer’s estimate. I attended LPNNRD’s Projects Committee meeting at the end of February and discussed the project with the committee members. I also reviewed this at with the Papio-Missouri River Board of Directors during my report at their February Board Meeting. Additionally, in February I discussed the project with Olsson Associates who have been assisting the LPRCA with the permitting, design, engineering and bidding since the inception of this removal project at Two Rivers in 2009. Olsson Associates is currently talking to contractors about their interest in the project and are awaiting a decision by the LPRCA before advertising the project for bids.

Sandbar Dynamics Study

The Nebraska Environmental Trust Board has preliminarily approved the third and final year of funding for the USGS-led Sandbar Dynamics Study. The past two years of the study have been entirely funding by the Trust and USGS. The initial two years of the project were funded cooperatively by LPSNRD and USGS. The Sandbar Dynamics study is an extension of work that the LPRCA has done under the Lower Platte River & Tributaries Authority Cumulative Impact Study. The Sandbar study field work will be completed this summer with the final report being completed in 2016. We appreciated the continued support of the Nebraska Environmental Trust!

FY2016 Budget

It's hard to believe that it's already time to put together the FY2016 LPRCA Budget. Time flies! I spent time in February reviewing projects and programs and identifying work and grant applications to be included in the proposed FY2016 Budget. I also began putting together a questionnaire that will be sent out to LPRCA members in March. The goal of the questionnaire is to find out from members their priorities and the LPRCA's potential to help address those; identify the LPRCA proposed projects and how they relate the goals of the LPRCA; and finally to begin the "discussion" of the LPRCA budget. I also began scheduling meetings with members of the LPRCA. The budget will be formally presented at the April 21st LPRCA Quarterly Meeting which will be held at 9 a.m. at LPSNRD in Lincoln.

Upcoming Events:

Nebraska Water and Water Law Conference, Thursday March 19 and Friday March 20. University of Nebraska Lincoln College of Law

NARD Washington D.C. conference, March 21-25.

NARD Runahoo at Wanahoo 5K and 1 mile Fun Run. Saturday, April 11, Lake Wanahoo, Wahoo.

LPRCA Quarterly Meeting, April 21, 2015, 9:00 a.m. LPSNRD.

LPRCA Kayak Tour. Monday, June 15th, 2015. TBD

LPRCA Water Quality Open. Thursday, August 27th, 2015. Quarry Oaks Golf Course, South Bend.

Monthly Report for January 2015

Meghan Sittler, Coordinator

Recreation Planning

Focus on the Recreation Planning Study continued again throughout January. The Planning Study is being conducted as part of the Corps of Engineers' Planning Assistance to States Authority. A draft of the final report was received by the LPRCA in early January. I spent time reviewing the report as well as writing additional sections of the report in January. The revised draft will be sent back to the Corps in early February. A meeting is planned in February to fully review the report and develop recommendations and an implementation schedule. The report should hopefully be completed in spring of this year.

River Obstruction Removal

The LPRCA had submitted a Recreational Trails Program (RTP) grant application in September, 2014. The grant requested funds to assist with the removal of the abandoned bridge piers on the east half of the Platte River at Two Rivers State Recreation Area. In January we received notification that the project did not receive funding from RTP. The LPRCA currently has banked funds on hand for the removal as well as a Nebraska Environmental Trust grant to assist with the construction however the estimated project cost is still over 2 times higher than the money on hand. The way forward on the obstruction removal project was discussed at the LPRCA Quarterly Meeting which was held on Wednesday, January 21st at LPNNRD. A suggestion was made to rebid the project in April/May of this year to determine if any costs associated with the project could be reduced. Rebidding could help evaluate if all or only a portion of the planned removal could occur, if additional funds need to be requested from the NRDs or any other potential sources (if some would be found), or if the project should be placed on hold. A motion was made by Marlin Petermann, P-MRNRD to rebid the project and determine necessary action following rebidding. The motion was seconded by Glenn Johnson, LPSNRD, and approved by consensus by the LPRCA members.

At the end of January, I had a discussion with John Miyoshi, LPNNRD and on a separate occasion a conversation with Bob Clausen, a member of LPNNRD's Board of Directors. During those conversations I was informed that the Executive Committee of LPNNRD's Board of Directors had a lengthy discussion of the obstruction removal project and the LPRCA at their January meeting. The Executive Committee has recommended that the Board approve a motion that requests that this issue be placed on the April LPRCA Quarterly Meeting for further discussion. The motion also states that LPNNRD is fully supportive of the work of the LPRCA with the exception of the focus on the obstruction removal effort. I told both John and Bob that I would of course continue to facilitate discussion on this project with the LPRCA members and the NRDs' Boards of Directors to find a resolution that takes into account the perspective of all the NRDs and members of the LPRCA. The committee motion will be acted upon by the full LPNNRD Board of Directors at their regular February meeting.

LPRCA Quarterly Meeting

As was mentioned in the previous paragraphs, the LPRCA held our Quarterly Public Meeting on Wednesday, January 21st at LPNNRD. The meeting began at 9 a.m. Agenda items included both of the previously discussed items—the Lower Platte River Recreation Plan and the River Obstruction Removal at Two Rivers SRA. Additional agenda items included the Great Plains Ecotourism Coalition, a recap of the LPR Summit that was held in November, discussion of ESRI ArcGIS Online services for the LPRCA GIS current and planned GIS datasets, and updates on the NRD IMPs and LPR Basin Plan as well as the WRDA authorized projects in each NRD and the LPRCA. I also provided a recap of last year's budget input session and discussed some potential budget items for FY2016. In late February I plan to send the presentation with some additional information and a questionnaire out to the LPRCA members. I hope that I will be able to use information collected from the questionnaire and meetings to follow to help prioritize the FY2016 budget. The budget will be presented at the next LPRCA Quarterly Meeting scheduled for April 21st at 9:00 a.m. at LPSNRD in Lincoln.

Upcoming Events:

UNL Geography Seminar, Friday, February 13, 2 p.m. Hardin Hall 228, University of Nebraska-Lincoln.

I will be providing a presentation about the work of the LPRCA and importance of the LPR and Corridor

Nebraska Water and Water Law Conference, Thursday March 19 and Friday March 20. University of Nebraska Lincoln College of Law

NARD Washington D.C. conference, March 21-25.

April 21, 2015, LPRCA Quarterly Meeting, 9:00 a.m. LPSNRD.
