Non-federal Share Funding for Certain Medicaid Payments

Medicaid is a program jointly funded by federal and state governments. The federal government provides matching funds to states for a specific percentage of Medicaid expenditures, called federal financial participation (FFP). The amount of FFP is calculated using a state-specific Federal Medical Assistance Percentage (FMAP). To receive federal funding, states must use public funds generated at either the state or local government level as the non-federal share of Medicaid expenditures.

In Texas, locally derived funds are used to finance a vast majority of the non-federal share of Medicaid supplemental and directed payments. All states must provide the non-federal share of Medicaid funding to receive federal matching funds. The non-federal share funds are provided to HHSC from governmental entities through two methods: intergovernmental transfers or the certified public expenditures process.

Intergovernmental Transfers (IGTs)

Intergovernmental transfers (IGTs) are transfers of public funds from a governmental entity to the state. The state receives federal matching Medicaid funds for IGTs used as the non-federal share. The transfer of funds must occur before a Medicaid payment is made.

Some Medicaid payment programs that use IGTs as the non-federal share include: Comprehensive Hospital Reimbursement Increase Program (CHIRP), Disproportionate Share Hospital (DSH), Graduate Medical Education (GME), and uncompensated care payments for hospital providers.

Certified Public Expenditures (CPEs)

Certified public expenditures (CPEs) are expenditures that have been certified by a governmental entity to represent its contribution of public funds in providing services that are eligible for federal matching Medicaid funds. Governmental entities will report CPEs to the state and the state will then claim the federal matching funds. States have the flexibility to retain some of the matching funds.

Some Medicaid payment programs that use CPEs as the non-federal share include: Public Health Provider - Charity Care Program (PHP-CCP), School Health and Related Services (SHARS), and uncompensated care for governmental ambulance providers.

Types of Local Funding Used in Texas

In accordance with federal law, local governmental entities may opt to use eligible public funds to support the Medicaid program. Many local governmental entities in Texas choose to support the Medicaid program to ensure that their community members have access to essential health care services regardless of a patient's ability to pay.

There are many eligible sources of public funds that a local governmental entity may use to fund the Medicaid program; however, it is important to keep in mind that no federal funding may be used to generate the non-federal share. For example, a local governmental entity that receives a federal grant may not use those funds as eligible local public dollars to support the non-federal share. A local governmental entity can, however, use state-appropriated funding, funds received through the implementation of an ad valorem tax, funds appropriated from other local governmental entities, patient revenue (so long as no federal payor program funds are used), tuition or fees at state institution of higher education, or through the implementation of a health-care related tax.

In Texas, some jurisdictions have chosen to implement a Local Provider Participation Fund (LPPF), which is a health-care related tax that is implemented on a local level, administered by an existing unit of local government, and that is designed specifically to meet federal requirements associated with eligible local funds. The local government operating an LPPF will collect mandatory payments (i.e., taxes) from the non-public hospitals located in the local government's jurisdiction. LPPF funding collected by the local governmental entity is then provided to HHSC through an IGT for use as the non-federal share of Medicaid payments just like other eligible sources of local funding.

Currently, 32 jurisdictions have the authority to operate an LPPF. In 2019, House Bill 4289 provided authority for a local government not currently operating an LPPF to have the ability to operate one.

Medicaid Supplemental Payment and Directed Payment Programs

(As of April 16, 2025)

Texas Medicaid is a joint federal and state health insurance program for low-income families, older adults, and persons with disabilities. The federal government matches each state's Medicaid spending at a predetermined rate that varies by state. Healthcare providers (e.g., hospitals, doctors, nursing facilities, etc.) receive payments for the services they provide to persons with Medicaid.

The federal government allows each state to develop its own method to reimburse providers for the healthcare they provide to persons with Medicaid. Generally, states' Medicaid payments fall into three broad categories: base payments, supplemental payments and directed payments.

I. Directed Payment Programs (DPPs)

Directed Payments allow states to set parameters for Medicaid managed care spending to assist states in achieving their overall goal of delivery system and payment reform, as well as improved performance. Specifically, a state is permitted to direct Medicaid Managed Care Organizations (MCO) to make certain payments to healthcare providers, either through an adjustment to the monthly base capitation rates or through a separate payment term.

A. Comprehensive Hospital Increase Reimbursement Program (CHIRP)

The Comprehensive Hospital Increase Reimbursement Program (CHIRP) is a statewide program that increases Medicaid payments to hospitals for inpatient and outpatient services provided to persons with Medicaid. Texas MCOs receive additional funding through their monthly capitation rate from the Texas Health and Human Services Commission (HHSC) and are directed to increase payment rates for participating hospitals. As designed, eligible hospitals receive a percentage increase paid on claims submitted to a Medicaid MCO. CHIRP's purpose is to advance goals and objectives in the state's Medicaid quality strategy by incentivizing improved quality and access for hospitals that serve persons with Medicaid.

B. Rural Access to Primary and Preventive Services (RAPPS)

The Rural Access to Primary and Preventive Services (RAPPS) is a directed payment program that incentivizes primary and preventive services for persons with Medicaid in rural areas of the state enrolled in STAR, STAR+PLUS, and STAR Kids. The program focuses on the management of chronic conditions.

C. Texas Incentives for Physicians and Professional Services (TIPPS)

Texas Incentives for Physicians and Professional Services (TIPPS) is a physician-directed payment program (DPP) for certain physician groups to help cover the cost of healthcare services provided to persons with Medicaid enrolled in STAR, STAR+PLUS, and STAR Kids. Eligible physician groups include Health-Related Institution (HRI) physician groups, Indirect Medical Education (IME) physician groups, and other physician groups. These classifications allow the HHSC to direct reimbursement increases where they are most needed and to align with the program's quality goals. TIPPS also serves as a transition from the Network Access Improvement Program (NAIP) and Delivery System Reform Incentive Payment (DSRIP) program for specific physician groups.

II. Supplemental Payment Programs (SPP)

Supplemental Payments are Medicaid payments to healthcare providers that are separate from and in addition to base payments. Supplemental payments give additional funding to certain healthcare providers, like hospitals. The payments may be made in a lump sum. However, some supplemental payments may be linked to achieving certain goals or to support healthcare providers that see significant numbers of uninsured persons without much money. For example, states may provide supplemental payments to providers to support quality initiatives, residency training for doctors, and certain types of facilities (e.g., rural or safety net providers).

A. Disproportionate Share Hospitals (DSH)

Federal law requires Medicaid programs to make special payments to hospitals that serve a disproportionately large number of Medicaid and low-income patients. These hospitals are called Disproportionate Share hospitals (DSH) and receive DSH funding. DSH funds are different from most Medicaid payments because they are not tied to specific services for Medicaid-eligible patients. DSH payments are the only federally allowed Medicaid payment explicitly for the unpaid costs of care for uninsured patients. It can also be used by states to offset low Medicaid base payments.

B. Uncompensated Care Payments (UC)

Uncompensated Care (UC) payments originated as a way for Texas to continue expanding managed care in Medicaid programs and making supplemental payments to hospitals. Texas UC payments may be used to reduce the actual uncompensated cost of medical services provided to uninsured individuals who meet a provider's charity care policy.

C. Graduate Medical Education (GME)

Graduate Medical Education (GME) supplemental payments support medical residency training for medical school graduates at teaching hospitals. Teaching hospitals typically incur additional costs because they are a training site for medical school graduates to receive hands-on, practical experience in treating patients. In addition to medical residents' salary and benefits, teaching hospitals also incur additional costs for more testing and for treating sicker and more complex patients.

D. Hospital Augmented Reimbursement Program (HARP)

The Hospital Augmented Reimbursement Program (HARP) is a statewide supplemental program providing Medicaid payments to hospitals for inpatient and outpatient services that serve Texas Medicaid fee-for-service (FFS) patients. The program serves as a financial transition for providers historically participating in the Delivery System Reform Incentive Payment (DSRIP) program. HARP will provide additional funding to hospitals to assist in offsetting the cost hospitals incur while providing Medicaid services.

E. Medicaid Managed Care Aligning Technology by Linking Interoperable Systems for Client Health Outcomes Program (ATLIS)

Aligning Technology by Linking Interoperable Systems for Client Health Outcomes Program (ATLIS) are incentive arrangements with MCOs for achieving certain milestones on a semi-annual basis with the intention that the milestones will build on prior accomplishments over a 5-year period. The milestones will center around MCO achievement of necessary actions required to implement the structures, processes, and use of client data transmitted electronically between MCOs and providers in their networks to improve client outcome measures and to implement, evaluate, improve, and mature alternative payment models for Medicaid beneficiaries.

Re: Emergency Medicine Support Letter Agreement

Mr. Dominguez,

This Letter Agreement (“Letter Agreement”), effective December __, 2023 (the “Effective Date”), is entered into by and between CHRISTUS Spohn Health System Corporation (“Spohn”) and Nueces County Hospital District (“NCHD”) (hereinafter each referred to as a “Party” and collectively as the “Parties”) to set forth the terms and conditions upon which NCHD shall provide Support (as defined below) for Spohn’s Emergency Medicine Residency Program (“EM Program”) subject to the terms and conditions set forth herein.

As you know, the NCHD Board of Managers (the “Board”) determined that, among other things, (i) the provision of Support to Spohn’s EM Program is in furtherance of NCHD’s constitutional and statutory mission and purpose to provide or arrange for indigent care to the community; (ii) the public is receiving adequate consideration from the Support; and (iii) there are adequate controls in place to ensure that the Support is, in fact, used in furtherance of the NCHD’s constitutional and statutory mission and purpose.

Now, therefore, in consideration of the premises, the mutual benefits to be derived from this Letter Agreement, and other good and valuable consideration, including the convenience of the Parties, the receipt and sufficiency of which is hereby acknowledged, the Parties agree that this Letter Agreement shall be performed and executed by the Parties as follows:

During the Term (as defined below) of this Letter Agreement, Spohn shall (i) maintain its EM Program; (ii) seek in good faith to match a minimum of twelve (12) EM Program residents (“EM Residents”) for the 2024 – 2025 through the 2029 – 2030 Academic Years,¹ subject to the

¹ The term “Academic Year” means July 1st through June 30th of each year during the Term.

maintenance of historical qualification and credential standards;² (iii) maintain an academic university-affiliated teaching affiliation for EM Program faculty; (iv) provide the level of academic faculty administrative support needed to maintain Accreditation Council for Graduate Medical Education (“ACGME”) accreditation; and (v) provide market-competitive compensation subject to “fair market value” and other requirements of applicable exception under the Physician Self-Referral Law at 42 U.S.C. §§ 1395nn and implementing regulations for EM Program faculty and EM Residents (collectively, the “EM Program Commitment”).

In consideration of and subject to Spohn’s performance EM Program Commitment, NCHD agrees to provide the following support payments to Spohn each of the following Academic Years (collectively “Support”):

- **2024 – 2025 Academic Year** – The lesser of (i) \$1,402,500 or (ii) Spohn’s Actual Costs
- **2025 – 2026 Academic Year** – The lesser of (i) \$2,847,500 or (ii) Spohn’s Actual Costs
- **2026 – 2027 Academic Year** – The lesser of (i) \$4,250,000 or (ii) Spohn’s Actual Costs
- **2027 – 2028 Academic Year** – The lesser of (i) \$4,250,000 or (ii) Spohn’s Actual Costs
- **2028 – 2029 Academic Year** – The lesser of (i) \$4,250,000 or (ii) Spohn’s Actual Costs
- **2029 – 2030 Academic Year** – The lesser of (i) \$4,250,000 or (ii) Spohn’s Actual Costs

Spohn’s “Actual Costs” shall mean Spohn’s direct expenses, overhead allocations using generally accepted Medicare reimbursement principles, and indirect medical education (“IME”) expenses determined as fifty percent (50%) of Spohn’s IME reimbursement.

At the end of each Academic Year Quarter,³ NCHD will pay Spohn one-fourth (1/4) of the Support for the applicable Academic Year. Within five (5) months after the conclusion of Spohn’s Medicare cost reporting year (“Cost Reporting Year”), Spohn shall provide NCHD with a report reflecting its Actual Costs for the preceding Cost Reporting Year. In the event Spohn’s Actual Costs for such Cost Reporting Year are less than the estimated Support paid by NCHD for such Cost Reporting Year, then Spohn shall refund such surplus within thirty (30) days of its provision of the report to NCHD.

The term of this Letter Agreement will be six (6) years commencing with the 2024 – 2025 Academic Year (i.e., July 1, 2024) and ending following the 2029 – 2030 Academic Year (i.e., June 30, 2030) (the “Term”). However, this Letter Agreement will automatically terminate in the event (i) Spohn does not match a single Resident to the EM Program for the 2024 – 2025 Academic Year, or (ii) the EM Program loses its accreditation as a graduate medical education (“GME”) program at any time during the Term. In the event this Letter Agreement is terminated, Spohn’s

² In the event Spohn is unable to match 12 EM Residents, the Support shall be proportionately reduced as outlined below.

³ “Academic Year Quarter” means the three-month periods during each Academic Year ending on September 30th, December 31st, March 31st, and June 30th.

obligation to comply with the EM Program Commitment and NCHD's obligation to provide Support shall cease.

In the event (i) Spohn decides it wants to discontinue the EM Program during the Term and NCHD does not oppose such decision, (ii) Spohn decides not to continue the EM Program for the 2030 – 2031 Academic Year, or (iii) Spohn is unable to meet ACGME sponsoring institution requirements during the Term, NCHD may identify an alternate sponsoring institution within Nueces County ("Sponsoring Institution") to accept transfer of the EM Program. If NCHD identifies an alternate Sponsoring Institution willing to accept transfer of the EM Program, Spohn will timely transfer sponsorship of the EM Program to such alternate Sponsoring Institution in accordance with published ACGME sponsorship guidelines. Neither Party shall have any obligation to fund the EM Program if Spohn transfers the EM Program to another Sponsoring Institution as provided herein. Notwithstanding the foregoing, if NCHD is unable to identify an alternate Sponsoring Institution, Spohn shall have no obligation to transfer the sponsorship of the EM Program.

In the event Spohn is unable to match twelve (12) EM Residents annually that meet the EM Program Commitment during the Term, Spohn will meet with NCHD in good faith and apply a proportionate reduction to the Support to ensure NCHD receives a benefit from program cost savings, and Spohn will not be considered in breach of this Letter Agreement. By way of illustration, in the event Spohn matches six (6) EM Residents for the 2024 – 2025 Academic Year instead of twelve (12) EM Residents, NCHD's Support to Spohn shall be proportionately reduced to the lesser of \$701,250 or Spohn's Actual Costs (i.e., 50% of the amount of Support set forth above for the 2024 – 2025 Academic Year).

In the event Spohn obtains incremental funding from a third-party with respect to any Academic Year during the Term in excess of the funding it is receiving as of the Effective Date of the Letter Agreement in support of the EM Program, the Parties will reduce NCHD's Support by an amount equivalent to such incremental third-party funding. The Parties acknowledge that Texas Medicaid has proposed and plans to implement a Medicaid GME reimbursement program. In calculating a reduction to NCHD Support attributable to Medicaid GME, (i) only Medicaid GME amounts attributable to periods on or after the 2024 – 2025 Academic Year will apply to the reduction; and (ii) the reduction will be limited to the federal share of any Medicaid GME payments Spohn receives, multiplied by the number of EM Residents divided by total residents.

The Parties agree to conduct a medical needs assessment for the Nueces County community ("Community Needs Assessment") within one (1) year of the Effective Date of this Letter Agreement. The Parties agree to meet in good faith within six (6) months of the completion of the Community Needs Assessment to (i) discuss how best to address the medical needs identified by the Community Needs Assessment and (ii) identify resources to address such medical needs.

Neither Party has any obligation to fund any needs identified through the Community Needs Assessment.

The Parties agree that this Letter Agreement is a standalone agreement and separate and apart from the Parties' other agreements.

Sincerely,

Jonny Hipp, Administrator, CEO

IN WITNESS WHEREOF, the Parties hereto by their duly authorized representatives have executed this Letter Agreement on the 14th day of December, 2023.

3Dhealth, a Wisconsin corporation ("3D"), agrees to provide consulting services ("Consulting Services") to Nueces County Hospital District ("Client"), in connection with Client's project ("Project") of completing a comprehensive physician needs assessment and patient access analysis for Nueces County, Texas. 3D and Client (collectively, "Parties") understand and agree that 3D shall perform the following Consulting Services, which are of a ministerial nature in support of Client in its Project.

Project Scope

Activities

- ✓ Conduct a Kick-Off Meeting with a designated contact at Client and any additional key stakeholders to:
 - Confirm project objectives and approach
 - Discuss 3Dhealth's approach, methodology, data sources, timing and deliverables
 - Agree on the Project Plan and timing for key milestones including:
 - Physician Supply Verification
 - Draft Surplus/Deficit Analysis
 - Patient Access Study
 - Nueces County Physician Needs Assessment Presentations
- ✓ Estimate the demand for office-based physician services for Nueces County.
 - Utilize 3Dhealth's proprietary Physician Demand Model to determine the projected demand for physician services for Nueces County.
 - The model was developed with utilization data purchased from the leading actuarial firm Milliman.
 - The commercial physician encounter rates are based on Milliman's proprietary database from nationwide commercial group data representing encounters from over 550-million-member months.
 - Medicare encounter rates are based on the Center for Medicare and Medicaid Services' 5% sample data file, which is comprised of data representing encounters from over 13.8-million-member months.
 - Considers age and gender distribution of the Nueces County population
 - Includes 45 office-based physician specialties and 25 pediatric sub-specialties.
 - Assumes physician productivity utilizing a five-year rolling average of the MGMA median physician productivity benchmarks
- ✓ Compile and verify the physician supply database for Nueces County.
 - Develop a comprehensive physician supply database for Nueces County utilizing a number of public and private sources
 - To further increase the accuracy of the database, verify records with primary research and telephone calls to physicians' offices as needed. Additional research is typically completed in the following circumstances:
 - Age: If a physician's age was not uncovered during the database compilation, 3Dhealth gathers estimates using medical school graduation dates, birth years, or birth dates as available

- Locations: Physician FTEs are adjusted for physicians that spend time practicing at multiple offices - both inside and outside of Nueces County - based on the days of the week spent at each office (e.g. two days at office 1 and two days at office 2 equate to a 50%/50% location split)
 - Specialties: If a physician practices multiple sub-specialties, his or her FTE is split between the sub-specialties
 - Productivity: Physician FTEs are adjusted for time spent performing non-clinical duties, such as teaching, research, or administrative duties. In the absence of actual FTE data or information, academic physicians are assigned a 0.67 FTE (or portion thereof if explicitly identified as a part-time provider)
- ✓ Complete the Patient Access Study.
 - For all office-based physicians within Nueces County, place phone calls to the practice to test for:
 - Whether practices are open or closed to new patients
 - The next available new patient appointment wait time
 - Whether the practice offered an alternative appointment - e.g., APP or physician partner, or alternative site
 - Call scenarios can be customized by specialty and payer type at Client's discretion.
 - Collect and tabulate the results of the Patient Access Study:
 - Number and percentage of physicians by specialty open, closed or selectively open to new patients
 - Minimum, maximum, and average wait times for the next available new patient appointment by specialty, practice, and/or physician
 - The number of practices that offered an alternative if they were closed to new patients or if wait times were excessive
 - Benchmark the results of the Patient Access Study against patient expectations and 3Dhealth's national experience based on our work across the country.
- ✓ Calculate current physician FTE supply by specialty for Nueces County
- ✓ Calculate the resulting current and five-year projected surplus or deficit of community physicians for the Nueces County population.
- ✓ Conduct a conference call to review the draft surplus/deficit results and physician supply database.
- ✓ Incorporate any feedback.
- ✓ Compile the results of the Patient Access Study.
- ✓ Issue the final Nueces County Physician Needs Assessment.
- ✓ Conduct in-person and virtual meetings/presentations, as needed.

Patient Access Study Methodology

Patient Access Study Initial Findings

Percent of Calls with No Answer or Wait Time Provided

Patients Referred for Better Access

- 3Dhealth had a greater percent of incomplete calls, due to long hold times or voicemail only options, among Nueces County physicians than the national experience.
- 3Dhealth's Research Associates were referred, unprompted, to an alternative physician, APP, phone number or other location during 8%, or 30 of the completed calls, which is similar to the 3D national experience.

Open vs. Closed Physicians

- Access to primary care physicians in Nueces County is better than the 3D National Experience.
- No physicians in Nueces County were selectively open, such that they required patients' charts for review prior to determining acceptance of new patients.¹⁰³
