% Difference	-2.1%	-2.2%	-0.9%	0.3%	-1.0%

Source : WPS State Reporting, District Enrollment Report (11/12/22)

- Actual district-wide enrollments were 1% (-20 students) lower than projected; greatest deviation (-10) students at Intermediate School
- Kindergarten Projections were within 2 student of actual

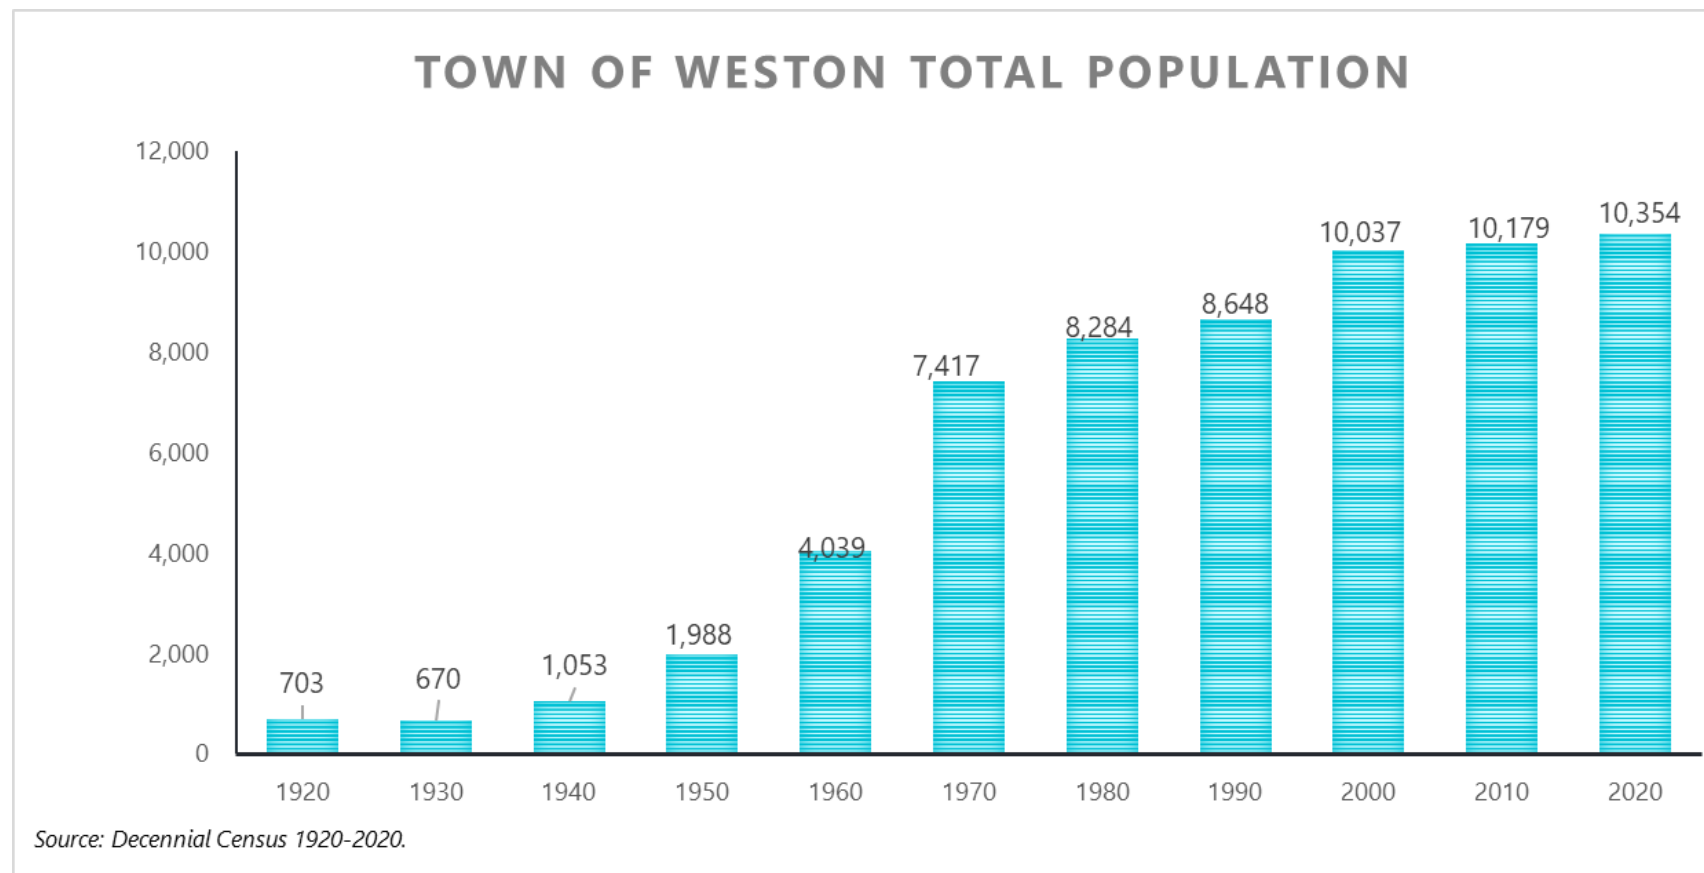

# Enrollment Projection Update

---

## Update of Enrollment Drivers

# Total Population

- According to the 2020 US Census, Weston' population is now 10,354, a growth of 1.7% over the last decade.
- Reliable total population projections using the 2020 census data have yet to be published

# Population Change

- According to Census & ACS, there have been age shifts within the population between 2010 and 2020
- From 2010 to 2020, Median age increased from 42.0 to 47.6
- Notable growth in the young adult (20 to 34) and older adult (55+) age groups, corresponding with the large millennial and baby boomer cohorts.
- Notable decrease in the 40 to 44 year old age cohort, who are likely to have older school-aged children
- Females of Child Bearing Age once again declined by ~20% from 2010-2020, similar in scale to the decline experienced from 2000-2010

**Weston Estimated Population Change 2010-2020**

Source: Census 2010, ACS 5-Year Estimates 2020

# Weston Resident Births

- In spite of decline of Females of Child Bearing Age enumerated in the US Census 2020 data, reported births have been increasing since 2018
- 2022 births estimated at 76. Full year 2022 birth estimates are extrapolated from Jan. – Sept. (56) reported births.
- Last 3 full years, annual births averaged 68 compared to 55 from 2015-17

# Unemployment

- The local unemployment rate peaked at 6.4% in 2020, but has since dropped to 3.6% 2022 YTD
- Improving UE rate locally, county and statewide for 2022
- The economic impact and employment trends of the pandemic should continue to be closely monitored, as conditions are closely tied to migration and housing market trends

Weston, FFLD County & CT Unemployment Rates, 2005 - 2022 YTD

# Single Family Home Sales

- Single Family Home Sales peaked in 2020 at nearly 280 sales
- For 2022, YTD sales (150) have continued to drop from the recent peak in 2020. Full year 2022 estimate yield 203 total sales, still well above the recent pre-pandemic levels
- Condo sales are negligible with <2 sales reported annually

# Median Housing Price

Weston Median Sale Price Single Family Homes (2000-2022 YTD)

Source: Warren Group Town Stats, 2000-2022; 2022 Jan.-Sept. YTD

Comparison of Median Single-Family Home Sale Prices: 2008 and 2022 YTD

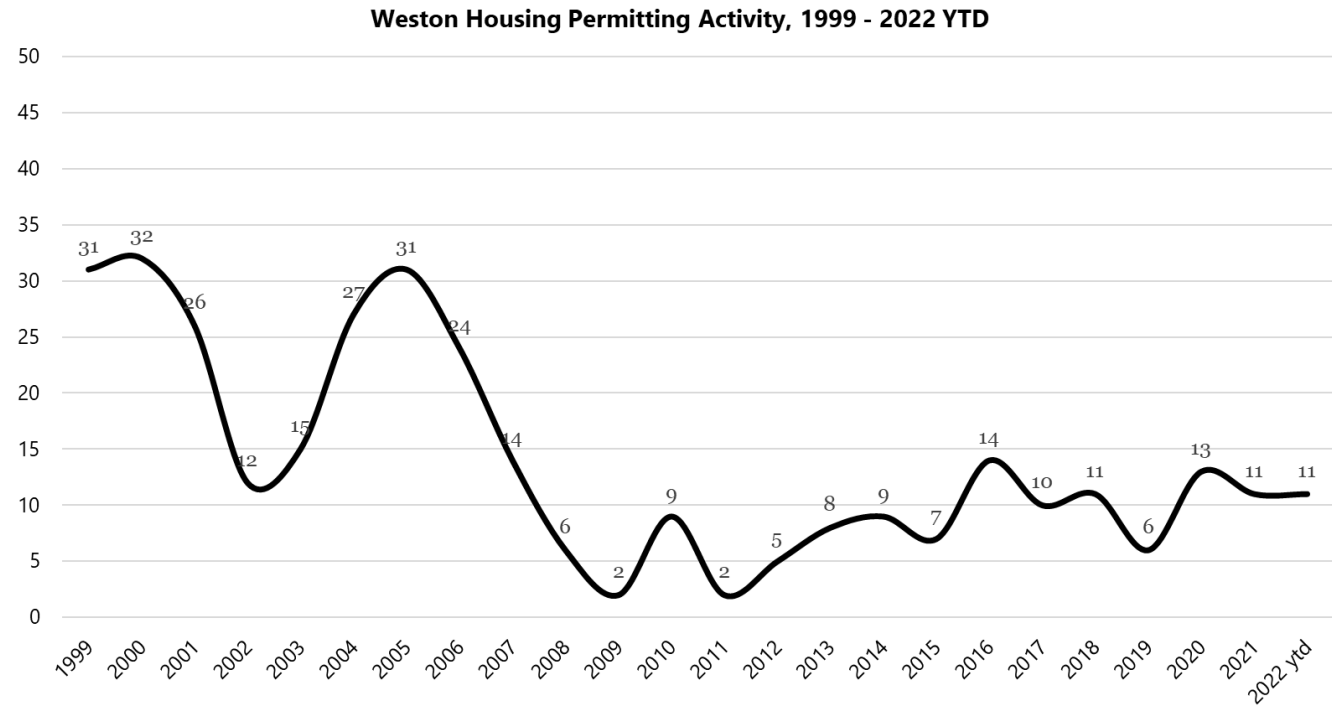

Source: The Warren Group, 2021 (Jan-Aug)

- 2022 YTD median single-family sale price: \$1,075,500; exceeding prior peaks of \$985,000 in 2021 and \$969,500 in 2006

# Housing Starts & Land Use

- Permits for new housing construction average 10 over the last 10-years
- Permits and construction activity is on existing lots.
- New subdivision activity is constrained by limited availability of land. A few challenging properties are being “explored”. Yield will be low at potentially 3-7 lots, however, there is no application at this time, and development is not imminent
- Newly created Village District Regulations are in effect as of October 2021; no development has been proposed to date

Source: CT DECD Building Permits 1999-2022, 2022 building permits through September YTD Town of Weston's Land Use Department.

# Enrollment Projection Update

---

## “Big Picture” Snapshot of Enrollment Drivers

# Changing Demographics: Population Growth

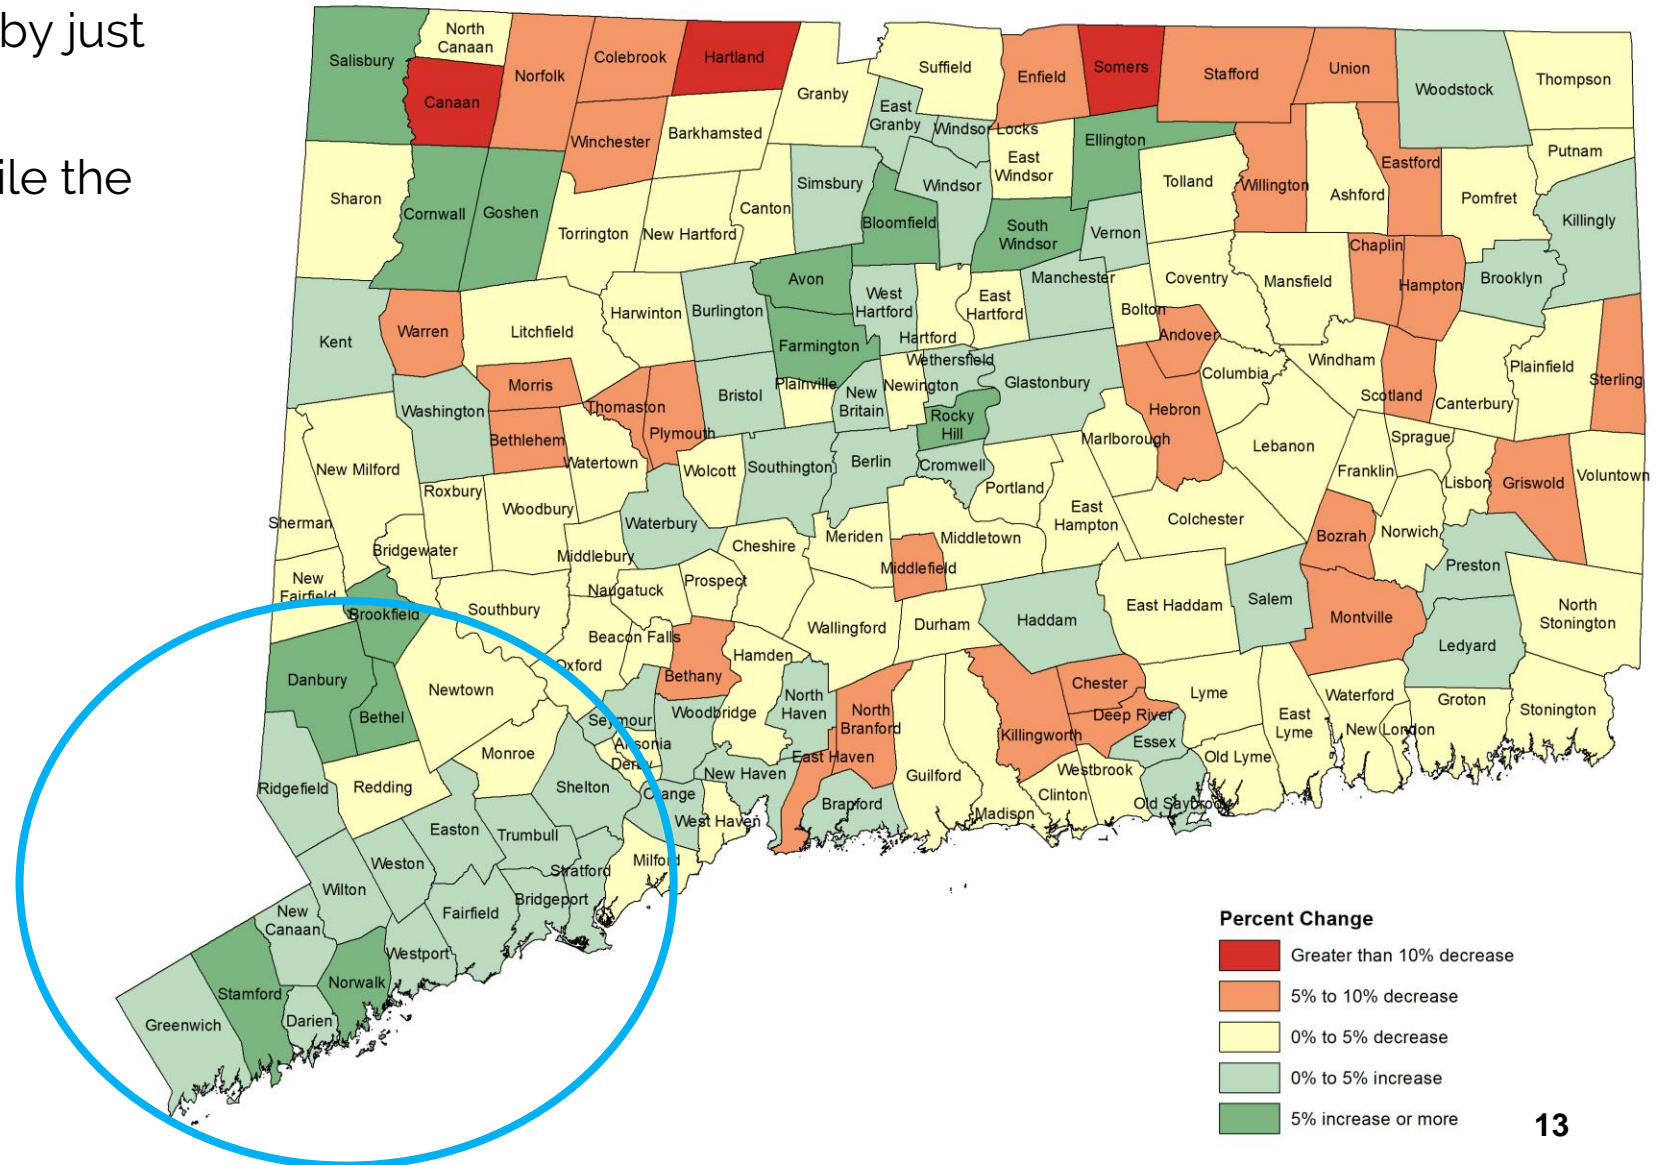

- Overall CT's population grew by just 0.9% between 2010 and 2020
- 69 out of 169 towns grew, while the other 100 shrank.

## Fastest Growing Towns:

- Salisbury (12%)
- Stamford (11%)
- Cornwall (10%)
- Bethel (10%)
- Danbury (7%)

## Fastest Shrinking Towns:

- Canaan (-12%)
- Somers (-10%)
- Hartland (-10%)
- Winchester (-9%)
- Scotland (-9%)

# State Trends: Births

State of CT Births: 2010 to 2021

Source: Connecticut Department of Public Health

- Births have continued to decline over the last twenty years.
- Post-COVID "Baby Boom" in 2021, shows substantial increase compared to 2020

# State Trends: Births

- Overall births decreased between 2012 and 2021
- Many suburban communities have seen births increase during this time period
- Most urban communities have seen births decrease during this time period

# State Trends: Birth-K Ratios

**Birth-K Ratio =**

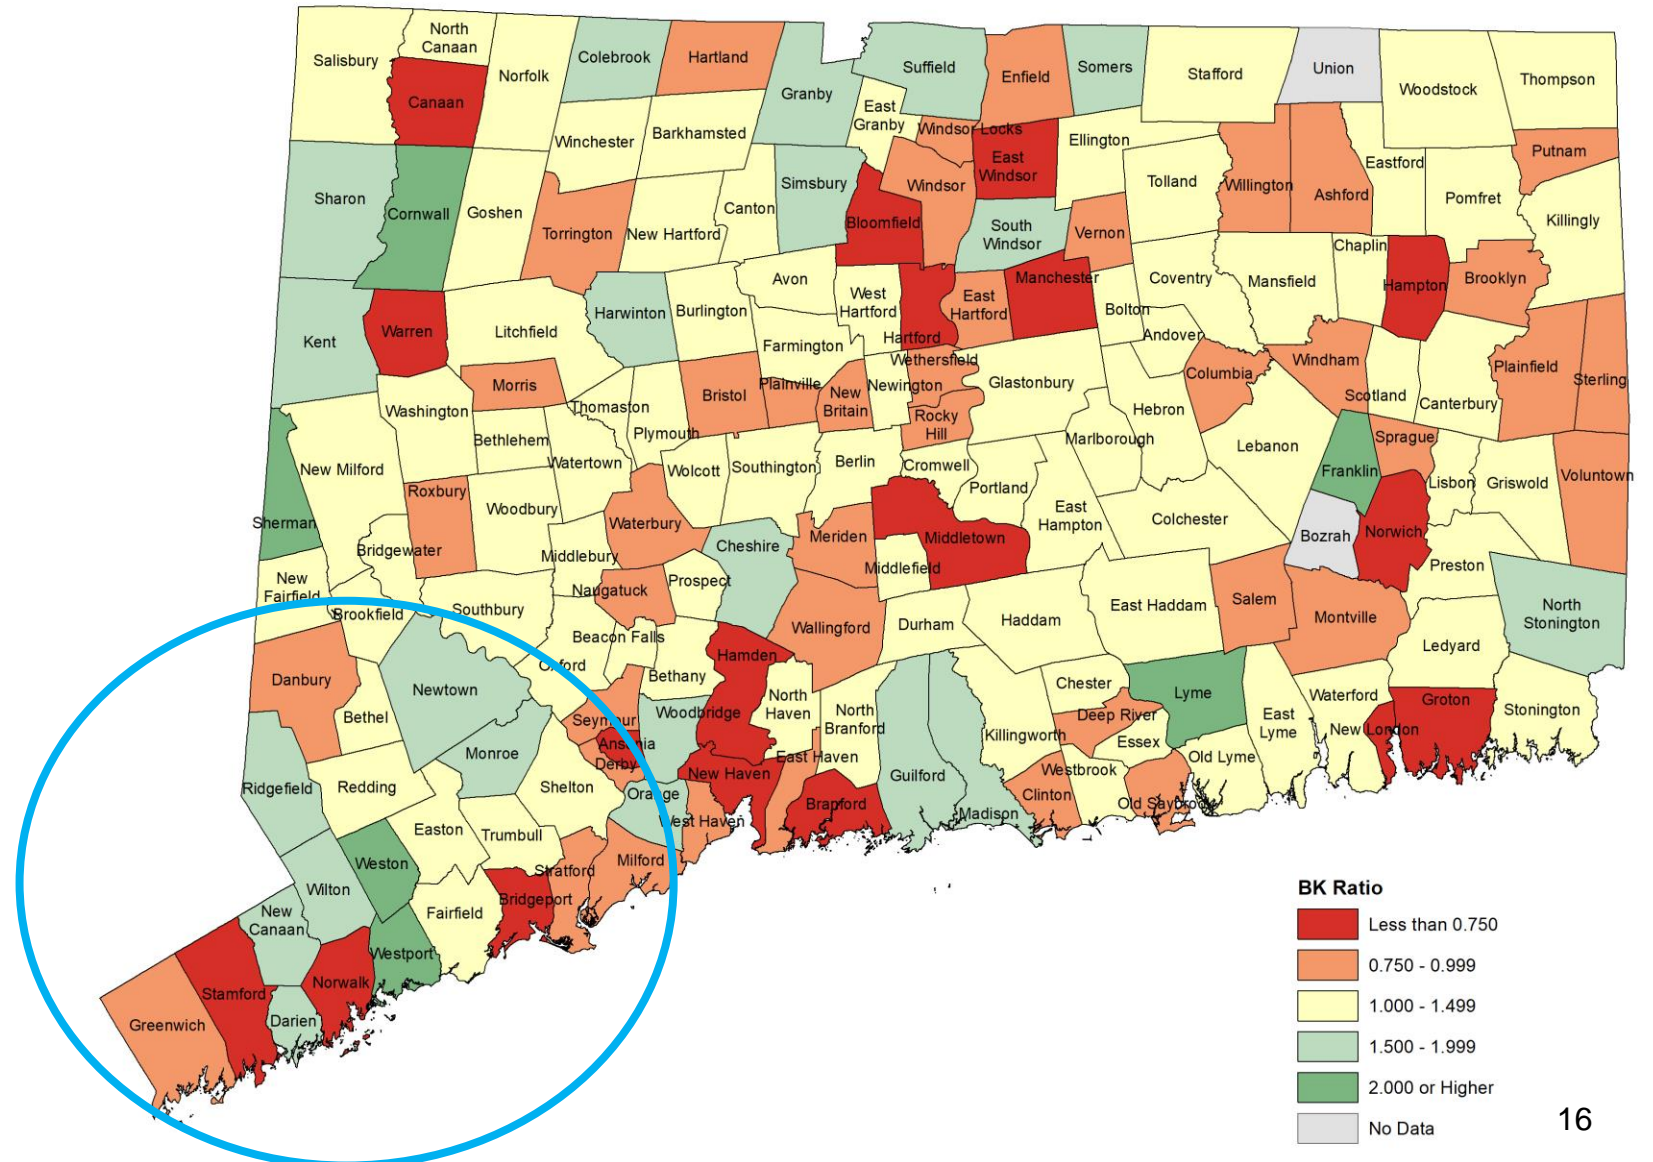

Kindergarten Enrollment  
Births 5-Years Prior

**Birth-K Ratio > 1 =**

Gain of children from  
birth to 5

**Birth-K Ratio < 1 =**

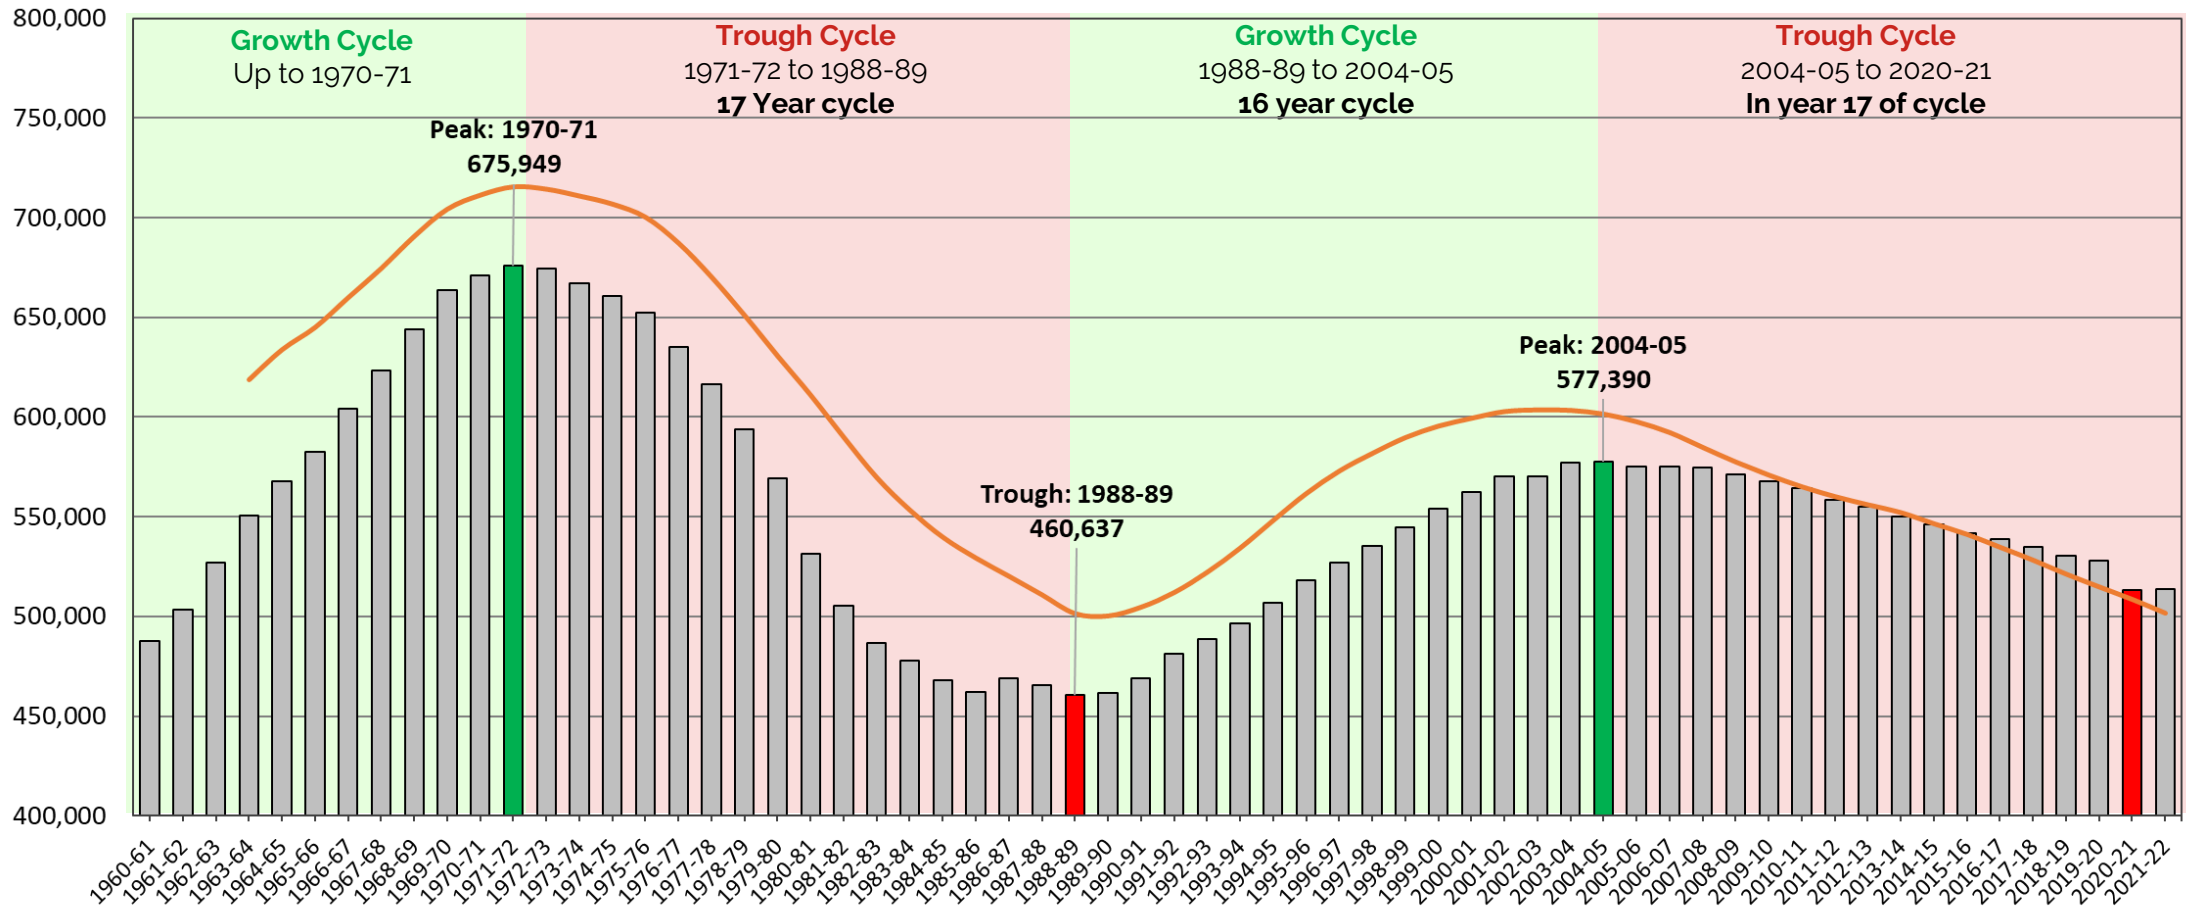

Loss of children from  
birth to 5

# State Trends

## Public School Enrollment in Connecticut: 1960 to 2021

Data Sources: 1960-61 through 2006-07 data provided by the National Center for Education Statistics - Enrollment in Public Elementary and Secondary Schools, by State  
2007-08 through 2021-22 enrollment data is estimated based on Connecticut State Department of Education enrollment.

CT Enrollment Sum of Associated Birth Cohorts

# State Enrollment Trends

- Enrollment decreased by 7.4% over the last ten years
- After sharp decrease in 2020-21, enrollment stayed stable for the 2021-22 school year, returning to historic trend line
- Small Increase in 2021-22 for first time in a very long time

Connecticut Public School Enrollment Trends: 2010-11 to 2021-22

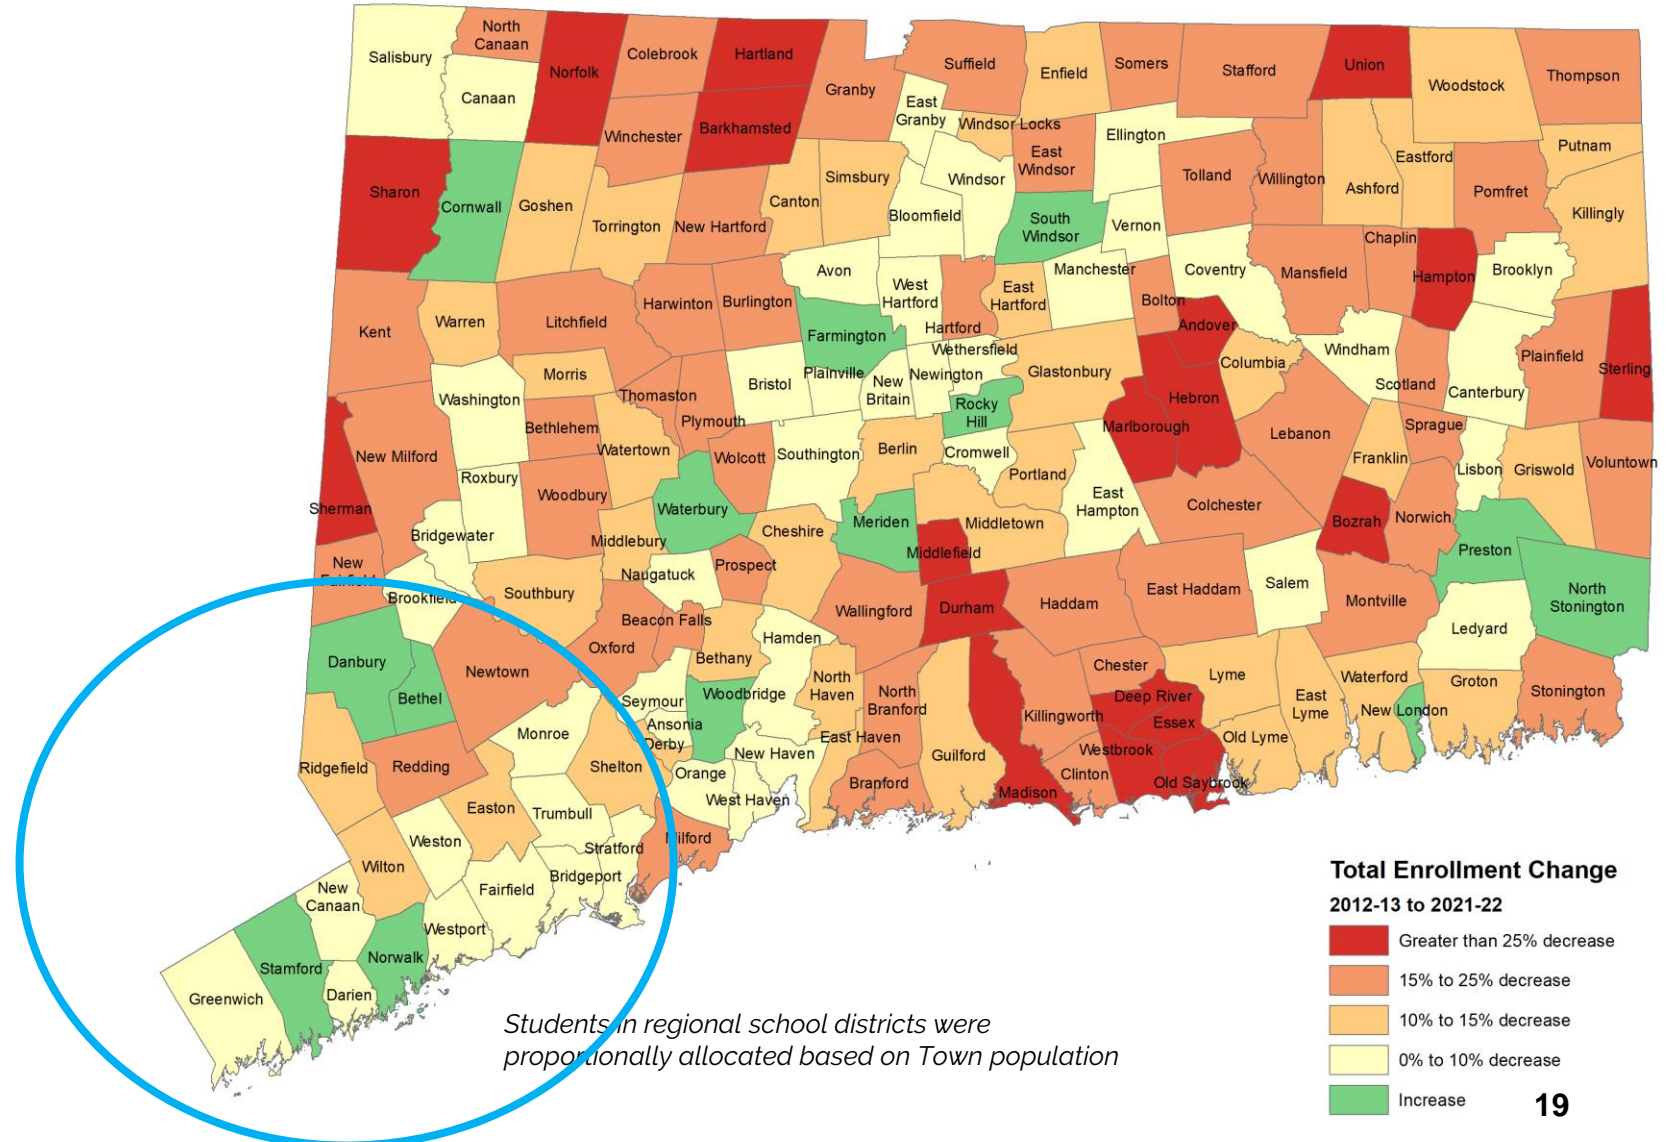

# State Trends: Enrollment

## 2012-13 to 2021-22

### Fastest Growing Districts in Fairfield County:

- Danbury
- Norwalk
- Stamford
- Bethel

2022-23	2017	56	128	137	157	159	142	153	183	185	169	181	187	181	188	52

State Department of Education - Public School Information System, Summary Report for 2001-02 to 2021-22; Weston Public Schools 2022-23

- Historic enrollment followed an increasing trend through the early 2000s to a peak in 2006-07, followed by a steady decline since 2008-09
- As existing mid-size cohorts matriculate to high school level, moderate declines are likely at upper grade levels

# Historic Enrollment

- Over the past year, PK-12 enrollment declined by 24 students (-1.1%)
- Examining historic enrollment at the cohort level illustrates changing dynamics that sum to the total system-wide change in enrollment

Weston Historic Enrollments, 2001-02 to 2022-23

Sources: CT Dept. of Education  
CeDar, and Weston Public Schools

# Net Migration

Historic Elementary & Intermediate Net Migration

Historic Middle School Net Migration

Historic High School Net Migration

- Elementary & intermediate schools averaged a net migration of +31 students annually over the last decade with recent peaks of +46 and +44 students in 2018-19 and 2022-23, respectively
- Middle school net migration averaged +10 students annually over the last decade with a recent peak of +19 students in 2017-18
- High school has experienced net an average annual net out-migration of -5 students over the last decade. 2021-22 was a recent high for net out-migration at -35 students.

# Historic Enrollment Composition

- Weston's student body has become more diverse over the last decade.
- Based on 2021-22 data, WPS is at 23% minority, which is 13% higher than 2011-12.
- Over the last decade, the largest growth in Hispanic/Latino (152%), two or more races (155%), and to a lesser extent Asian students (47%)
- Official 2022-23 racial balance data from the State Department of Education is not yet available

# Historic Enrollment

- For 2022-23, PK-2nd reported enrollment at Hurlbutt is 474 students, including 52 PK students
- Over last 2-years, K-2 cohorts averaged 424 students, compared to 397 in the prior 5-years

### Elementary (PK-2nd) Enrollments Weston Public Schools

Sources: CT Dept. of Education CeDar, and Weston Public Schools

# Historic Enrollment

- For 2022-23, 3<sup>rd</sup>-5<sup>th</sup> enrollment at Weston Intermediate School (WIS) is 454 students.
- WIS enrollment begin falling in 2010-11 and continues downward trend through 2022-23
- Last year's large 5<sup>th</sup> grade cohort of 179 students has matriculated into the middle school. It was replaced by a much smaller 5<sup>th</sup> grade cohort of 153 students

### Intermediate (3rd - 5th) Enrollments Weston Public Schools

Sources: CT Dept of Education CeDar, and Weston Public Schools

# Historic Enrollment

- For 2022-23, 6<sup>th</sup>-8<sup>th</sup> enrollment at Weston Middle School (WMS) is 537 students
- WMS peaked in early 2000s (on large cohorts that entered in the mid-90s) and again in 2012-13 (on cohorts entering in mid-2000s); enrollment stabilized from 2015-16 to 2019-20, but continues to decline as smaller cohorts matriculate into WMS

**Middle (6th-8th) Enrollments  
Weston Public Schools**

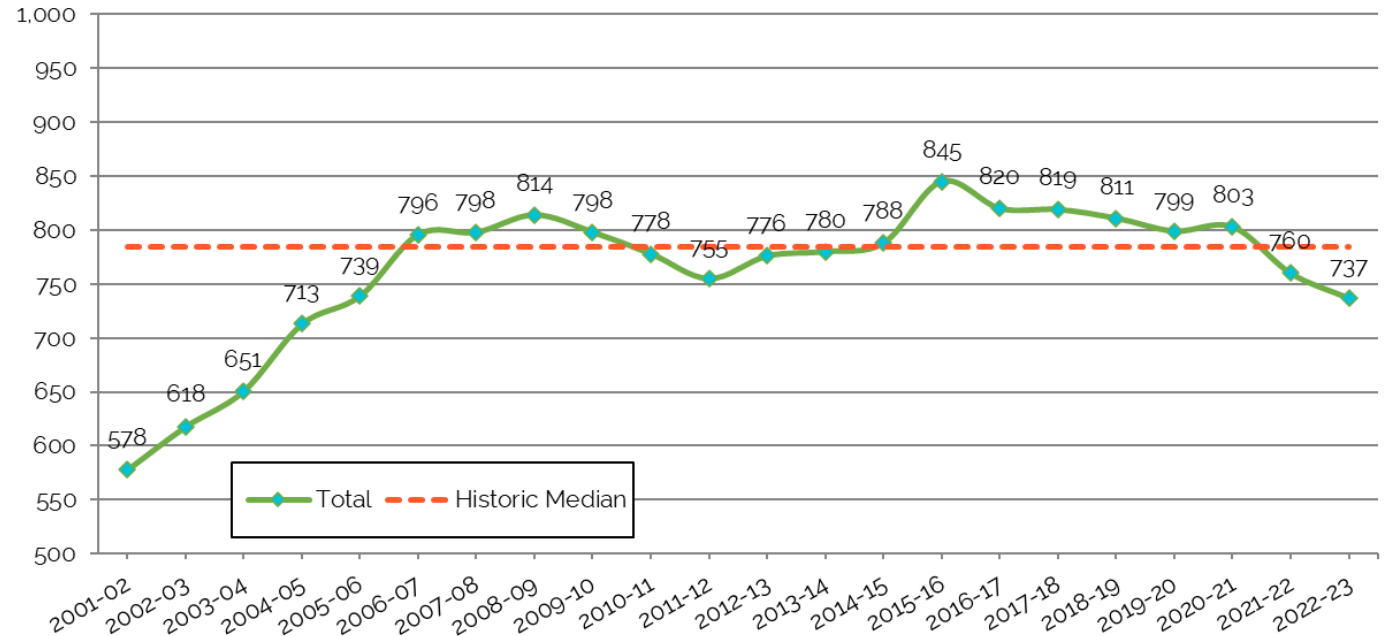

Sources: CT Dept. of Education CeDar, and Weston Public Schools

# Historic Enrollment

- High school enrollment for 2022-23 is 737 students
- High school enrollments recently peaked in 2015-16
- Enrollment declined slowly since peak as smaller incoming 9th grade classes replace larger graduating classes
- For 2022-23, all four cohorts in high school are of similar size, ranging from 181-188 students

### High (9th-12th) Enrollments Weston Public Schools

Sources: CT Dept of Education CeDar, and Weston Public Schools

# Enrollment Projection Update

---

## Enrollment Projection Update

# Projections Primer

- Based on Cohort Survival Methodology – Standard method accepted by the OSCG&R for school construction projects
- The cohort survival methodology relies on observed data from the recent past in order to project the near future
- Persistency Ratios calculated from historic enrollment data to determine growth or loss in a class as it progresses through the school system
- Persistency Ratio of 1.0 means cohort size remains the same; 1.05 means the cohort size increases by 5%, or a cohort of 100 grows to 105 the following year
- Persistency Ratios account for the various external factors affecting enrollments: housing characteristics, residential development, economic conditions, student transfers in and out of system, and student mobility
- Changes in population, housing stock and tenure, and economic conditions help explain persistency ratios
- In scenarios where external factors drive enrollment in a fashion without linear relationships to existing births and/or enrollments, adjustments to the cohort-survival methodology improve projections
- Recent impacts due to the pandemic adds variability to student migration, enrollment trends, housing market conditions, residential mobility and overall economic conditions and labor market

# Persistence & Net Migration

- Last two years, birth-K averaged 2.3; still above the last 10-year average of 2.07, however trails peak of 2.6 in 2016-17
- High school ratios showed a rebound across all grades, however, 8-9 for the 3<sup>rd</sup> consecutive year continues to trail historic average
- For 2022-23, net in-migration was 1.64%; annual drop-off since the recent peak in 2020-21
- Est. of Migration averaged 3.06 and 2.97 over last 5- & 10-years, respectively

Kindergarten through 12th Grade Persistence Ratios by School Year 2003-04 to 2022-23														
Year	Birth-K	K-1	1-2	2-3	3-4	4-5	5-6	6-7	7-8	8-9	9-10	10-11	11-12	Migration Estimate (2-7 to 3-8)

# Projections Assumptions

These projections are predicated on the following assumptions:

- Pre-K enrollment will be 45 students over the next decade
- Housing market conditions and future birth assumptions at the districtwide level will prove accurate
- **High projections:** Assume high birth projections (average 74 annually) and student in-migration averages approx. 3.0% for the next 10-years; aligning with historic average
- **Medium projections:** Assume medium birth projections (average 72 annually) and student in-migration averages approx. 2.8% over next 10-years; slightly below historic average
- **Low projections:** Assume low birth projections (average 66 annually) and student in-migration averages approx. 2.2% over next 10-years; below historic average

# Birth-K Analysis

- For last two-years, it is estimated that ~57% of the Kindergarteners were born outside of Weston
- Predicting future kindergarten cohorts has been historically challenging in Weston due to low local birthrates and high levels of in-migration of families with children age 0 to 5
- This challenge has been magnified in recent years as Birth-K ratio has risen from ~1.5 (or 50% increase in the size of incoming classes relative to local births) to 2.61 in 2016-17
- For last two-years, birth-K averaged 2.3

# Kindergarten Projections

- **Kindergarten projections blend two methodologies**
- Variable Birth-K ratio each year to stabilize total number of kindergarten students generated by in-migration
- Regression-based approach using historic births, home sales, and K data
  - Adjustment to standard methodology
  - Assumes linear relationships between kindergarten enrollment and two variables (home sales and births) based on multiple regression analysis of all available years of data
  - Places greater weight on housing sale trends projected under each scenario compared to the traditional approach (especially in years 1-5)

# Kindergarten Projections

- Regression analysis of kindergarten enrollment vs. home sales and births yields a good model fit and significance metrics ( $R^2 = 0.92$ ):
- $$K_{Yr} = (Births_{Yr-5} * 0.829265) + (Home\ Sales_{Yr-1} * 0.0023065) + (Median\ SF\ Home\ Sale\ Price_{Yr} * 0.00007)$$
- **K Projections are based on a blend of the Cohort Survival and Regression based K projection.**

## Kindergarten Regression Model Projection Model Assumptions

	<u>Low</u>	<u>Medium</u>	<u>High</u>
Avg. Annual Births	66	72	74
Avg. Annual Home sales	185	202	218
Median Sale Price (2022 \$)	\$844,000	\$919,000	\$1,024,000

# Districtwide Projections

- Developed projections under three scenarios (Low, Med & High)
- All three models are yielding a narrow band for the first 5 years, 125 student spread (2,161– 2,286)
- Medium and High models are in general agreement over the 10-year projection horizon ranging from ~2,350 – 2,500 students by 2032-33
- The Low model projects fairly flat PK-12 enrollment, averaging 2,165 students over the next decade
- Based on our analysis, the **Medium Projection Model reflects the most likely trajectory for future enrollment.**

Projection Model Comparison (PK-12)  
Weston Public Schools

# Individual School Projections

- Hurlbutt projected to increase over the next 5-years, reaching nearly 500 students by 2026-27.
- Over the last 5-years, enrollment is projected to average ~510 PK-2 students

# Individual School Projections

- WIS projected to experience an increase in enrollment over the next 5-year, reaching ~500 students in 2025-26, then growth over the last half of the projection horizon
- At the end of the projection horizon, enrollment is expected to average approx. 560 students over the last 3-years

3-5 Historic & Projected Enrollment (Medium Scenario)  
Weston Public Schools

# Individual School Projections

- WMS projected to see a steady near-term decline and eventually reaching nadir in 2025-26 at approx. 490 students.
- A moderate increase follows with enrollment growing to 550-587 students for 2030-31 and 2032-33

6-8 Historic & Projected Enrollment (Medium Scenario)  
Weston Public Schools

# Individual School Projections

- WHS projected to see more gradual decline in next three years before a sharper dip with enrollment bottoming out 655-660 range
- A modest rebound is projected for the two years of the projection horizon with enrollment approaching 700 students by 2031-32

9-12 Historic & Projected Enrollment (Medium Scenario)  
Weston Public Schools

# Takeaways

- The Medium Projection Model still reflects the most likely trajectory for future enrollment.
- For the Medium Projection Model:
  - Overall PK-12 enrollments are projected to be stable over the next 5-years averaging 2,190 students. Modest growth is projected in the last 5-years reaching 2,352 students by 2032-33
  - PK-2 enrollments are projected to continue to grow (+8.4%) over the first five years then stabilize around 510 students
  - Intermediate enrollments are projected to grow (+13.2%) in the next 5-years as smaller 5<sup>th</sup> grade cohorts are replaced by larger cohorts. Enrollment is projected to reach ~560 students by 2030-31
  - Middle school is projected to trough in next 2-3 years, then rebound, with enrollments averaging 556 students over the last 5-years
  - High school is projected to slowly decline and eventually trough at ~660 students from 2027-28 to 2029-30

# Historic Projection Comparison

- Enrollment projections overall have been performing well
- Over the last 5-years, projections have been on a consistent trajectory and good banding
