P 6142.2 Recognition of Religious Holidays Policy

It is the policy of the Weston Public Schools to be neutral in matters of religion. This means that the Weston Public Schools shall assume no responsibility for the religious training of students. The school system shall respect the freedom of each student's conscience and shall not promote the religious belief, disbelief or uncertainty about religious matters of any student.

This requirement of neutrality will neither preclude nor hinder the Weston Public Schools from educating students to be tolerant of and to respect religious diversity. The recognition of religious holidays provides an opportunity to develop an understanding of different religions and customs. The goal of this endeavor shall be to promote tolerance, mutual respect and an understanding of the diversity that is our democratic society.

This shall be done, while observing the following cautions:

1. All religions whose holidays are recognized must be afforded equal respect
2. The recognition of the holiday must be for secular, educational purposes. This will require activities which enhance tolerance through understanding, while not engaging students in religious ceremony, ritual or the promotion of any one religion.
3. The recognition of a religious holiday shall occupy a minor role in the curriculum. Therefore, class time shall be planned accordingly.
4. Parents may request, in writing, that their children be provided with an alternative experience rather than participate in activities related to religious holidays. This will be done without bias or embarrassment to the student
5. Students with secular beliefs shall be free to express their views.
6. Periodic evaluation of the policy and its regulations shall take place.

POLICY Adopted: June 28, 1994

R 6142.2

Instruction

Recognition of Religious Holidays

1.0 Curriculum Plan and Its Administration

1.1 Time devoted to recognition of religious holidays shall be kept in perspective and represent a minor impact on the curriculum.

1.2 The principal and teachers shall organize and administer the recognition of religious holidays annually, taking into account the social studies curriculum plan, the Board's policy and these regulations.

2.0 Classroom Activities, Decorations

2.1 Goals for lessons shall include development of an understanding of the historical and cultural significance of the religion and the holiday.

2.2 All lessons, activities and events involving religious holiday shall be secular in nature, not devotional, focusing on information and understanding of an important cultural and historical event for a significant number of people.

2.3 Religious symbols may be used as teaching aids, but will not become ongoing decorations in classrooms or common areas. Decorations in common areas will reflect the diversity in the school. Decorations that are part of the custom and folklore of a religious holiday, but have no direct religious meaning or significance, may be displayed.

2.4 No effort shall be made to indoctrinate or recruit students.

2.5 Parties, food preparation and other seasonal activities shall be permitted within the context of the curriculum.

3.0 School Performances, Assemblies, Displays

3.1 Recognition of religious holidays must be for artistic reasons, not religious reasons. Program notes or other commentary should inform the audience as to the educational purpose for using religious music or art.

3.2 Selections shall reflect the diversity in the school. Sacred music may be sung or played as part of the academic study of music. School concerts that present a variety of selections may include religious music. Concerts should avoid programs dominated by religious music, especially when they coincide with a particular religious holiday.

3.3 Students should not be assigned to produce art work that has religious meaning or significance unless in the context of an arts production. That which is spontaneously self produced is acceptable and may be displayed.

4.0 Parents' Rights to Opt Out

4.1 Parents shall have the right to request, in writing, that their children be provided an alternative to an educational experience or performance related to religious holidays without penalty.

4.2 Principals shall inform parents of programs and review their requests for an alternative experience.

5.0 Observation of Religious Holidays Outside of School

5.1 Absence from school to celebrate a religious holiday shall be an excused absence. Teachers shall not penalize students observing religious holidays. Major tests, evaluations, required homework and other important activities within reason shall not take place on these days for students observing those holidays.

6.0 Advisory Committee

6.1 An advisory committee shall assist the school system in matters related to religious holidays.

Controversial Issues

Effective education not only permits but often requires that controversial issues be considered in the classroom. Students shall have the opportunity for responsible discussion of controversial issues.

It is the Weston Board of Education's policy to give wide freedom of expression, subject to the following guidelines:

1. The issue must be relevant to the course of study.
2. The presentation must be fair and objective. Biased material should be identified and a counterbalance provided.
3. Matters of opinion should be distinguished from matters of fact.
4. The issue must be explored thoroughly, and in such depth as the maturity of the students allows.

The discussion and study of controversial issues shall be objective and scholarly, with a minimum emphasis on opinion. The teacher shall approach controversial issues in the classroom in an impartial and unprejudiced manner, and must refrain from using classroom privileges and prestige to promote a partisan point of view.

Instructional policy on controversial issues is stated by the Board of Education to protect teachers and school administrators from unwarranted attack by pressure groups, and to insure youth a well-balanced preparation for American citizenship.

P 6145.5**Instruction****Organizations/Associations**

Student organizations contributing to learning shall be encouraged. Such organizations shall operate within the framework of the law, Board policy, administrative rules, and the parameters of the learning program. When such organizations are truly contributive, their establishment and operation shall be facilitated in reasonable ways by district staff and through utilization of district resources.

The Superintendent shall develop general guidelines for student organizations. Among other provisions, such guidelines shall require the assignment of at least one faculty advisor to each student organization and the approval by the Board of Education of any student organization.

This policy applies to in-school organizations only. It is not intended to restrict the organization of students into groups which function apart from the school.

Non-School Organizations

All organizations not specifically authorized and organized by the school are considered to be non-school organizations and beyond the jurisdiction and responsibility of school authorities.

However, should these groups conduct activities on school property, at school-sponsored activities or as a carry-over into the school day or reflect on the reputation of the school, the Superintendent is authorized to develop procedures concerning disciplinary action to be taken.

Activities which are contrary to the best interests of the school and reflect on the reputation of the school are forbidden, including:

Statement of Educational Goals and Student Objectives

Educational Goals

Weston residents continue to support high educational standards for their community. The Weston Board of Education is committed to a program of studies designed to challenge the abilities of school-age children, so they will emerge from the Weston schools as mature, confident young people ready to assume the responsibilities of adulthood. Within budgetary limitations that are responsive to Weston taxpayer interests, the Board shall develop, implement, and audit programs to accomplish these educational goals.

These goals are presented with the full realization that the school is only one of several social institutions or influences affecting the child. Its contribution is modified by the intellectual, social, emotional, and affective potentialities that each child brings to the school environment. Our intent is that the school should contribute as fully as possible to the development of each child in the directions indicated by the goals stated.

To implement the Philosophy of the Public Schools, we accept this charge and the following objectives:

The Board's prohibition of discrimination or harassment in its educational programs or activities expressly extends to academic, nonacademic and extracurricular activities, including athletics, **school sponsored activities**, as well as the district website.

Concept and Roles in Instruction

The Weston Board of Education believes that all children can reach high levels of academic and personal achievement when the school, family, and community work together.

The primary purpose of schooling is the transmission of knowledge, culture, and development of skills through which students learn in areas necessary to their continuing development and entry into the world of work. To fulfill that purpose, the State Board of Education prepared Connecticut's Common Core of Learning. The Board of Education gives priority in the allocation of resources, including funds, time, personnel, and facilities, to fulfilling this purpose.

The school functions closely with the community through the Board of Education, which sets policy for all educational programs. The community is responsible for providing resources to maintain the programs, which the Board prescribes. The community has the right to expect that the school will reflect its needs and desires but should be responsive to the professional obligation of the staff and administration to guide the educational program.

The students, faculty, administration and community should be involved in the development of a learning process wherein all may engage in a mutual inquiry. The student's responsibility is to realize that through active participation in the process he/she becomes the ultimate agent in his/her own learning experience. The teacher's responsibilities are to guide the learning process, to stimulate the students' intellectual interests and to expose them to a variety of avenues within the learning process. The administrator's role should be that of a catalyst, providing leadership and giving direction to the total learning process.

For the school to achieve the mission of providing outstanding instructional opportunities the students, faculty, administration, and community need to be mutually involved in creating and guiding the learning process. A climate of mutual respect and commitment is needed and active communication is essential.

~~Philosophical Guidelines~~ Goals and Objectives

Weston citizens continue to support high educational standards for their community. As elected representatives, the Weston Board of Education is committed, within responsible budgetary limitations, to the support and development of a dynamic and flexible program of studies designed to effectively challenge the school-age children of this town.

The guiding policy of the Board of Education is to create and sustain a public school system capable of developing to the utmost the resources of the children entrusted to it. The goal is to impart knowledge, and a love of knowledge; to teach each child to speak, to read, to write, to calculate, to think; and to do so with such initiative and imagination that each will be properly equipped to serve as a citizen of this community, this nation and this world.

To this end, the Weston Board of Education searches out administrators and teachers who are imaginative, energetic and enthusiastic, as well as competent; and encourages active community communication and participation. Through the development of sound educational policies and systematic curriculum review, the Board strives to foster, in every way possible, an environment in which the children will thrive.

FOR CONSIDERATION: The Board of Education establishes the following goals for instructional program:

1. To instill in students basic skills as well as the knowledge, attitudes and habits that will allow them to adopt, adapt and utilize these skills in the ever-changing environment;
2. To provide an educational program that challenges each student yet minimizes failure. Everyone willing to make the effort to work and learn should be able to achieve a certain measure of success;
3. To develop an educational program that is comprehensive and involves input from all groups within the school community, especially administrators, staff, parents and students;
4. To create a learning process that emphasizes human worth and incorporates real and relevant experiences that students may identify with and learn from easily; and
5. To provide educational opportunities for students to interact with students and leaders from other racial, ethnic, and economic backgrounds

Use of Copying Devices

Publication or Creation of Educational Materials — Copyrights: Printing and Duplication

The Board of Education acknowledges the necessity of complying with federal laws governing the use of copyrighted material.

Infringement on copyrighted material, whether prose, poetry, graphic images, music, theatrical performances, video or computer code, is a serious offense against federal law and contrary to the ethical standards required of staff and students alike. The Board further recognizes that severe penalties are provided for unauthorized copying of audio, visual or printed materials unless the copying falls within the bounds of “fair use.”

The Board therefore requires that all reproduction of copyrighted material be conducted strictly in accordance with applicable provisions of law. Unless otherwise allowed as "fair use"*, under federal law, permission must be acquired from the copyright owner prior to reproduction of material in any form.

The fair use of a copyrighted work for purposes of teaching, scholarship, or research is not an infringement of copyright. The following factors shall be considered in determining fair use:

1. The purpose and character of the use, including whether the use is of a commercial nature or for non-profit educational purposes.
2. The nature of the copyrighted work.
3. The amount and importance of the portion used in relation to the copyrighted work as a whole.
4. The effect of the use upon the potential market for or value of the copyrighted work.

The Board, therefore, requires that all reproduction of copyrighted material be conducted strictly in accordance with applicable provisions of law. Unless otherwise allowed as “fair use”, under federal law, permission must be acquired from the copyright owner prior to reproduction of material in any form. Prior written permission must be obtained whenever copyrighted plays and musical numbers are to be performed in public.

The Board therefore directs that:

1. Unlawful copies of copyrighted materials may not be produced on District-owned equipment or any other equipment on District property.
2. Unlawful copies of copyrighted materials may not be used with District-owned equipment or other equipment on District property.

Any District employee who willingly and knowingly violates the copyright policy shall be held personally liable for infringement and may be subject to disciplinary action. In no circumstances shall it be necessary for District staff to violate copyright requirements in order to perform their

duties properly. Copyrighted materials shall be treated as the property of the copyright holder, with all rights and limitations specified in the law.

~~It is illegal for anyone to duplicate copyrighted materials without permission, except to the extent such duplication may fall within the bounds of the "fair use" doctrine.~~

~~The Board further recognizes that severe penalties are provided for unauthorized copying of audio, visual or printed materials unless the copying falls within the bounds of "fair use".~~

Fire Emergency/**Crisis Response Drills**

In the event that fire is discovered in any of the school plants, the fire department shall be immediately notified and the building will be evacuated.

The Principal of each school shall hold at least one fire drill each month in which all students, teachers and other employees shall be required to leave the school building. The initial fire drill must be held not later than thirty days after the first day of each school year.

A crisis response drill shall be substituted for one of the required monthly school fire drills every three months. Such drills shall incorporate the basic protocols of lockdown, evacuation and shelter-in-place responses. The activation and utilization of the Incident Command System shall also be a part of the crisis response drills.

The format of the crisis response drill shall be developed in consultation with the appropriate local law enforcement agency, the fire department and other community first responders including the local emergency management director, fire marshal, building inspector and emergency medical services representative. Further, a representative of the law enforcement agency may supervise and participate in any of the required crisis response drills.

Local law enforcement and other local public safety officials, as listed above, shall evaluate, score and provide feedback on fire drills and crisis response drills.

~~Connecticut State Law requires periodic fire drills in all public schools to ensure an orderly exit from the building in the event of fire or other emergency requiring evacuation.~~

~~The principal of each school shall hold at least one fire drill each month in which all students, teachers and other employees shall be required to leave the school building. When students are evacuating the building the fire alarm sounds, these are the procedures to be followed:~~

1. Students must leave the building in an orderly and rapid manner and teachers are required to check to ascertain that no student remains in the building. It is important to remain calm, quiet and follow instructions. Once outside, teachers are to take attendance.
2. Real emergencies often call for alternate exits to be used. Teachers must be prepared to select and direct their classes to these alternate exits in the event the designated escape route is blocked.
3. A record shall be kept in the principal's office of each fire **or crisis** drill conducted. A copy of the record shall also be filed in the office of the superintendent.
4. Do not re-enter the building until directed to do so by **authorized personnel from the fire response team** ~~one of the volunteer fire department.~~

FOR DISCUSSION AS THIS IS THE UPDATED VERSION OF THIS POLICY PER CABE. SHIPMAN DOES NOT HAVE A MODEL POLICY.

The Weston Board of Education recognizes the right of its employees, as citizens, to engage in political activity. However, the Board recognizes that school property and school time are paid for by all the people of the District, and should not be used for partisan political purposes, except as provided for in policies pertaining to the use of school facilities by civic and political organizations.

Prohibited activities include the posting of political circulars or petitions, collection or solicitation of campaign funds, solicitations for campaign workers, the use of students in writing or addressing campaign materials, and the distribution of campaign materials to students on District property or during school time in any manner which would indicate that a school employee is using a position in the school to further personal partisan views on candidates for public office or questions of public property. Teachers and other District

employees will not attempt to influence students concerning political party affiliations and will not praise or denigrate any particular political party.

Nothing in this policy will be interpreted as prohibiting teachers from conducting appropriate activities that encourage students to become involved in the political processes of the party of the students' choice or as independents; nor does it prohibit the use of political figures as resource persons in the classrooms.

Note: Under state law, in order to prohibit all persons from carrying deadly weapons and/or firearms onto school property (including persons who hold a legal permit to carry such weapons elsewhere), a school district must affirmatively pass a policy prohibiting such items. The policy above accomplishes this goal. Districts may legally prohibit other weapons as well, but issues exist regarding 1) a district's practical ability to enforce such prohibitions and 2) the definitions used to describe other types of weapons. If a district chooses to enact a wider prohibition on weapons, it is well advised to consult legal counsel for assistance in drafting a policy containing a wider prohibition.

Statement of Philosophy

The Board of Education believes that the educational programs and services available in the school system are designed to provide opportunities for the academic, social, and emotional growth of our student population. Among its high priorities, the Board accepts the national challenge that academic excellence and quality education must be achieved and maintained within the fiscal parameters of the community. To that end, every effort will continue to be made to support the Superintendent, administrators, and staff, both professional and non-certified, in their recommendations to improve, expand, or change current programs and services.

The Board of Education also places a high premium on accountability:

1. in measurable achievement of student learning; in the evaluation of all staff performance and including the Board;
2. in commending individual student and staff performance;
3. in maintaining appropriate fiscal controls.

The Board recognizes that continuing improvement of the school system rests on the professional abilities and commitment of the various staffs in the schools. The leadership role of the Superintendent and the policy and decision-making roles of the Board will be successful concomitant with the efforts of all concerned with the educational progress to work together to achieve those common goals. Incumbent with those roles is the high order need to communicate, to engage in constructive discussions when addressing identifiable change needs in the system, and to develop strong rationales with supportive data to support program or service recommendations.

Recognizing that within a school system there are diverse issues, strengths, and weaknesses, the overriding philosophy is to coalesce the positive energies of all involved personnel into a strong unit working together. There always is to be the opportunity for the alternative or divergent opinion to be considered in any decision-making process. When a final decision is made, however, there is the expectation that everyone will work in concert with the intent of that decision. To do otherwise would be counter-productive to the system's ability to progress.

Students are the primary focus of the system's activities, processes, and procedures. They have been entrusted to us for the expertise we can and do provide. That is an enormous responsibility. That responsibility is the staging upon which the Board accepts its roles as guardian and advocate. That is the responsibility the Board of Education charges the system personnel to accept with total and unequivocal professionalism.

Policy adopted:

Mission Statement

We believe public education is an essential component of a free and democratic society. In a partnership of family, school, community, and local and state government, the mission of the Weston Public Schools, as a caring and supportive community partnership, is to empower each student to achieve success and contribute to our global society by developing and cultivating character, knowledge and creativity through a dynamic learning experience that challenges each student to continually pursue personal excellence.

To accomplish this, we must seek the necessary resources to:

- Provide a safe, nurturing and academically challenging learning environment.
- Provide students and staff with resources, supports, and opportunities to reach their full potential.
- Prepare students to become productive, lifelong learners.
- Instill in our students a curiosity and love for learning which embraces their interests and the world around them.
- Prepare students to become self-reliant, honest, respectful and responsible members of a diverse and global society.
- Improve student learning by holding staff accountable for creating effective learning environments and using the most effective teaching strategies.

Policy adopted:

Communication with the Public/Parent Involvement

Constructive engagement of parents, guardians, and other care-givers in the schooling of children improves the quality of education significantly. The Board of Education believes that closer connections of parents and others responsible for the home care of the children with our schools can result in enhanced academic performance, improved behavior, and reduced absenteeism.

Therefore, all parents, guardians, and care-givers of students enrolled in our school district are encouraged to take an active role in the education of their children.

Further, the Board of Education believes that the professional staff must take whatever steps are necessary to facilitate a broad variety of meaningful opportunities for parents to connect with the schools in which their children are enrolled, and with the overall school system. These steps may include, but are not limited to the following:

- Promoting and supporting parenting skills.
- Regular and meaningful two-way communication between home and school. (Such communication may include monthly newsletters, electronic communications, phone calls, parent-teacher conferences or scheduled appointments in school).
- Welcoming various aspects of parent input, support and assistance in decisions that impact children and families.
- Making community resources available to strengthen school programs, family practices and student learning.
- The two required parent-teacher conferences per year, beginning July 1, 2021 and each school year thereafter, can be fulfilled by the District offering parents the option of attending any parent-teacher conference by the use of telephonic, video, or other conferencing platforms.

The Board shall [utilize the document developed by the State Department of Education](#) (by 12/1/21) that provides information concerning educational, safety, mental health and food insecurity resources and programs available to students and their families.

The Superintendent will report to the Board of Education on parent involvement activities as necessary.

Policy adopted:

Survey of Students

The Weston Public Schools (“District”) recognizes that surveys are essential tools for identifying student needs, monitoring school climate, and supporting continuous improvement. Surveys shall be used to gather feedback that enhances teaching and learning, promotes student well-being, and informs restorative and preventive strategies. All surveys shall be research-based, developmentally appropriate, culturally responsive, and administered in compliance with state and federal laws, including Connecticut’s School Climate Policy and the Protection of Pupil Rights Amendment (PPRA). Student participation shall respect privacy, allow for parental review, provide required consent or opt-out opportunities, and protect confidentiality.

As required under CT PA. No. 23-167, beginning in the 2025–26 school year and biennially thereafter, each school shall administer a school climate survey consistent with the Connecticut School Climate Policy. Prior written notice shall be provided to parents/guardians regarding the content and administration of the school climate survey, and it shall include an opportunity for them to opt their child out of participation. Survey data shall be used by the School Climate Specialist and School Climate Committee to develop, revise, and implement the School Climate Improvement Plan as required under state law. (P5131.911)

Survey data, including climate survey results, shall be incorporated into the District’s continuous climate improvement cycle. Such data shall inform the development of restorative strategies, identification of challenging behaviors, and schoolwide interventions that support a positive, safe, and equitable learning environment. (P5131.911)

Surveys may be used by administrators, educators, school climate committees, and the Board to gather information necessary for improving instruction, identifying student needs, assessing school climate, supporting student well-being, or informing district policies and practices. All survey instruments must receive administrative approval. Student responses shall not be used in any personally identifying manner unless required by law and shall never be used for disciplinary action.

Surveys used in any experimental program or research project will be subject to the requirements of applicable Board of Education Policy. Parents shall have the right to inspect all instructional material that will be used for a survey, analysis, or evaluation as part of a federal program.

Prior to administering a survey, the Board of Education must approve all that are received by the Superintendent that include reference to any of the factors listed below.

No school climate survey shall solicit information from students that falls within the eight PPRA-protected categories unless explicit parental consent is obtained or unless required for mandated school climate reporting and structured in non-identifying form.

Any survey created by or administered on behalf of an external agency, researcher, or organization must be reviewed by the Superintendent and approved by the Board of Education if it includes questions soliciting sensitive information, requires student data disclosure, or is intended for public release. Results of Board-approved surveys must be shared with the Board.

No student may take part, without written parental consent when federally funded, or without prior notification and the opportunity to opt out when not federally funded, in any survey, analysis, or evaluation that reveals information concerning:

1. political affiliations or beliefs of the student or the student's parents;
2. mental or psychological problems;
3. sex behavior or attitudes;
4. illegal, anti-social, self-incriminating, or demeaning behavior;
5. critical appraisals of close family relationships;
6. legally privileged relationships;
7. income (unless required by law for financial aid eligibility);
8. religious practices, affiliations, or beliefs.

These PPRA protections apply to all District-administered and third-party surveys.

In addition to PPRA requirements, the District shall notify parents/guardians of the administration of the mandatory biennial school climate survey and provide a reasonable opportunity to opt their child out. No student shall be required to participate in a climate survey if a parent/guardian opts out or if the student is 18 years old and opts out on their own behalf.

Parents/guardians shall have the right to inspect, upon request, a survey created by a third party before it is administered or distributed by a school to a student. Such requests shall be made in writing to the district employee working with the third party seeking to implement the survey with a response to be at least two weeks in advance of any survey to be given.

For surveys not funded in any part by the federal government, parents/guardians need not give written consent, but must instead be given prior notice of the survey with the opportunity to opt their child out of participation if the survey elicits information concerning any of the eight protected areas listed above

Aggregate, non-identifiable results of school climate surveys shall be made available to the school community and reviewed annually by the School Climate Coordinator, School Climate Specialists, and School Climate Committees to inform improvement planning, restorative practices, and professional learning.

Parents/guardians shall be notified annually at the beginning of the school year, as well as upon a student's initial enrollment, of their rights under this policy and the Protection of Pupil Rights Amendment (PPRA). This notice shall inform parents/guardians, and students 18 years or older, of their right to: (1) inspect survey instruments and instructional materials used in conjunction with any survey; (2) opt their child out of the collection, disclosure, or use of personal information for marketing purposes; (3) opt their child out of any survey that includes PPRA-protected topics; and (4) opt their child out of any non-emergency, invasive physical examination not required by law. The notice shall also include information regarding the administration of the biennial school climate survey and provide parents/guardians with a

reasonable opportunity to opt their child out of participation. Such notice shall describe parents' rights to inspect survey instruments, instructional materials, and to opt students out of:

1. collection or disclosure of personal information for marketing;
2. administration of surveys asking about PPRA-protected topics;
3. non-emergency, invasive physical examinations not required by law.

All surveys must be administered using neutral, unbiased questions. Responses shall be collected, reported, and stored in a non-identifiable manner unless required by federal or state law. Survey responses shall not be used for disciplinary purposes and shall instead support system-level improvements, including school climate goals, social-emotional learning, and restorative practices.

Pre-School Students with Disabilities

The Board of Education (Board) recognizes the value of special education and its responsibility in ensuring that all resident preschool children with disabilities have the opportunity to participate in special programs and services from which they may benefit. The Board shall maintain an early intervention program for preschool-aged children identified through the "Birth to Age Three" screening process under regulations imposed by the Individuals with Disabilities Act (IDEA) which identifies children with special education needs or developmental delays.

The District will provide a preschool program consistent with the regulations delineated by the State. The Assistant Superintendent of Pupil Personnel Services (PPS) is responsible for coordinating the program and evaluating it annually. The administrative practices and procedures of this program shall include:

1. Locating and identifying all preschool children, between the ages of three and five, with disabilities pursuant to the relevant provisions of the Individuals with Disabilities Act (IDEA). The register of children eligible to receive preschool special education services is to be maintained and revised annually by the Assistant Superintendent of PPS;
2. Ensuring that the parents of preschool-age children with disabilities have received and understand the request for consent for evaluation of their child;
3. Developing an individualized education program (IEP) for each preschool-age child with a disability requiring services;
4. Appointing and training appropriately qualified personnel;
5. Providing transportation to students receiving special education services who are enrolled in the program and require it per a Planning and Placement Team (PPT) decision;
6. Maintaining lists as required by the State Education Department pertaining to the number of children with disabilities who are being served, as well as those identified disabled students not served; and
7. Reporting as required to the State Education Department; and
8. Ensuring the smooth transition from infant to preschool programs.

The Planning and Placement Team's responsibilities will include the evaluation and recommendation for placement in appropriate approved programs and the provision of appropriate special education programs and services for each preschool child with a disability. Children recommended for an educational program may enter at various points throughout the school year.

It is ultimately the responsibility of the Board to provide the appropriate approved preschool program and services for the District children. Should the PPT's determination and recommendations differ from parent or guardian preference, placement may be appealed by a parent or guardian through the procedures outlined in IDEA.

The Board directs the Superintendent or his/her designee to ensure that the District considers that adequate and appropriate space and personnel are made available for such programs and services.

Tuition

Pre-School Students with Disabilities

Non-disabled (general education) students enrolled in the preschool program will be required to pay tuition for the program. The Board will annually establish the tuition rate for the following school year. The Board, through the Superintendent or his/her designee, will establish a payment plan. Failure to make such tuition payment may result in discontinuation of enrollment in the program.

P 0220 Mission and Function - Goals and Objectives for School Operations/System

Weston residents approach education with a strong belief in the importance of high educational standards for their community. As elected representatives, the Board of Education is committed to the support and development of a dynamic and flexible program of studies designed to effectively challenge the ability differences found among the school-age children of Weston.

Therefore, to meet its assigned tasks, the school system is striving -

1. To give each child a firm foundation and mastery of the basic skills in reading, writing, spelling and arithmetic so that he/she will have the necessary tools for further study.
2. To encourage the development of imaginative and creative thinking processes so that the children can deal with abstractions as well as concrete issues.
3. To foster scientific curiosity based upon an understanding of principles and concepts without de-emphasizing facts.
4. To stimulate an appreciation and understanding of the arts.
5. To develop in each child an understanding and appreciation of democracy so that he/she can take his/her rightful place in a democratic society.
6. To introduce the history of our culture and our social and economic institutions in relation to other world cultures and institutions.
7. To teach children about government - local, state, national, and international - so that they can assume their vital role as citizens on each level.
8. To develop in each child respect for the rights, property and opinions of others.
9. To instill in the students ethical and spiritual principles so that they will develop a good sense of values and have a firm foundation for reaching moral decisions.
10. To develop in each child an emotional stability that will enable him/her to function effectively.
11. To develop an awareness in each child of how to communicate and work with other people.
12. To teach children sound principles of health.

With these objectives in mind, the following summation may be interpreted as a beginning of an evolving statement of purposes for the Weston schools:

The guiding policy of the Board of Education is to create and sustain a public school system capable of developing to the utmost the resources of the children entrusted to it. The goal is to impart knowledge, and a love of knowledge; to teach each child to speak, to read, to write, to calculate, to think, and to do so with such initiative and imagination that each will be properly equipped to serve as a citizen of this community, this nation, this world, and to pursue self-education throughout life. To this end, the Board searches out principals and teachers who are imaginative, energetic, enthusiastic, as well as competent, and it strives to foster, in every way possible, an environment in which the children will thrive.
