Early Learners PreK Program Overview

PPS Early Learners

What's New in SY24-25?

In response to:

- Significant budget constraints,
- Enrollment challenges,
- Ongoing learning about strategies for aligning program supports and services

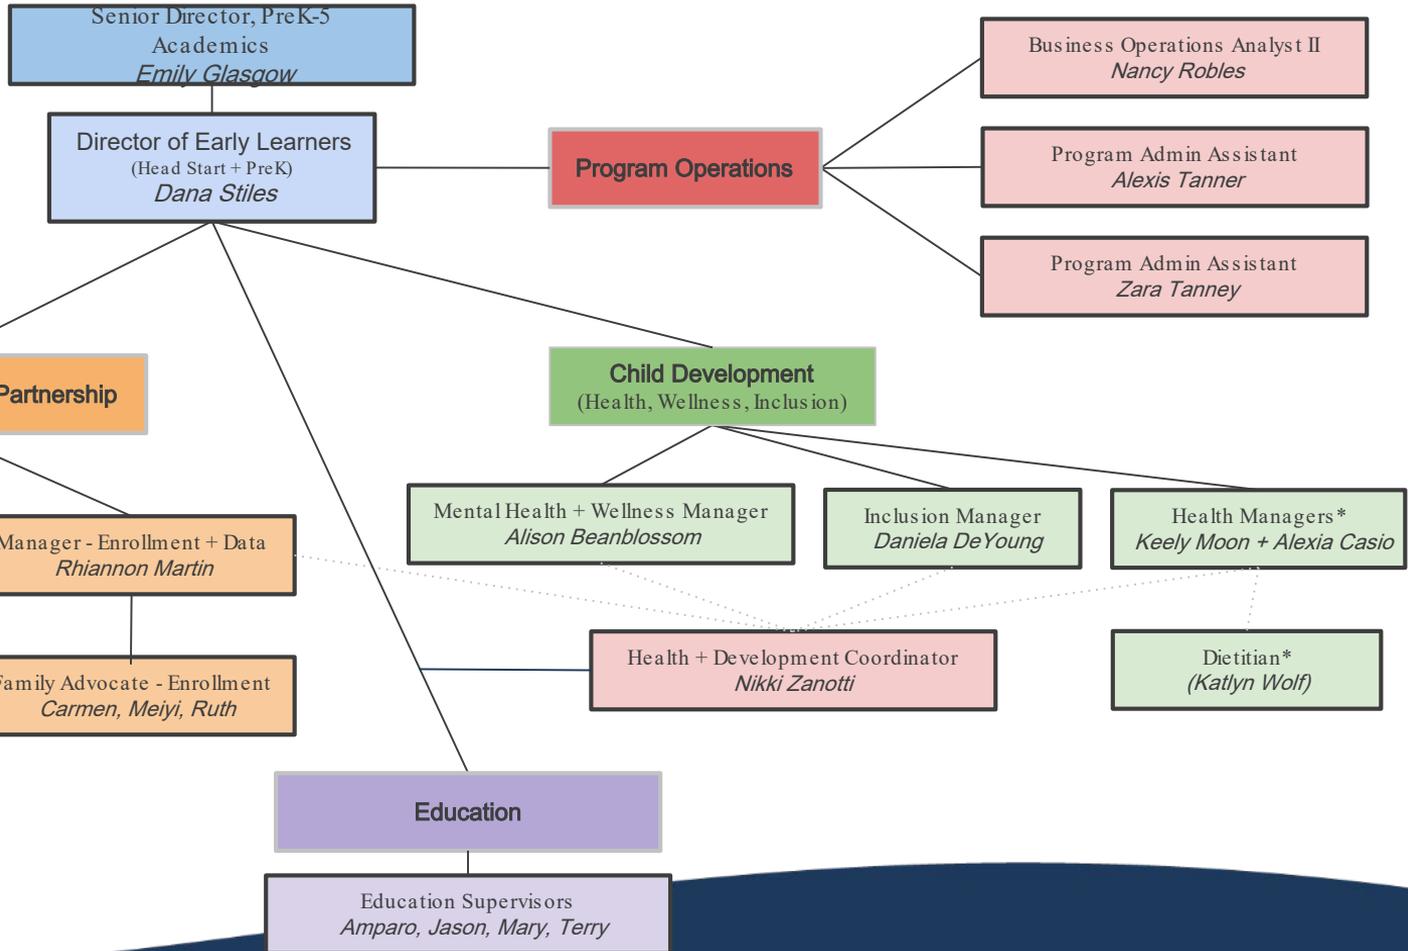

We reorganized with this central question in mind:

How do we effectively and efficiently maximize PreK access to the same number of PPS students/families with reduced programmatic resources?

Summary of Program Shifts:

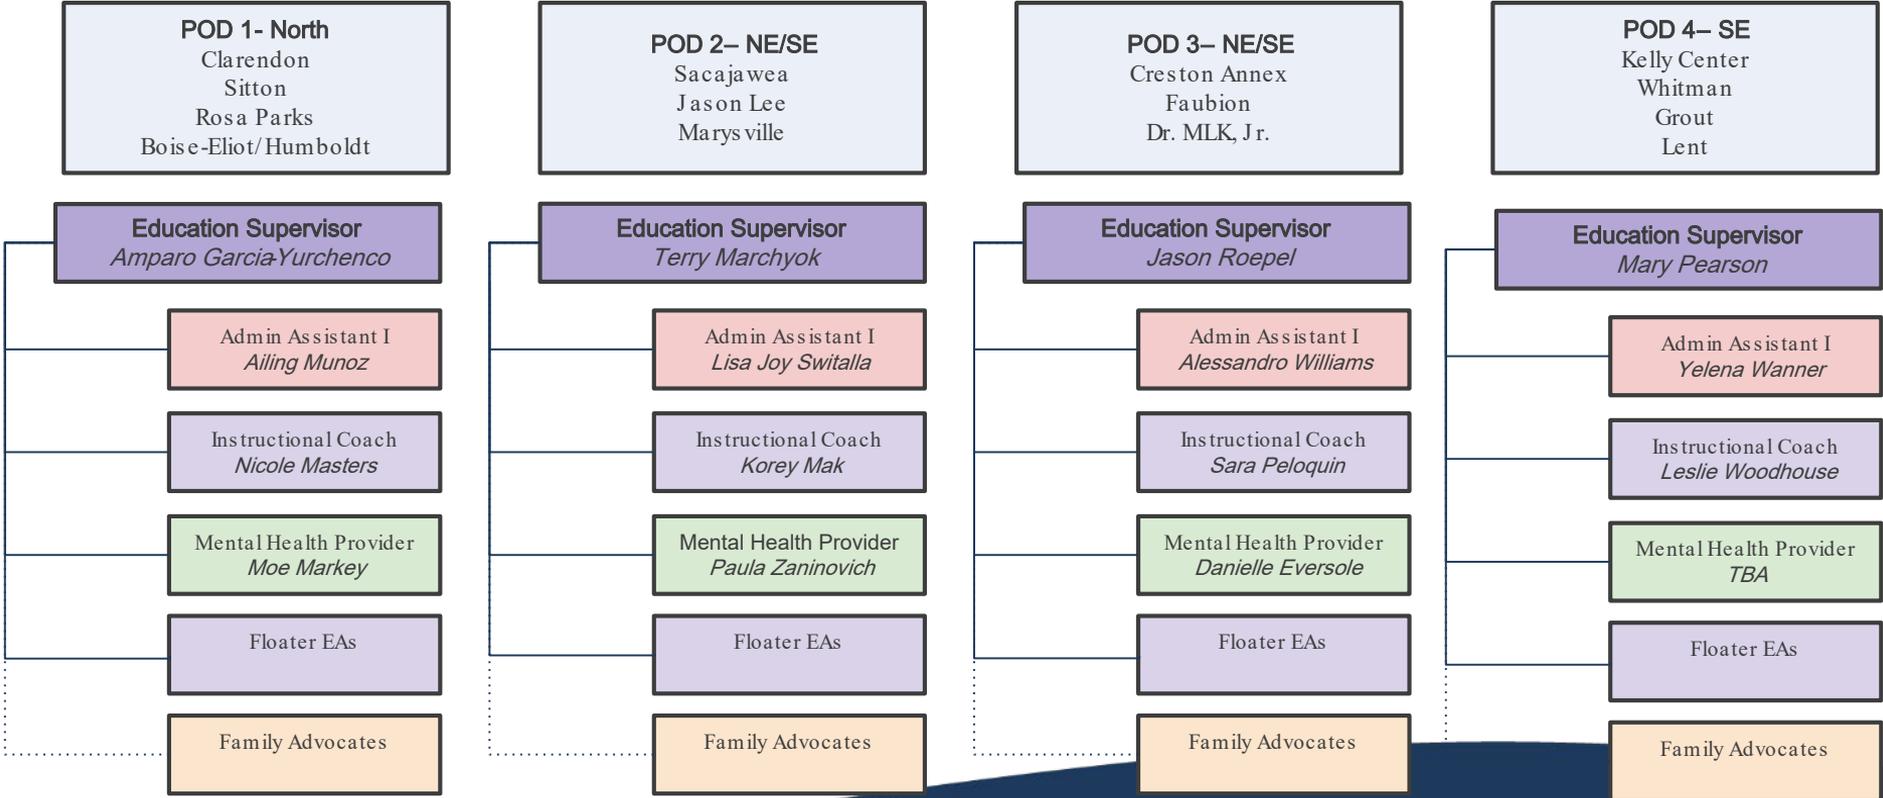

- One Early Learners program team managing and supporting all PPS PreK classrooms;
- One year-round coordinated enrollment process;
- Braided funding @ most sites;
- Consolidation of sites without decrease in “seats”;
- Reduction of \$2.5 million without decrease in “seats” or services

Program Planning in Head Start: The Program Planning Cycle

Thoughtful planning is key to successful programming and to the achievement of desired outcomes. The Head Start Program Planning Cycle outlines how the required Head Start management systems are interrelated parts of a predictable planning process. Through this process, programs develop goals, objectives, and expected outcomes. They monitor and evaluate progress toward their program goals, which include school readiness goals. In this document, references to long-term goals are inclusive of all program goals. Programs also ensure compliance with the Head Start Program Performance Standards (HSPPS).

The Program Planning Cycle depicts an ongoing sequence of planning, implementation, and evaluation. It promotes continuous quality improvement and allows programs to work toward the achievement of positive outcomes for children and families. Many of the steps happen repeatedly throughout the cycle, and the cycle itself is repeated throughout the five-year project period.

The Program Planning Cycle

To learn more about the process, follow the arrows clockwise around the planning cycle. Review a list of the steps and a brief description of each below.

1. Begin with either **community assessment** or **self-assessment** (see red arrow above).
 - **New programs** begin with a community assessment. They collect and analyze data about the needs and resources of eligible families, the program, and the community within the service area to inform the goal-setting process.
 - **Existing programs** may begin the process with self-assessment. They take a fresh look at updated community assessment, ongoing monitoring, and other relevant data to make recommendations for program planning and goal-setting.
2. For their baseline grant applications, programs identify the long-term goals they will accomplish during the **five-year project period**. They also identify initial specific, measurable, attainable, relevant, and timely (SMART) **objectives** linked to **expected outcomes**. During their **annual** planning process, programs review their long-term goals and objectives, along with community assessment and self-assessment data, and make any necessary programming adjustments. They continue to break down their goals into measurable objectives linked to expected outcomes.
3. Programs develop an annual **action plan**, which is a defined set of steps outlining what a program will do to accomplish its goals and objectives. The action plan is supported by a budget that is aligned with the goals and objectives. Through the **data and evaluation system**, the program decides which data will be collected to measure progress and determine impact.
4. While **implementing its plan**, the program collects data through its **technology and information systems** and manages it through its **recordkeeping and reporting system**.
5. The program continually evaluates progress toward its goals and objectives and compliance with the HSPPS by reviewing data gathered through the system of **ongoing monitoring and continuous improvement**. Effective ongoing monitoring enables programs to track progress toward their goals and objectives, ensure compliance, and collect data to inform continuous improvement.

6. Based on ongoing monitoring results, programs may continue to implement their **action plan** as written, change the plan to **replicate best practices**, or make **course corrections** that may require changes in program activities or levels of effort. Following up to determine the efficacy of the course corrections is critical.
7. Finally, the program comes full circle to the annual **self-assessment**. In this step, the self-assessment team uses its ongoing monitoring, community assessment, and other relevant data (e.g., child assessment, professional development, and family engagement data, as appropriate) to assess the program's progress in achieving its goals, objectives, and expected outcomes. The team also evaluates the program's compliance with federal requirements.

Two more elements are essential throughout the planning process:

- Effective use of data that support a coordinated approach to service delivery
- Communication with appropriate stakeholders at each step

Integrating Data into Program Planning Systems

The Integrating Data into Planning Systems graphic above shows how the use of data is integrated into each step of the planning cycle. Below is a list of the steps in the planning cycle, along with the data activities that occur at each step.

- **Evaluate progress through the annual self-assessment (new programs begin with community assessment)**
 - Assess annual progress toward goals and objectives
 - Evaluate compliance and the efficacy of services
 - Identify strengths and areas for improvement
 - Share recommendations with all stakeholders
- **Conduct or update community assessment**
 - Analyze data
 - Establish conclusions and programming recommendations
 - Share results with all stakeholders
- **Every five years: Establish long-term goals and measurable objectives**
- **Annually: Review goals and objectives**
 - Ensure goals reflect conclusions from key data sources (e.g., community assessment, self-assessment, child outcomes, professional development, and family engagement data)
- **Create an action plan and budget that reflect goals**
 - Identify desired data
 - Determine data-collection methodologies
 - Refine recordkeeping and reporting systems
- **Implement an action plan**
 - Collect and manage data
 - Ensure the availability, usability, integrity, and security of data
 - Discuss findings regularly
- **Analyze progress and compliance through ongoing monitoring**
 - Review goals and data for trends
 - Analyze data across services
 - Draw conclusions and identify course corrections
 - Share findings with internal stakeholders

- **Respond regularly with course corrections, as required**
 - Implement course corrections
 - Review corrections to monitor the efficacy of the change
 - Communicate data findings and next steps to internal stakeholders

45 CFR §1301.2 Governing body.

(a) Composition. The composition of a governing body must be in accordance with the requirements specified at section 642(c)(1)(B) of the Act, except where specific exceptions are authorized in the case of public entities at section 642(c)(1)(D) of the Act. Agencies must ensure members of the governing body do not have a conflict of interest, pursuant to section 642(c)(1)(C) of the Act.

(b) Duties and responsibilities.

- (1)** The governing body is responsible for activities specified at section 642(c)(1)(E) of the Act.
- (2)** The governing body must use ongoing monitoring results, data on school readiness goals, other information described in §1302.102, and information described at section 642(d)(2) of the Act to conduct its responsibilities.

(c) Advisory committees.

- (1)** A governing body may establish advisory committees as it deems necessary for effective governance and improvement of the program.
- (2)** If a governing body establishes an advisory committee to oversee key responsibilities related to program governance, it must:
 - (i)** Establish the structure, communication, and oversight in such a way that the governing body continues to maintain its legal and fiscal responsibility for the Head Start agency; and,
 - (ii)** Notify the responsible HHS official of its intent to establish such an advisory committee.

45 CFR §1301.3 Policy council and policy committee.

(a) Establishing policy councils and policy committees. Each agency must establish and maintain a policy council responsible for the direction of the Head Start program at the agency level, and a policy committee at the delegate level. If an agency delegates operational responsibility for the entire Head Start or Early Head Start program to one delegate agency, the policy council and policy committee may be the same body.

(b) Composition.

(1) A program must establish a policy council in accordance with section 642(c)(2)(B) of the Act, or a policy committee at the delegate level in accordance with section 642(c)(3) of the Act, as early in the program year as possible. Parents of children currently enrolled in each program option must be proportionately represented on the policy council and on the policy committee at the delegate level.

(2) The program must ensure members of the policy council, and of the policy committee at the delegate level, do not have a conflict of interest pursuant to sections 642(c)(2)(C) and 642(c)(3) (B) of the Act. Staff may not serve on the policy council or policy committee at the delegate level except parents who occasionally substitute as staff. In the case of tribal grantees, this exclusion applies only to tribal staff who work in areas directly related to or which directly impact administrative, fiscal, or programmatic issues.

(c) Duties and responsibilities.

(1) A policy council is responsible for activities specified at section 642(c)(2)(D) of the Act. A policy committee must approve and submit to the delegate agency its decisions in each of the following areas referenced at section 642(c)(2) (D)(i) through (vii) of the Act.

45 CFR §1301.3 Policy council and policy committee. *continued*

(2) A policy council, and a policy committee at the delegate level, must use ongoing monitoring results, data on school readiness goals, other information described in §1302.102, and information described in section 642(d)(2) of the Act to conduct its responsibilities.

(d) Term.

(1) A member will serve for one year.

(2) If the member intends to serve for another year, s/he must stand for re-election.

(3) The policy council, and policy committee at the delegate level, must include in its bylaws how many one-year terms, not to exceed five terms, a person may serve.

(4) A program must seat a successor policy council, or policy committee at the delegate level, before an existing policy council, or policy committee at the delegate level, may be dissolved.

(e) Reimbursement. A program must enable low-income members to participate fully in their policy council or policy committee responsibilities by providing, if necessary, reimbursements for reasonable expenses incurred by the low-income members.

45 CFR §1301.4 Parent committees.

(a) Establishing parent committees. A program must establish a parent committee comprised exclusively of parents of currently enrolled children as early in the program year as possible. This committee must be established at the center level for center-based programs and at the local program level for other program options. When a program operates more than one option, parents may choose to have a separate committee for each option or combine membership. A program must ensure that parents of currently enrolled children understand the process for elections to the policy council or policy committee and other leadership opportunities.

(b) Requirements of parent committees. Within the parent committee structure, a program may determine the best methods to engage families using strategies that are most effective in their community, as long as the program ensures the parent committee carries out the following minimum responsibilities:

- (1)** Advise staff in developing and implementing local program policies, activities, and services to ensure they meet the needs of children and families;
- (2)** Have a process for communication with the policy council and policy committee; and
- (3)** Within the guidelines established by the governing body, policy council or policy committee, participate in the recruitment and screening of Early Head Start and Head Start employees.

45 CFR §1301.5 Training.

An agency must provide appropriate training and technical assistance or orientation to the governing body, any advisory committee members, and the policy council, including training on program performance standards and training indicated in §1302.12(m) to ensure the members understand the information they receive and can effectively oversee and participate in the programs in the Head Start agency.

45 CFR §1301.6 Impasse procedures.

(a) To facilitate meaningful consultation and collaboration about decisions of the governing body and the policy council, each agency's governing body and policy council jointly must establish written procedures for resolving internal disputes between the governing board and policy council in a timely manner that include impasse procedures.

These procedures must:

(1) Demonstrate that the governing body considers proposed decisions from the policy council and that the policy council considers proposed decisions from the governing body;

(2) If there is a disagreement, require the governing body and the policy council to notify the other in writing why it does not accept a decision; and,

(3) Describe a decision-making process and a timeline to resolve disputes and reach decisions that are not arbitrary, capricious, or illegal.

(b) If the agency's decision-making process does not result in a resolution and an impasse continues, the governing body and policy council must select a mutually agreeable third party mediator and participate in a formal process of mediation that leads to a resolution of the dispute.

(c) For all programs except American Indian and Alaska Native programs, if no resolution is reached with a mediator, the governing body and policy council must select a mutually agreeable arbitrator whose decision is final.
