SUBJECT: Recommendation to Purchase Tyler's Student Transportation Software

The administration recommends utilizing Sourcewell contract #060624-TTI to purchase Student Transportation software and related hardware from Tyler Technologies, Inc. for a total first year cost not to exceed \$103,655.00.

Tyler's Student Transportation software empowers transportation operations for districts with integrated, essential tools for bus routing, boundary planning, and mapping. For more complex routing needs, such as multi-building schooling, alternative transportation, and split households, Advanced Routing offers automation that simplifies student assignments while maintaining district routing rules, enhancing what is included in the core program. The software is an integrated, trusted student transportation solution to ensure the safe transport of every student, peace of mind for parents, and efficiency for districts and contractors. Tyler Drive™ on-board tablets are fully integrated with Tyler's Student Transportation software — an industry-first pairing that helps keep drivers and routers in sync. The system will provide for real-time tracking of buses via GPS for the school system and give parents the opportunity to know the anticipated time the bus will arrive at their stop. The tablet eliminates guesswork for drivers: it provides turn-by-turn directions following the exact assigned route, identifies students assigned to each stop, and can even reroute as needed while following pre-determined safety protocols. Training and installation of hardware on buses is included within the quote.

Kingsport City Schools benefits from using cooperative purchasing contracts with the confidence we are receiving competitive pricing and knowing the products awarded have already been through the procurement process of the lead agency. Also, utilizing cooperative procurement agreements often leads to increased efficiency by decreasing the amount of time it takes from requisition entry to product receipt.

Funding will be from both FY26 and FY27 School General Purpose Funds.

KINGSPORT CITY SCHOOLS
FISCAL YEAR 2026-2027
BUDGET AMENDMENT NUMBER ONE

GENERAL PURPOSE SCHOOL FUNDS

ITEM ONE: TISA REVENUE

We have received the May estimate for FY 2027 TISA funds. The May estimate increased by \$244,400 from the April estimate. The estimate increased for two reasons. The first is an increase in the number of KSC students. This increase is potentially due to early graduates being added to the student count. This component generated approximately \$150,000 in additional revenue. The second component is the State-Wide total of TISA funds decreased by 31.6 million dollars. This decrease caused the local portion of funding to be decreased, which increases the State portion of our funding. This affects the KCS TISA funds by approximately \$80,000.

At this time, it is recommended that the estimated revenue for TISA funds be increased by \$200,000. The remaining funds will not be allocated, pending the receipt of the final allocation of TISA funds.

ITEM TWO: CUSTODIAL PAY LANE INCREASE

With the increase in TISA funds, we have the opportunity to address KCS custodial pay. In the approved budget the School Nutrition Worker pay grade was changed from pay grade A to pay grade B. A similar change needs to be made to our custodians. This group of employees need to have their pay grade adjusted to be more competitive with surrounding school districts. There is a difference of 7.5% in pay grades. The change will cost approximately \$200,000.

With the increase in TISA funds, it is now being recommended FY 2027 budget be increased by \$200,000 to fund the pay grade increase for KCS custodians by one paygrade.
