12. Fee for transporting nonresident St. Paul's students

13. Adjourn

Business OperationsTransportation

The Arlington Public Schools' transportation system shall comply with existing Nebraska statutes and state department rules and regulations.

Arlington Public Schools shall provide school bus transportation for resident students attending Arlington Public Schools who live at least one mile from the school and outside of city limits. The transportation system shall provide a service promoting safe and healthful pupil transportation and contribute to the operational economy and efficiency of Arlington Public Schools.

Arlington Public Schools shall also provide transportation without cost for resident children who attend St. Paul Lutheran School. Such transportation shall extend only from some point on the regular public school bus route nearest or most easily accessible to their homes to and from a point on the regular bus route nearest or most easily accessible to St. Paul Lutheran School. Transportation for St. Paul students is only provided at times when transportation is being provided for Arlington Public School students.

Option students may be bused if they live directly on a school district regular bus route or parent/guardians transport their child(ren) to some point on the regular bus route as determined by the district to be safe and there is room on the bus.

Nonresident students attending St. Paul's Lutheran School may be bused if they live directly on the school district regular bus route or parent/guardians transport their child(ren) to some point on the regular bus route as determined by the district to be safe and if the desired pupil capacity on the bus is maintained. Such transportation shall extend only from some point on the regular public school bus route nearest or most easily accessible to their homes to and from a point on the regular bus route nearest or most easily accessible to St. Paul Lutheran School. There will be an annual fee assessed for these services. The fee is 'in addition' to the shuttle bus fees assessed by St. Paul's. Resident students and option students will be given priority consideration when determining capacities.

A student may be required, at the board's discretion, to transport to a location for pick-up and drop-off without reimbursement as per state law.

School buses and district vans shall be used to transport pupils to and from school for school activities.

School district buses will not operate when weather conditions or other natural elements make it unsafe to do so. The final judgment as to when conditions are unsafe to operate will be made by the superintendent. The superintendent will

be assisted by the actual "on location" decisions and reports of the transportation director.

Standing authorization shall be granted by the board to school administrators, school nurses and other personnel designated by the superintendent to transport students in private vehicles when, in the opinion of the school personnel, this is necessary.
