## Warranty Policy

System Liquidation Inc Re-Certified computers are scrutinized closely prior to shipment that we include a **5 Years parts replacement Warranty** on all of our fully Re-Certified Desktops.

No matter how good our hardware, or how thorough our process, a small percentage of our units will have "issues" during the course of the warranty period. If you do experience any trouble with your hardware, and your equipment is within the original warranty period, the process is simple: You call us or e-mail us – your choice.

If you call during our standard business hours of 9:30am to 5:30pm Eastern Time, you will be greeted by a live person and transferred to a technician dedicated to resolving your issue. You will be walked through a series of very basic steps to qualify and diagnose your specific issue. If it is determined that a replacement part is required, the replacement part will generally ship that same day.

When a warranty part is needed, a school staff member can contact either sales rep or their support staff for obtaining items needed. The communication can be via email or phone. To obtain a warranty part, provide the part needed along with the service tag on the machine that needs a replacement and the part will be sent out to the school at the address requested. Parts are usually shipped in 48-72 hrs,  
**We pay for shipping both ways.**

System Liquidation inc also offers the option of providing the school with buffer stock units, so that they can swap the units on-site. This can be discussed with your sales rep.

## Product Preparation and Testing

All our products are originated from end of the lease corporate customers, ensuring they are the highest quality corporate grade models from clean office environments.

1. **Asset Tag**  
Every computer gets a unique asset tag number. This number is labeled, bar coded and scanned into our system allowing us to track every single component, every technician who tested it and other pertinent information (service work, custom upgrades, quality assurance, etc.)
2. **Power up tests**  
All the units we receive are powered up to make sure no immediate and obvious failures occurred during receiving.
3. **Dust Removal**  
Cases are removed and our state-of-the-art dust containment station uses a combination of pressurized air and suction system to remove every bit of dust from within the unit, including such hard-to-reach places as power supply and CPU fans.
4. **Surface Cleaning**  
Using non-toxic, environmentally friendly cleaners our cleaning team cleans all external surfaces. Specialized chemicals are used for specific cleaning tasks (sticker glue removed, general cleaning, etc.)
5. **Total Cleaning**  
Individual techs hand cleans each unit, paying special attention to hard-to-reach places as well as any grime missed by the surface cleaners.
6. **Component Check**  
Using custom diagnostic software each unit connects to our testing server where every single component is checked and verified. This both ensures that components are all working and that the unit has the same original components it was manufactured with (for proper imaging).
7. **Windows Driver Test**  
Units are plugged in and allowed to boot up fully to windows. Every driver is checked to make sure there are no conflicts or invisible hardware. Basic functions are tested as is the fidelity of the custom image. Units that pass the above tests are placed on the shelf ready for sale
8. **Custom Imaging (Upon Request)**  
Custom imaging is done on customer's request.
