Schuyler Community Schools
District Zoom Meeting: All Staff
Friday, January 8, 2021 3:00 PM
Schuyler Community Schools Board Room
120 West 20th Street
Schuyler, NE 68661

Posting Locations:
Schuyler Sun
District Office Building Front Door
Schuyler Post Office
Colfax County Courthouse
Posted Date: 11-5-2020

I. Meeting Agenda

1. **Happy New Year:** Thank you for your continued work thoughout first semester. I hope the two week break allowed you a chance to recharge for the beginning of the second semester. Thank you to the staff who worked over break to complete projects in each building, take care of calendar year-end and and new year paperwork, MAKE PAYROLL, and prepare for the beginning of the second semester.

2. **COVID-19 Updates**

a. The Federal Cares Act Legislation ended on December 31st. The emergency medical leave (COVID Leave) ended with this legislation.

b. CARES Act 2 was just authorized with the recent passage of the Federal Stimulus Package. We have no guidance at this time on any additional leave allowed under this act.

c. The board will continue to provide additional leave (10 days) through the provisions of the emergency medical leave Bank (EMLB) for staff who **did not use** the "administrative" leave (COVID) in the first semester.

d. We hope to have further guidance by January 18-19 as to the need to access additional leave through the EMLB. Contact Penny if you are interested in this option.

e. **Vaccinations:** The school nurses submitted the names of all staff members interested in receiving the vaccinations. Please check with your school nurse if you did not respond or have changed your mind. they may still be able to include you on the list. See attached information.

f. **Timeline:** Our original timeline was to receive vaccinations in January. Due to the slower rollout vaccination schedule, it looks more like the **1B group** (educators) will be in February. The nurses will let you know when you are scheduled for your vaccinations. If you pass up this option, you will still be able to get a vaccination with the general population at a later date.

3. **January 18-19 PD Schedule:** We are finalizing the schedule of workshops for Janary 18-19. New teachers will be scheduled for the final 2 days of APL training. Other staff (admin, teachers, support staff) will be given the oportunity to select workshops of their interest. Thank you in advance to the staff members who are providing workshops over these two days.

4. **Strategic Planning:** Thank you for your participation in the district-wide thoughtexchange process. The community thoughtexchanges are closed today. We are in the process of organizing top thoughts into themes to be addressed in workhshops on January 18-19. The schedule for these workshops will be finalized and released on Wednesday, January 13th. You will need to register for sessions by the end of the day on Friday so that we can finalize workshop locations depending on interest.

5. **Monthly District Meetings:** Our regular monthly meetings with Food Service, Maintenance/Custodial, Para Educators and Office Personnel, and SEA are included in the meeting schedule for January 18-19. If you are interesed in attending please register for these sessions.

COVID-19 RESPONSE

LHDs' Approach to COVID-19 Vaccine in Schools

Local Health Departments (LHDs) remain committed to working with our schools to keep students, faculty, and staff safe during the COVID-19 pandemic. Communication and partnership between schools and public health continue to be a critical factor in our shared fight against COVID-19.

The good news is that in late 2020, the first of the COVID-19 vaccines were approved and delivery began across our state.

COVID-19 vaccines are what we have been waiting for. We know that these vaccines are effective and safe. They are key to keeping our loved ones safe and our schools open. Widespread vaccination will help our local businesses get back on their feet and will move our communities forward again. As more people are vaccinated, we protect health care and essential workers, people who are at highest risk, and our broader community. Local health departments are providing vaccinations to willing adults in Nebraska as soon as possible. We strongly recommend all adults get the vaccine as soon as it is available. We can and we will get past this pandemic.

The demand for vaccine is vastly higher than the number of available doses, so in Nebraska and across the country health officials are making difficult decisions about who needs to get it first. Nebraska's LHDs follow the guidance of Nebraska's Department of Health and Human Services when allocating vaccines in our communities. DHHS's guidance is responsive to federal directives as well as the situation in our state. Please know that this guidance is subject to change.

LHDs recognize the critical role that schools play in our communities. We understand the urgent need to further protect the people who work and learn in Nebraska's schools and will provide vaccine to school staff as soon as possible. Vaccines have, so far, not been tested in children, so most K-12 students and all students under 16 will not be vaccinated for COVID-19 in the foreseeable future.

DHHS guidance currently requires prioritizing eligible healthcare workers and individuals over age 75, among other groups. These individuals are slated to receive the limited available doses of COVID-19 vaccine before others. *Continued...*

Because local situations vary, the timing of schools' access to the vaccine will differ. Local health departments will work with schools directly to let them know when vaccine is available and to arrange for vaccinating consenting faculty and staff.

School faculty, staff, students, and families should continue to follow COVID-19 protocols, including...

- **Wear a mask** over their nose and mouth.
- Maintain **6-feet of distance from others** whenever possible.
- **Wash hands** often.
- Work to stay healthy while waiting their turn for the vaccine—including getting a **flu shot**.

These protocols will need to stay in place until the pandemic is over - **even after people are vaccinated.**

Again, we want to emphasize that the COVID-19 vaccine is safe and effective. In spite of this, people may have questions about the vaccine, and some people may be frightened because of misinformation and untruths circulating about the vaccine.

Reliable, science-based information about the COVID-19 vaccines is available from your local health department and can be found at the following sites:
